Co-Dependence Healing the Human Condition Charles Whitfield, 2010-01-01 Of all the books on the often misunderstood concept of co dependence this is probably the clearest most complete and informative Charles Whitfield is a frontline clinician who has been assisting co dependents in their healing for over twenty years He has researched the literature on co dependence which he summarizes in this widely read book He sees co dependence as a way to more accurately describe the painful and confusing part of the human condition In careful detail he describes just what co dependence is and what it is not how it comes about and how to heal its painful aftereffects **Creativity and the Dissociative Patient** Lani Alaine Gerity, 1999 Lani Gerity shows in this book that puppet making incorporating both art and narrative provides an ideal vehicle for therapeutic work It is particularly valuable in the treatment of dissociative patients whose symptoms may include disturbances in body image a dissociated sense of self a disrupted sense of history and causality and a feeling of alienation from the self Lani Gerity explores the application of this in the context of object relations

theory She shows the creative process working on many levels for dissociative individuals and groups Making puppets three dimensional representations of the human body helped one patient to integrate her sense of her body image and herself Using puppets and creating narratives about them encourages patients to build communities and to release themselves from the hold of the trauma of their pasts Descriptions and analyses of Gerity s work with dissociative patients in the US and Canada is underpinned by a theoretical framework which encompasses theories from the arts therapies and from psychiatry

Dance Movement Therapy Bonnie Meekums, 2002-07-04. This book is a very useful starting point for trainees in DMT or for those training or practicing in other arts therapies or allied professions who would like an overview of theories and methods in DMT. For more experienced DMT practitioners and researchers this book provides an introduction to theories of creativity and the notion of the movement metaphor as a basis for DMT theory and practice. There is constant dialogue and contextualizing between Meekums's theory and approach, psychological theories that have influenced the development of DMT, case studies and the historical development of DMT. What is important in this book is the acknowledgement that DMT is a unique psychotherapy practice with a distinctive theory and methodology based on the intrinsic interaction between movement, the creative process and psychology. *Body Movement and Dance in Psychotherapy*. Along with the how and why of psychotherapy, Bonnie Meekums provides realistic examples of people whose lives have benefited from dance movement therapy. It is my honour to recommend this book. Dianne Dulicai, President of the American Dance Therapy Association. It is a very accessible book; it's an introduction to Dance Movement Therapy ideal for students who have started DMT training, people who work in related fields eg other arts therapies or anyone who is interested in DMT. However, the book goes beyond the introduction in Bonnie's attempt to develop a new framework. It encourages practising DMTs to question their own approach, introducing a different terminology to describe the creative process. It is food for thought and for discussions in supervision. Dr Meekums surpasses her goal of contributing to the development of DMT; her book serves as a catalyzing guide for all health care professionals who seek creative processes in healing. Meekums provides an innovative framework for DMT and offers adequate references and recommendations for further study, research and evidence-based practice. I enthusiastically recommend this book to creative arts therapists, allied practitioners and especially to practicing and interning dance movement therapists as a professional resource and guide. Maria Brignola Lee. *The Arts in Psychotherapy*. *Dance Movement Therapy* is a concise practical introduction to a form of therapy which has the body-mind relationship at its centre. Movement with both its physical and metaphorical potential provides a unique medium through which clients can find expression, reach new interpretations and ultimately achieve a greater integration of their emotional and physical experience. In the book Bonnie Meekums maps the origins of Dance Movement Therapy (DMT) and its relationship to other more traditional forms of therapy. Outlining a new model for DMT, she describes the creative process which develops in cycles throughout each session and over the course of therapy. The stages in this creative psychotherapeutic process are described as preparation, incubation, illumination and evaluation. Illustrated throughout with

vivid case examples the book defines the role of the therapist in working with clients to bring about change This is a practical and accessible guide which will help new trainees become orientated within the field of DMT It also has much to offer practising psychotherapists who wish to develop more holistic and creative ways of meeting their clients needs **Jungian**

and Interdisciplinary Interfaces Between Emotions Elizabeth Brodersen, Isabelle Meier, Valeria Céspedes

Musso, 2025-04-09 C G Jung stressed that emotions are the driving forces behind social and psychological lives enabling individuals to connect with themselves and their environment Divided into five parts this innovative volume explores the enmeshments between emotions The material locates emotions within the context of nonverbal developmental somatic embodiment eco political and psychosocial engagement gender and LGBTQ Shadow phenomenology history myth and the effects of war are likewise explored in depth Each theme expertly stimulates a resurgence of Jungian and non Jungian clinical and academic interest in the role that emotions play in contemporary thought and in the impetus for eco socioeconomic change This volume will be of great interest to Jungian analysts and trainees psychotherapists and interdisciplinary cultural theorists It will aid scholars in Jungian academic studies and related fields interested in metaphor symbols gender and LGBTQ perspectives An Introduction to the Study of Sexuality R. Horrocks, 1997-04-15 This book examines some of the ways in which sexuality has been described and interpreted in the West The main models examined are the Christian view of sex as sinful the psychoanalytical model including such notions as the sexual drive infantile sexuality the Oedipus complex and the distinction between male and female sexuality the social construction model which proposes that sexuality is a modern concept and the links between sexuality and spirituality There is also some consideration of feminist and gay approaches to sexuality and the complicated subject of male sexuality **Masculinity in Crisis** R. Horrocks, 1994-08-30

This book argues that masculine identity is in deep crisis in Western culture the old forms are disintegrating while men struggle to establish new relations with women and with each other This book offers a fresh look at gender particularly masculinity by using material from the author's work as a psychotherapist The book also considers the contributions made by feminism sociology and anthropology to the study of gender and suggests that it must be studied from an interdisciplinary standpoint Masculinity is seen to have economic political and psychological roots but the concrete development of gender must be traced in the relations of the male infant with his parents Here the young boy has to separate from his mother and his own proto feminine identity and identify with his father but in Western culture fathering is often deficient Male identity is shown to be fractured fragile and truncated Men are trained to be rational and violent and to shut out whole areas of existence and feeling Many stereotypes imprison men particularly machismo which is shown to be deeply masochistic and self destructive
