

The background of the cover is a classical painting depicting two figures in a landscape. On the left, a woman in a long, flowing, light-colored dress stands, her head tilted back and arms raised in a gesture of awe or inspiration. On the right, a man in a dark, hooded robe lies on the ground, looking up at the woman with a contemplative expression. The ground is covered in small, light-colored flowers, and the overall scene is bathed in a warm, golden light.

*Recreative Minds* Gregory Currie, Ian Ravenscroft, 2002 Annotation *Recreative Minds* develops a philosophical theory of imagination that draws upon recent theories and results in psychology Ideas about how we read the minds of others have put the concept of imagination firmly back on the agenda for philosophy and psychology Currie and Ravenscroft present a theory of what they call imaginative projection they show how it fits into a philosophically motivated picture of the mind and of mental states and how it illuminates and is illuminated by recent developments in cognitive psychology They argue that we need to recognize a category of desire in imagination and that supposition and fantasy should be classed as forms of imagination They accommodate some of the peculiarities of perceptual forms of imagining such as visual and motor imagery and suggest that they are important for mind reading They argue for a novel view about the relations between imagination and pretence and suggest that imagining can be but need not be the cause of pretending They show how the theory accommodates but goes beyond the idea of mental simulation and argue that the contrast between simulation and theory is neither exclusive nor exhaustive They argue that we can understand certain developmental and psychiatric disorders as arising from faulty imagination Throughout they link their discussion to the uses of imagination in our encounters with art and they conclude with a chapter on responses to tragedy The final chapter also offers a theory of the emotions that suggests that these states have much in common with perceptual states Currie and Ravenscroft offer a lucid exploration of a fascinating subject for readers in philosophy psychology and aesthetics

**A Luxury of the Understanding** Allan Hazlett, 2013-10-03 The value of true belief has played a central role in history of philosophy consider Socrates slogan that the unexamined life is not worth living and Aristotle s claim that everyone naturally wants knowledge as well as in contemporary epistemology where questions about the value of knowledge have recently taken center stage It has usually been assumed that accurate representation true belief is valuable either instrumentally or for its own sake In A Luxury of the Understanding Allan Hazlett offers a critical study of that assumption and of the main ways in which it can be defended Hazlett defends the conclusion that true belief is at most sometimes valuable In the first part of the book he targets the view that true belief is normally better for us than false belief and argues that false beliefs about ourselves for example unrealistic optimism about our futures and about other people such as overly positive views of our friends are often valuable vis vis our wellbeing In the second part he targets the view that truth is the aim of belief and argues for anti realism about the epistemic value of true belief Together these arguments comprise a challenge to the philosophical assumption of the value of true belief and suggest an alternative picture on which the fact that some people love truth is all there is to the value of true belief
