Rezvani, 2014-06-26 After nearly six centuries of emergence and world dominance the sovereign state now has a globally widespread competitor that frequently manages to surpass its capabilities in the areas of wealth security and self determination This book will show that in region after region throughout the world partially independent territories including Hong Kong Cayman Islands Kurdistan New Caledonia and others tend to be wealthier and more secure than their sovereign state counterparts Often ignored because of their small size lack of militaries and divided powers the partially independent territories that produce these advantages are responsible for nearly one fifth of global capital flows serve as solutions for some of the world's most intractable nationalistic disputes and furnish important capabilities for sovereign states The existence and capabilities of these polities contradict widely held assumptions of sovereign state pre eminence and give rise to a range of puzzling issues that will be addressed by this book Why do local nationalistically distinct populations accept partially independent unions What guarantees do these polities have that their powers will not be usurped by internal and external adversaries What makes core states which divide and share powers with partially independent territories willing to part with some of their sovereignty amidst fears that their countries will fully fragment What are the prospects for the independence of Scotland Catalonia Puerto Rico and the nearly 50 partially independent territories around the globe This book explains how these polities emerge maintain themselves and sometimes come to an end Economics Imperialism and Interdisciplinarity: Before the Watershed Ben Fine, 2023-10-20 In *Economics Imperialism and Interdisciplinarity Before the Watershed* Ben Fine offers a selection of his key articles charting the rise of economics imperialism Each article is accompanied by a preamble that sets the context in which it appeared with an overall introduction drawing out the overall significance for contemporary scholarship Ranging over mainstream and heterodox economics the disputes between them the relationship between economics and other disciplines and thinkers as diverse as Kuhn Becker and Bourdieu the collection offers a unique and compelling account of how mainstream economics has both changed dramatically whilst its core and narrow principles have remained as sacrosanct as they are invalid The volume is imperative for those engaging in political economy across the social sciences **El-Hi Textbooks in Print**, 1984 Teaching and Facilitating Retreats with Caesar Meg Gorzycki, 2017-10-12 This manual provides educators and retreat facilitators with questions for guided reflection and discussion and with ideas about how to orchestrate conversations based on these reflections The material illuminates some considerations instructors and facilitators may address as they plan for courses and retreats This guide will help instructors and facilitators plan lessons and activities that aim to enrich scholarship critical thinking and

personal spiritual development **In and against Development: From New to Newest Development Economics** Ben Fine, 2025-02-27 The Economics of Everything or Economics Imperialism now has a dominant presence in development economics and an agenda setting role in development studies with the World Bank taking a leading if contested role This volume examines how this happened charting the evolution from the old or classic development economics through the new newer and newest development economics Drawing critically upon the Kuhnian notions of paradigm shifts corresponding changes are contextualised materially intellectually and policy wise Covering key issues such as famine the developmental state and trade and industrial policy detailed attention is paid to the potential for alternatives for economics and economic policies **Anthropology and Politics** Joan Vincent, 1994-09-01 In considering how anthropologists have chosen to look at and write about politics Joan Vincent contends that the anthropological study of politics is itself a historical process Intended not only as a representation but also as a reinterpretation her study arises from questioning accepted views and unexamined assumptions This wide ranging cross disciplinary work is a critical review of the anthropological study of politics in the English speaking world from 1879 to the present a counterpoint of text and context that describes for each of three eras both what anthropologists have said about politics and the national and international events that have shaped their interests and concerns It is also an account of how intellectual social and political conditions influenced the discipline by conditioning both anthropological inquiry and the avenues of research supported by universities and governments Finally it is a study of the politics of anthropology itself examining the survival of theses or schools of thought and the influence of certain individuals and departments *The Cumulative Book Index*, 1979 A world list of books in the English language
