Lipkowitz, Donald B. Boyd, 2003-04-24 Computational chemistry is increasingly used in most areas of molecular science including organic inorganic medicinal biological physical and analytical chemistry Researchers in these fields who do molecular modelling need to understand and stay current with recent developments This volume like those prior to it features chapters by experts in various fields of computational chemistry Two chapters focus on molecular docking one of which relates to drug discovery and cheminformatics and the other to proteomics In addition this volume contains tutorials on spin orbit coupling and cellular automata modeling as well as an extensive bibliography of computational chemistry books FROM REVIEWS OF THE SERIES *Reviews in Computational Chemistry* remains the most valuable reference to methods and techniques in computational chemistry JOURNAL OF MOLECULAR GRAPHICS AND MODELLING One cannot generally do better than to try to find an appropriate article in the highly successful *Reviews in Computational Chemistry* The basic philosophy of the editors seems to be to help the authors produce chapters that are complete accurate clear and accessible to experimentalists in particular and other nonspecialists in general JOURNAL OF THE AMERICAN CHEMICAL SOCIETY *Information Retrieval in Chemistry and Chemical Patent Law* Martin Grayson, 1983 *Sistemas de recuperacao da informacao Quimica Patentes* **National Library of Medicine Programs and Services** National Library of Medicine (U.S.), 1990 **Chemical Information for Chemists** Judith N Currano, Dana L Roth, 2014 A chemical information book aimed specifically at practicing chemists Useful for students in undergraduate and graduate courses it could also be a guide to new information specialists who are facing the challenging diversity of chemical literature **Current Catalog** National Library of Medicine (U.S.), 1979 First multi year cumulation covers six years 1965 70 **Scaffold Hopping in Medicinal Chemistry** Nathan Brown, 2013-11-06 This first systematic treatment of the concept and practice of scaffold hopping shows the tricks of the trade and provides invaluable guidance for the reader's own projects The first section serves as an introduction to the topic by describing the concept of scaffolds their discovery diversity and representation and their importance for finding new chemical entities The following part describes the most common tools and methods for scaffold hopping whether topological shape based or structure based Methods such as CATS Feature Trees Feature Point Pharmacophores FEPOPS and SkelGen are discussed among many others The final part contains three fully documented real world examples of successful drug development projects by scaffold hopping that illustrate the benefits of the approach for medicinal chemistry While most of the case studies are taken from medicinal chemistry chemical and structural biologists will also benefit greatly from the insights presented here *National Library of*
