## Sex and the Evolution of Human Nature

'Animals and plants evolved sex to fend off parasitic infection. Now look where it has got us. Men want BMWs, power and money in order to pair-bond with women who are blonde, youthful and narrow-waisted ... a brilliant examination of the scientific debates on the hows and whys of sex and evolution'

## **Red Queen Sex And The Evolution Of Human Nature:**

**The Red Queen** Matt Ridley,1994-10-06 Sex is as fascinating to scientists as it is to the rest of us A vast pool of knowledge therefore has been gleaned from research into the nature of sex from the contentious problem of why the wasteful reproductive process exists at all to how individuals choose their mates and what traits they find attractive This fascinating book explores those findings and their implications for the sexual behaviour of our own species It uses the Red Queen from Alice in Wonderland who has to run at full speed to stay where she is as a metaphor for a whole range of sexual behaviours The book was shortlisted for the 1994 Rhone Poulenc Prize for Science Books Animals and plants evolved sex to fend off parasitic infection Now look where it has got us Men want BMWs power and money in order to pair bond with women who are blonde youthful and narrow waisted a brilliant examination of the scientific debates on the hows and whys of sex and evolution Independent *Evolutionary Psychology* Lance Workman,Will Reader,2014-01-09 Third edition of the classic undergraduate psychology textbook entirely updated to combine traditional and cutting edge research and additional pedagogical features

**Eros and Noesis** Don A. Monson,2022-03-16 This is the first study to apply the results of modern cognitive science to medieval love literature Covering the entire corpus of Occitan French and Latin love literature of twelfth and thirteenth century France it explores the universal and the culturally specific in medieval poetic attitudes towards love the cognitive structure of the love themes and the cognitive basis for the system of courtly genres It proposes a cognitive taxonomy of courtly literature based on three hyper genres the lyric as the basic mode for the expression of love with courtly narrative and didactic literature arising through a process of amplification of the courtly themes It also includes anti courtly satire which applies to courtly idealism an innate human propensity for detecting cheating *The Adam Smith Review Volume 7* Fonna Forman,2013-11-07 Adam Smith s contribution to economics is well recognised but in recent years scholars have been exploring anew the multidisciplinary nature of his works The Adam Smith Review is a refereed annual review that provides a unique forum for interdisciplinary debate on all aspects of Adam Smith s works his place in history and the significance of his writings to the modern world It is aimed at facilitating debate between scholars working across the humanities and social sciences thus emulating the reach of the Enlightenment world which Smith helped to shape The seventh volume of the series contains contributions from specialists across a range of disciplines including Christopher Berry Maureen Harkin Edith Kuiper N B Leddy Catriona Seth Henry C Clarke Deidre Dawson Dionysios Drosos Ioannis A Tassopoulos Jeremy Jennings Ryan Patrick Hanley Fotini Vaki Spiros Tegos Nicholas J Theocarakis Chandran Kukathas Donald Winch Fonna Forman Craig Smith Nicholas Phillipson Chad Flanders Emily Nacol Andrea Radasanu Rachel Zuckert Michael L Fraser Ian S Ross Daniel B Klein Douglas J Den Uyl James A Harris Geoffrey Kellow Paul Dumouchel Jan Horst Keppler Paul Oslington Adrian Walsh Spencer J Pack and Dennis C Rasmussen Topics examined include Smith and Women Adam Smith in Greece Nicholas Phillipson s Adam Smith An Enlightened Life Michael L Fraser s The Enlightenment of

**Modern Humans** John F.

Hoffecker,2017-10-31 Modern Humans is a vivid account of the most recent and perhaps the most important phase of human evolution the appearance of anatomically modern people Homo sapiens in Africa less than half a million years ago and their later spread throughout the world Leaving no stone unturned John F Hoffecker demonstrates that Homo sapiens represents a major transition in the evolution of living systems in terms of fundamental changes in the role of non genetic information Modern Humans synthesizes recent findings from genetics including the rapidly growing body of ancient DNA the human fossil record and archaeology relating to the African origin and global dispersal of anatomically modern people Hoffecker places humans in the broad context of the evolution of life emphasizing the critical role of genetic and non genetic forms of information in living systems as well as how changes in the storage transmission and translation of information underlie major transitions in evolution He also draws on information and complexity theory to explain the emergence of Homo sapiens in Africa several hundred thousand years ago and the rapid and unprecedented spread of our species into a variety of environments in Australia and Eurasia including the Arctic and Beringia beginning between 75 000 and 60 000 years ago This magisterial work will appeal to all with an interest in the ever fascinating field of human evolution The Routledge

