Revelations Of Divine Being:

Radical Revelation Balázs M. Mezei, 2017-11-30 This volume offers a practical and innovative interpretation of divine revelation from a philosophical theological perspective Balázs M Mezei outlines the most important presuppositions of our notion of divine revelation in a historic and semantic setting as well as elaborating upon the methodology of model analysis He then introduces and analyses the notion of self revelation as the most important modern understanding of divine revelation and presents the notion of apocalyptic personhood as a corollary of radical personhood which is further developed into apocalyptic phenomenology Mezei further examines the remarkable development of some of the most important notions in the history of Christianity along with the homogenous infrastructure of these notions in the very essence of the religion the doctrine of Trinity Covering aspects of revelation from semantics to historical and cognitive origins and engaging with a wide variety of texts including Augustine Thomas Aquinas and Joseph Ratzinger Mezei makes a strong and clear statement when explaining what the radical revelation is how it can be understood and its overall importance **Mystic Treatises by Isaac**

of Niveveh A. J. Wensinck, Mystic Treatises by Isaac of Niveveh **Aha!** William B. Irvine, 2014-12-01 Great ideas often develop gradually after studying a problem at length but not always Sometimes an insight hits like a bolt from the blue For Archimedes clarity struck while he was taking a bath For Gustav Mahler it came as the blades of his oars touched the water And for Albert Einstein it emerged while he was talking to a friend Why do these moments of insight strike so suddenly Why do they so often come to us when we are focused on something completely unrelated And when great ideas come to us where do they come from In Aha The Moments of Insight that Shape Our World philosopher William B Irvine author of A Guide to the Good Life and On Desire explores these epiphanies from the minor insights that strike us all daily to the major realizations that alter the course of history Focusing on aha moments as they take place in five different domains religion morality science math and art Irvine provides case studies that shed light on the different ways epiphanies happen in the different domains and on their differing social impact Along the way he describes some of the great aha moments in history from ancient times to the present day We like to think that our greatest thoughts are the product of our conscious mind Irvine demonstrates though that it is our unconscious mind that is the source of our most significant insights and that the role the conscious mind plays in eliciting these insights is to try unsuccessfully to solve certain problems Only if the conscious mind is willing to do this and thereby experience considerable frustration is the unconscious mind likely to reward it with a breakthrough insight that the conscious mind will then take credit for Irvine explores not only the neuroscience of aha moments but also their personal and social ramifications How does a person respond to having a breakthrough insight that goes against a dominant paradigm And how does the world respond when she shares that insight Irvine shows that in many cases what is most remarkable about those who have had the great insights of human history is not their but their courage and perseverance in fighting for the world to accept those insights Aha is a must read for cognitive scientists

intellectual historians philosophers and anyone who has ever been blown away by the ideas that enlighten us when we least expect it **Arcana Coelestia** Emanuel Swedenborg,1856 The Rise of Mormonism Rodney Stark,2005-10-26 Will Mormonism be the next world faith one that will rival Catholicism Islam and other major religions in terms of numbers and global appeal This was the question Rodney Stark addressed in his much discussed and much debated article The Rise of a New World Faith 1984 one of several essays on Mormonism included in this new collection Examining the religion s growing appeal Rodney Stark concluded that Mormons could number 267 million members by 2080 In what would become known as the Stark argument Stark suggested that the Mormon Church offered contemporary sociologists and historians of religion an opportunity to observe a rare event the birth of a new world religion In the years following that article Stark has become one of the foremost scholars of Mormonism and the sociology of religion This new work the first to collect his influential writings on the Mormon Church includes previously published essays revised and rewritten for this volume His work sheds light on both the growth of Mormonism and on how and why certain religions continue to grow while others fade away Stark examines the reasons behind the spread of Mormonism exploring such factors as cultural continuity with the faiths from which it seeks converts a volunteer missionary force and birth rates He explains why a demanding faith like Mormonism has such broad appeal in today s world and considers the importance of social networks in finding new converts Stark s work also presents groundbreaking perspectives on larger issues in the study of religion including the nature of revelation and the reasons for religious growth in an age of modernization and secularization **The British Controversialist** ,1869
