Arbitrability Loukas A. Mistelis, 2009-01-01 It often seems today that no dispute is barred from resolution by arbitration Even the fundamental question of whether a dispute falls under the exclusive jurisdiction of a judicial body may itself be arbitrable Arbitrability is thus an elusive concept yet a systematic study of it as this book shows yields innumerable guidelines and insights that are of substantial value to arbitral practice Although the book takes the form of a collection of essays it is designed as a comprehensive commentary on practical issues that emerge from the idea of arbitrability Fifteen leading academics and practitioners from Europe and the United States each explore different facets of arbitrability always with a perspective open to international developments and comparative evaluation of standards The presentation falls into two parts in the first the focus is on the general features of arbitrability its rationale and the laws applicable to it In the second arbitrability is specifically examined in the context of administrative criminal corporate IP financial commercial and criminal law This book has its origins in an International Conference on Arbitrability held at Athens in September 2005 Seven papers presented there are here reviewed and updated and nine others are added The subject of the book and arbitrability and is one that is much talked about but seldom if ever given the in depth treatment presented here Arbitrators and other practitioners in the field will welcome the way the analysis moves logically from theory to practice regarding every issue and academics will recognize a definitive treatment of arbitrability as understood and applied in the settlement of disputes today

A Performance no Direito Tributário Luciano Gomes Filippo, 2019-05-13 O tema da performance no Direito Fiscal

permite avaliar os resultados da gestão pública no Direito Financeiro quanto aos resultados na cobrança e emprego dos tributos. A tese explora seus desdobramentos a partir dos princípios da eficiência da praticidade e da boa administração tributária. A gestão de orçamentos orientados para o atingimento de resultados performance por programas ou por objetivos tem sido a tendência empregada por diversos países. E em momentos de crises econômicas percebe-se a utilidade desse pressuposto de controle de performance na necessária correlação entre redução de gastos e eficiência arrecadatória sem necessitar de aumento de tributos que onerem tanto mais a sociedade e a economia na recuperação e estabilidade financeira. Por isso impõe-se admitir como urgente medidas que a Administração Tributária promova em favor da cobrança de tributos que levem em conta os mesmos objetivos de performance.
