## **Red Or Green For Farmers And The Rest Of Us:**

*Red Or Green for Farmers (and the Rest of Us)* Richard Body, 1987      *World Agricultural Economics and Rural Sociology Abstracts*, 1988      **The Spectator**, 1988      **From Red to Green?** Paul Donovan, Julie Hudson, 2013-01-11 Written by an economist and an investment professional this book addresses the twin crises that the world is facing in the form of a simultaneous financial and environmental credit crunch Financially consumers are less able to consume now and pay later Environmentally we may have already reached our credit limit and the bill for past financial and environmental consumption is falling due Whether the financial credit crunch constrains consumers in a way that will be environmentally supportive naturally slowing the consumption of finite resources or hinders any effective resolution of the environmental credit crunch is of crucial importance Policy responses to the financial crisis are likely to be constrained by the political need to support the economic status quo and when combined with a global reduction in available investment capital there are serious challenges ahead if the economic and environmental damage of the environmental credit crunch is to be minimised This book asks whether financial crunch induced changes in consumer behaviour will be enough to avoid or reduce the environmental crunch many believe is just round the corner Donovan and Hudson combine their respective economic and environmental perspectives to address this key question reviewing this tale of two crunches from the perspective of different economic sectors The answer to the conundrum this book poses may lie in the only unlimited resource on the planet human ingenuity

Resurgence, 1987      **The Red and the Green** Frederic L. Pryor, 2014-07-14 Reorganizing the agricultural sector into large scale state and collective farms was the most radical transformation of economic institutions implemented by Marxist governments Frederic Pryor provides perspective on this unique experiment by comparing in a systematic and original fashion the changes in the organization of agriculture in all of the world's Marxist nations This approach allows not only a clearer understanding of the major lines of agricultural policy and organization in these nations but also a keener insight into the reasons underlying the variations among them What have been the doctrinal elements that have led to collectivization Why has the process of collectivization been so different in various nations How have the farms been organized both internally and within the larger economy How has the performance of agriculture differed between the various Marxist nations and comparable capitalist nations And what are the difficulties in reversing collectivization and moving back toward private agriculture In answering these questions *The Red and the Green* draws on a vast number of primary and secondary sources from many nations as well as from extensive interviews with farmers agricultural officials and specialists in more than a dozen Marxist nations Among books dealing with problems of communist economy this study is unrivaled in its broad scope combined with careful institutional and statistical analysis Originally published in 1992 The Princeton Legacy Library uses the latest print on demand technology to again make available previously out of print books from the distinguished backlist of Princeton University Press These editions preserve the original texts of these important books while presenting

them in durable paperback and hardcover editions The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905

**Red China's Green Revolution** Joshua Eisenman, 2018-04-24 China's dismantling of the Mao era rural commune system and return to individual household farming under Deng Xiaoping has been seen as a successful turn away from a misguided social experiment and a rejection of the disastrous policies that produced widespread famine In this revisionist study Joshua Eisenman marshals previously inaccessible data to overturn this narrative showing that the commune modernized agriculture increased productivity and spurred an agricultural green revolution that laid the foundation for China's future rapid growth Red China's Green Revolution tells the story of the commune's origins evolution and downfall demonstrating its role in China's economic ascendance After 1970 the commune emerged as a hybrid institution including both collective and private elements with a high degree of local control over economic decision but almost no say over political ones It had an integrated agricultural research and extension system that promoted agricultural modernization and collectively owned local enterprises and small factories that spread rural industrialization The commune transmitted Mao's collectivist ideology and enforced collective isolation so it could overwork and underpay its households Eisenman argues that the commune was eliminated not because it was unproductive but because it was politically undesirable it was the post Mao leadership led by Deng Xiaoping not rural residents who chose to abandon the commune in order to consolidate their control over China Based on detailed and systematic national provincial and county level data as well as interviews with agricultural experts and former commune members Red China's Green Revolution is a comprehensive historical and social scientific analysis that fundamentally challenges our understanding of recent Chinese economic history

**The American Farmer's Encyclopedia** Cuthbert William Johnson, Gouverneur Emerson, 1858 **The American Farmer**, 1827 **The Agricultural Student**, 1921 Gardeners' Chronicle and Agricultural Gazette, 1869 The Green and the Red William Delany, 2001 After 1848 political revolution disappears in England and grows in Ireland Like countries in southern and eastern Europe Ireland was not developing its population technology wealth or its middle class as was England Celtic Ireland was at the edge of extinction How did the Irish turn this around There were three kinds of response to this challenge One acquiescence supporting the Act of Union with Great Britain 1800 Two compromise partial administrative repeal of the Act of Union Home Rule Three fight for an independent Irish republic by revolutionary means like George Washington in 1776 Our analysis focuses on the third response the Fenians but the others are always in the picture How do the Fenians expect to make a revolution successfully English monarchs Tory politicians and English governments spared no military cost to prevent any George Washington allied with France or Germany at their back door To discover the revolutionary answers to our question the author goes to the general history and to a detailed analysis of the Fenian social organization leadership value perspectives during four time periods What is the movement's desired future republican green or socialist red What are the

consequences for Ireland its classes castes and groups      The American Farmer John S. Skinner,1827      **Michigan Farmer and State Journal of Agriculture** ,1908      **The New York Farmer and American Gardener's Magazine** ,1835

The Prairie Farmer ,1867      Red Revolution, Green Revolution Sigrid Schmalzer,2016-01-20 In 1968 the director of USAID coined the term green revolution to celebrate the new technological solutions that promised to ease hunger around the world and forestall the spread of more red or socialist revolutions Yet in China where modernization and scientific progress could not be divorced from politics green and red revolutions proceeded side by side In Red Revolution Green Revolution Sigrid Schmalzer explores the intersection of politics and agriculture in socialist China through the diverse experiences of scientists peasants state agents and educated youth The environmental costs of chemical intensive agriculture and the human costs of emphasizing increasing production over equitable distribution of food and labor have been felt as strongly in China as anywhere and yet as Schmalzer shows Mao era challenges to technocracy laid important groundwork for today s sustainability and food justice movements This history of scientific farming in China offers us a unique opportunity not only to explore the consequences of modern agricultural technologies but also to engage in a necessary rethinking of fundamental assumptions about science and society      **The New Genesee Farmer and Gardener's Journal** ,1840      *The Journal of Horticulture, Cottage Gardener, and Home Farmer* ,1897      Practical Farmer ,1916
