Recycling And The Politics:

Recycling and the Politics of Urban Waste Matthew Gandy, 2014-06-03 The affluence of western society has given rise to unprecedented quantities of waste presenting one of the most intractable environmental problems for contemporary society This book examines recycling and municipal waste management in three major cities London New York and Hamburg A range of political and economic issues are examined to illustrate how any reduction in the size of the waste stream in order to achieve more equitable and environmentally sustainable patterns of resource use is incompatible with the current emphasis in the use of the market for environmental protection The case studies show how contrary to the hopes of many environmentalists and policy makers municipal waste management is moving steadily towards the profitable option of incineration with energy recovery rather than the recycling of materials or waste reduction at source The evidence suggests that the achievement of a more sustainable pattern of recycling and waste management policy would demand a fundamental change in public policy to give government a more active role in environmental protection

Resisting Garbage Lily Baum Pollans, 2021-11-02 Resisting Garbage presents a new approach to understanding practices of waste removal and recycling in American cities one that is grounded in the close observation of case studies while being broadly applicable to many American cities today Most current waste practices in the United States Lily Baum Pollans argues prioritize sanitation and efficiency while allowing limited post consumer recycling as a way to quell consumers environmental anxiety After setting out the contours of this weak recycling waste regime Pollans zooms in on the very different waste management stories of Seattle and Boston over the last forty years While Boston's local politics resulted in a waste export program with minimal recycling Seattle created new frameworks for thinking about consumption disposal and the roles that local governments and ordinary people can play as partners in a project of resource stewardship By exploring how these two approaches have played out at the national level Resisting Garbage provides new avenues for evaluating municipal action and fostering practices that will create environmentally meaningful change

Steel, 2014-04-21 Recent partisan squabbles over science in the news are indicative of a larger tendency for scientific research and practice to get entangled in major ideological divisions in the public arena This politicization of science is deepened by the key role government funding plays in scientific research and development the market leading position of U S based science and technology firms and controversial U S exports such as genetically modified foods or hormone injected livestock This groundbreaking one volume A to Z reference features 120 150 entries that explore the nexus of politics and science both in the United States and in U S interactions with other nations The essays each by experts in their fields examine Health environmental and social cultural issues relating to science and politics Concerns relating to government regulation and its impact on the practice of science Key historical and contemporary events that have shaped our contemporary view of how science and politics intersect *Science and Politics An A to Z Guide to Issues and Controversies* is a must have resource for researchers and students who seek to deepen their understanding of the connection between science and politics The Politics of Precaution David Vogel, 2012-04-29 The Politics of Precaution examines the politics of consumer and environmental risk regulation in the United States and Europe over the last five decades explaining why America and Europe have often regulated a wide range of similar risks differently It finds that between 1960 and 1990 American health safety and environmental regulations were more stringent risk averse comprehensive and innovative than those adopted in Europe But since around 1990 the book shows global regulatory leadership has shifted to Europe What explains this striking reversal David Vogel takes an in depth comparative look at European and American policies toward a range of consumer and environmental risks including vehicle air pollution ozone depletion climate change beef and milk hormones genetically modified agriculture antibiotics in animal feed pesticides cosmetic safety and hazardous substances in electronic products He traces how concerns over such risks and pressure on political leaders to do something about them have risen among the European public but declined among Americans Vogel explores how policymakers in Europe have

grown supportive of more stringent regulations while those in the United States have become sharply polarized along partisan lines And as European policymakers have grown more willing to regulate risks on precautionary grounds increasingly skeptical American policymakers have called for higher levels of scientific certainty before imposing additional regulatory controls on business Transatlantic Environment and Energy Politics Stacy D VanDeveer, Mr Henrik Selin, Professor Miranda A Schreurs, 2013-03-28 Environmental and energy policies have become increasingly significant in European and North American politics This fascinating book uses a wide range of case studies that embrace climate change product standards chemical regulations renewable energy policies food safety and genetically modified organisms to examine areas of conflict and cooperation in the transatlantic relationship While there are many areas where the European Union and the United States are following divergent policy paths there are also many signs that a more cooperative transatlantic relationship could emerge in the future Transatlantic Environment and Energy Politics is highly relevant to understanding how the European Union and North America can cooperate more effectively in meeting today's many global environmental and energy policy challenges It is essential reading for all advanced students and scholars **The Globalization of World Politics** John Baylis, Steve Smith, Patricia Owens, 2020 The best selling introduction to international relations offers the most comprehensive coverage of the key theories and global issues in world politics written by the leading experts in the field

Tax-funded Politics James T. Bennett, 2017-12-02 The past two decades have seen the growth of well coordinated networks of political activists who have managed to obtain hundreds of millions of taxpayers dollars for political lobbying Although federal regulations prohibit such activities loopholes in the law allow these monies to be masked as private resources State and federal taxpayers monies fund the lobbying efforts of private advocacy groups on both the political left and the right In Tax Funded Politics James Bennett argues that governmental agencies rather than combating theses abuses aid and abet them in order to increase their own size and scope Drawing on a broad range of examples Bennett shows how

the ideals of the nation's Founding Fathers have been subverted by molding and manipulating the will of the people through government orchestrated propaganda. Government agencies far from being indifferent to self aggrandizement and the consolidation of wealth and power are concerned with their own self interest whether it is enhancing their budget or supporting a particular political agenda. Likewise nonprofit entities claim to operate solely in the public interest but also engage in political advocacy and lobbying activities. But when charities do the lobbying blatant self interest is wrapped in the halo of the public interest. Tax Funded Politics exposes dozens of mutually beneficial arrangements between government and charities involving hundreds of millions of dollars. It then explores their implications. Groups that receive government funds are loath to criticize failed government programs and are advocates for the expansion of the agencies that provide their support. Even charities learn not to bite the hand that feeds them. Although the vast majority of the funds are directed to nonprofit groups on the left of the political spectrum so called conservative organizations have also sought and received taxpayers funds despite promise to get g
