The Mythomanias Michael S. Myslobodsky, 2013-06-17 Recently there has been a renewal of interest in the broad and loosely bounded range of phenomena called deception and self deception This volume addresses this interest shared by philosophers social and clinical psychologists and more recently neuroscientists and cognitive scientists Expert contributors provide timely

reliable and insightful coverage of the normal range of errors in perception memory and behavior They place these phenomena on a continuum with various syndromes and neuropsychiatric diseases where falsehood in perception self perception cognition and behaviors are a peculiar sign Leading authorities examine the various forms of mythomania deception and self deception ranging from the mundane to the bizarre such as imposture confabulations minimization of symptomatology denial and anosognosia Although the many diverse phenomena discussed here share a family resemblance they are unlikely to have a common neurological machinery In order to reach an explanation for these phenomena a reliable pattern of lawful behavior must be delineated It would then be possible to develop reasonable explanations based upon the underlying neurobiological processes that give rise to deficiencies designated as the mythomanias The chapters herein begin to provide an outline of such a development Taken as a whole the collection is consistent with the emerging gospel indicating that neither the machinery of nature nor the forces of nurture taken alone are capable of explaining what makes cognition and behaviors aberrant

Theorizing the Anthropology of Belief Luke J. Matthews, Paul Robertson, 2024-02-01 This book explores both scientific and humanistic theoretical traditions in anthropology through the lens of ontology The first part of the book examines different methods for generating valid anthropological knowledge and proposes a shift in current consensus Drawing on Western scholars of antiquity and the medieval period and moving away from 20th century theorists it argues that we must first make ontological assumptions about the kinds of things that can exist or not before we can then develop epistemologies that study those kinds of things The book goes on to apply the ontology first theory to a set of case studies in modern day conspiracy theories misinformation and magical thinking It asserts that we need to move away from unneeded metaphysical assumptions of conspiracy theories being misinformation and argues that reconstructing particular historical events can be a fruitful zone for application of quantitative methods to humanistic questions Theorizing the Anthropology of Belief is an excellent supplementary suitable for upper level undergraduate and graduate courses in anthropological theory

Acts of Memory Mieke Bal, Jonathan V. Crewe, Leo Spitzer, 1999 A theoretically grounded interdisciplinary study of cultural memory in sites ranging from Chile Bolivia and South Africa to Germany and the US
