Revisioning Mens Lives Gender Intimacy And Power:

Revisioning Men's Lives Terry A. Kupers, 1993-03-26 From childhood men are taught to be tough not to cry or act like sissies and perhaps more important to want to win in whatever they do The rules governing men's behavior first learned in the schoolyard change little during the course of a man's life and are inextricably linked with the values that determine how men judge each other and themselves Over the past 20 years however with heightened interest in male psychology and the emergence of the men's movements greater numbers of men have begun to discover the links between traditional male armoring inclinations toward battles for dominance feelings of inadequacy and isolation and the compensatory tendency to oppress women and gays Today while men believe they must still conform to the dictates of the male role it has become increasingly ambiguous what that role is The groundbreaking book REVISIONING MEN'S LIVES seeks to completely reshape our perspectives on manhood and masculinity It explores the important themes of gender intimacy and power in men's lives in an effort to change for the better our notions about what it means to be a man Combining psychological clinical autobiographical sociological and critical discussions the book describes the deeply divided men's movement and critiques the various approaches that different groups have taken Chapters address individual topics such as fathers and sons homophobia friendships pornography and men in therapy throughout personal and clinical experiences bring the myriad issues of masculinity to life The book concludes with a discussion of the influence of power on men's lives Kupers asserts that what men really want is to feel productive successful loved virile and fully alive Yet men also believe that the only way to achieve these goals is to be powerful and they continue to define power in a very traditional one dimensional way as power over others This definition tends to trap men into lives where they will most probably fear dependency compensate for inadequacies by oppressing others and isolate themselves emotionally in order to avoid betraying themselves as weaklings What this book proposes is a redefinition of power that will allow men to feel powerful through non traditional means most especially through positive non oppressive relationships with their families colleagues and friends Once men have relinquished the idea that power can only be attained at the expense of others men and women will be able to work together to construct new notions of masculinity and greatly improved gender relations REVISIONING MEN'S LIVES is essential reading for everyone who wants a greater understanding of the forces shaping men's lives today Carefully documented clinical and personal experiences are presented in a straightforward and engaging style that is accessible to all Social scientists interested in men's women's and family issues emotion self esteem and gender relations will find the book illuminating This is a fine book the kind which allows the reader to feel he has a comrade and a partner in the arduous gender role journey with which we are our male clients are engaged