Handbook of Dehumanization Maria Kronfeldner,2021-02-25 A striking feature of atrocities as seen in genocides civil wars or violence against certain racial and ethnic groups is the attempt to dehumanize to deny and strip human beings of their humanity Yet the very nature of dehumanization remains relatively poorly understood The Routledge Handbook of Dehumanization is the first comprehensive and multidisciplinary reference source on the subject and an outstanding survey of the key concepts issues and debates within dehumanization studies Organized into four parts the Handbook covers the following topics The history of dehumanization from Greek Antiquity to the 20th century contextualizing the oscillating boundaries dimensions and hierarchies of humanity in the history of the West How dehumanization is contemporarily studied with respect to special contexts as part of social psychology as part of legal studies or literary studies and how it connects to the idea of human rights disability and eugenics the question of animals and the issue of moral standing How to tackle its complex facets with respect to the perpetrator s and the target s perspective metadehumanization and selfdehumanization rehumanization social death status and interdependence as well as the fear we show toward robots that become too human for us Conceptual and epistemological questions on how to distinguish different forms of dehumanization and neighboring phenomena on why dehumanization appears so paradoxical and on its connection to hatred essentialism and perception Essential reading for students and researchers in philosophy history psychology and anthropology this Handbook will also be of interest to those in related disciplines such as politics international relations criminology legal studies literary studies gender studies disability studies or race and ethnic studies as well as readers from social work political activism and public policy **Be Fruitful and Multiply** Donald Worster,2025-10-07 A groundbreaking history that explores how human desires

have affected our relationship with the natural world and why this is a cause for hope Donald Worster looks back over 200 000 years of Homo sapiens sapiens to show how human nature especially the drive for food and sex has responded to environmental conditions throughout history Examining how this process led from foraging to the agrarian revolution and then to a capitalist way of life Worster brings us face to face with a third transformation of human society that is beginning to take shape in China an ecological civilization This meticulously researched book explores how human desires have driven us to overrun our environments and how we have adapted by creating new relationships with the earth Tying the past to the future and humans to the planet Worster acknowledges that we are at a potentially dangerous tipping point Yet he offers a surprisingly optimistic vision full of faith in the strength of our human desires to help us develop exciting futures in a changing world as we have done time and again and achieve a good life for the billions of us trying to survive on a finite planet

The View From the Center of the Universe Joel R. Primack, Nancy Ellen Abrams, 2007-08-07 In this strikingly original book a world renowned cosmologist and an innovative writer of the history and philosophy of science uncover an astonishing truth Humans actually are central to the universe What does this mean for our culture and our personal lives The answer is revolutionary a science based cosmology that allows us to understand the universe as a whole and our extraordinary place in it

Evolutionary Aesthetics Eckart Voland, Karl Grammer, 2013-04-17 Evolutionary Aesthetics is the attempt to understand the aesthetic judgement of human beings and their spontaneous distinction between beauty and ugliness as a biologically adapted ability to make important decisions in life The hypothesis is both in the area of natural beauty and in sexuality with regard to landscape preferences but also in the area of artificial beauty i e in art and design that beauty opens up fitness opportunities while ugliness holds fitness risks In this book this adaptive view of aesthetics is developed theoretically presented on the basis of numerous examples and its consequences for evolutionary anthropology are illuminated

**Identity and Subsistence** Sarah M. Nelson, 2007 Throughout human history gender has served as one of the ways in which human beings form their identities and then make their way in the world But it is not the only way We also discover ourselves through race age class and other categories Increasingly archaeologists are recovering evidence of the ways in which gender has been important in identity formation in the past especially in its interaction with other social factors In Identity and Subsistence a number of scholars look at how the idea of gender has worked with respect to the formation of the self masculinity and femininity human evolution and the development of early agrarian and pastoralist societies

*Families without Fathers* David Popenoe, 2017-07-12 The American family is changing Divorce single parents and stepfamilies are redefining the ways we live together and raise our children Many experts feel these seemingly inevitable changes should be celebrated they claim that the new families which often lack a strong father are actually healthier than traditional two parent families or at the very least do children no harm But as David Popenoe shows in Families Without Fathers this optimistic view is severely misguided Examining evidence from social and behavioral science

history and evolutionary biology Popenoe shows why fathers today are deserting their families in record numbers The disintegration of the child centered two parent family especially in the inner cities where as many as two in three children are growing up without their fathers and the weakening commitment of fathers to their children that more and more follows divorce are central causes of many of our worst individual and social problems Juvenile delinquency drug and alcohol abuse teenage pregnancy welfare dependency and child poverty can be directly traced to fathers lack of involvement in their children s lives Our situation will only get worse Popenoe warns unless men are willing to renew their commitment to their marriages and to their children Yet he is not just an alarmist He suggests concrete policies and new ways of thinking and acting that will help all fathers improve their marriages and family lives and tells us what we as individuals and as a society can do to support and strengthen the most important thing a man can do *Our Genes, Our Choices* David

Goldman,2023-09-04 *Our Genes Our Choices* How Genotype and Gene Interactions Affect Behavior Second Edition explains how the complexity of human behavior including concepts of free will derives from a relatively small number of genes which direct neurodevelopmental sequences Are people free to make choices or do genes determine behavior Paradoxically the answer to both questions is yes because of neurogenetic individuality a new theory with profound implications Here author David Goldman uses judicial political medical and ethical examples to illustrate that this lifelong process is guided by individual genotype molecular and physiologic principles as well as by randomness and environmental exposures a combination of factors that we choose and do not choose Written in an authoritative yet accessible style the book includes practical descriptions of the function of DNA discusses the scientific and historical bases of genethics and introduces the topics of epigenetics and the predictive power of behavioral genetics In the decade since the first edition published knowledge of genetic influences on the neurogenetic underpinnings of behavior has been transformed by genomic technologies Genome Wide Association studies for example have revealed that hundreds of genes influence vulnerability to psychiatric disease and innate predisposition to risk taking behaviors This new edition has been thoroughly revised to focus on free will and its neurogenetic origins In addition the use of polygenic scores for behavioral prediction are discussed in depth reflecting the GWAS Genome Wide Association Study revolution and combined use of genetic predictors in polygenic scores Sections on epigenetics are also substantially expanded throughout better defined and tied to neuroplasticity and gene environment interaction Figures and illustrations have been added or improved throughout and disease nosology and terminology has been updated Updates on the previous edition which was the First Prize winner of the 2013 BMA Medical Book Award for Basic and Clinical Sciences Poses and resolves challenges to moral responsibility raised by modern genetics and neuroscience Analyzes the neurogenetic origins of human behavior and free will Features expanded sections on the neurogenetic basis of free will polygenic risk scores and epigenetic influence over behavior as well as improved figures and updated terminology *The Causes of War and the Spread of Peace* Azar Gat,2017 The causes of war why people fight is

one of the big questions of human existence Azar Gat's book ranging from the beginning of prehistory to the 21st century offers a definitive answer to the lingering mystery **Public Anthropology in a Borderless World** Sam Beck, Carl A. Maida, 2015-07-01 Anthropologists have acted as experts and educators on the nature and ways of life of people worldwide working to understand the human condition in broad comparative perspective As a discipline anthropology has often advocated and even defended the cultural integrity authenticity and autonomy of societies across the globe Public anthropology today carries out the discipline's original purpose grounding theories in lived experience and placing empirical knowledge in deeper historical and comparative frameworks This is a vitally important kind of anthropology that has the goal of improving the modern human condition by actively engaging with people to make changes through research education and political action

*Case for Discrimination, The*, **Evolutionary History** Edmund Russell, 2011-04-11 We tend to see history and evolution springing from separate roots one grounded in the human world and the other in the natural world Human beings have however become probably the most powerful species shaping evolution today and human caused evolution in other species has probably been the most important force shaping human history This book introduces readers to evolutionary history a new field that unites history and biology to create a fuller understanding of the past than either can produce on its own Evolutionary history can stimulate surprising new hypotheses for any field of history and evolutionary biology How many art historians would have guessed that sculpture encouraged the evolution of tuskless elephants How many biologists would

have predicted that human poverty would accelerate animal evolution How many military historians would have suspected that plant evolution would convert a counter insurgency strategy into a rebel subsidy With examples from around the globe this book will help readers see the broadest patterns of history and the details of their own life in a new light      **Gender, Sexuality and Reproduction in Evolutionary Narratives** Venla Oikkonen, 2013-07-18 Since the early 1990s evolutionary psychology has produced widely popular visions of modern men and women as driven by their prehistoric genes In *Gender Sexuality and Reproduction in Evolutionary Narratives* Venla Oikkonen explores the rhetorical appeal of evolutionary psychology by viewing it as part of the Darwinian narrative tradition Refusing to start from the position of dismissing evolutionary psychology as reactionary or scientifically invalid the book examines evolutionary psychologists investments in such contested concepts as teleology and variation The book traces the emergence of evolutionary psychological narratives of gender sexuality and reproduction encompassing Charles Darwin s understanding of transformation and sexual difference Edward O Wilson s evolutionary mythology and the evolution creationism controversy Richard Dawkins molecular agency and new imaging technologies the connections between adultery infertility and homosexuality in adaptationist thought Through popular literary and scientific texts the book identifies both the imaginative potential and the structural weaknesses in evolutionary narratives opening them up for feminist and queer revision This book will be of interest to students and scholars of the humanities and social sciences particularly in gender studies cultural studies literature sexualities and science and technology studies      *The Flexible Phenotype* Theunis Piersma, Jan A. van Gils, 2011 In essence the authors argue for the existence of direct measurable links between phenotype and ecology      **Provocateur** Anthony J. Cortese, 2004-04-19 This updated second edition offers a refined theoretical framework new pedagogical features and expansion of advertising images and their analysis Controversially the second edition highlights preliminary evidence contrary to popular opinion that media sex and violence do not always sell The new edition reviews these and other recent research findings Other updates for this edition include an evaluation of advertisements following the 9 11 terrorist attacks more on media violence and its nexus to youth violence new discussion of the use of advertising in law enforcement introduces the concept hybridizing combinations of two types of advertising many new ads representing cultural changes since the first edition
