Revolutionary Violence and the New Left Alberto Martin Alvarez,Eduardo Rey Tristán,2016-08-05 Leading figures and rising stars in the field present the first contribution explaining the transnational nature of the revolutionary violence of the New Left Focusing on the processes of dissemination of ideologies and mobilization of ideas and repertoires of action among the revolutionary organizations of the New Left in Latin America Europe and the United States this book contributes to our understanding of the dynamics of the New Left wave and at the same time helps explain the why of the emergence of very similar armed leftist groups in vastly different geographical and political contexts [Geography and Revolution](#) David N. Livingstone,Charles W. J. Withers,2010-08-15 A term with myriad associations revolution is commonly understood in its intellectual historical and sociopolitical contexts Until now almost no attention has been paid to revolution and questions of geography Geography and Revolution examines the ways that place and space matter in a variety of revolutionary situations David N Livingstone and Charles W J Withers assemble a set of essays that are themselves revolutionary in uncovering not only the geography of revolutions but the role of geography in revolutions Here scientific revolutions Copernican Newtonian and Darwinian ordinarily thought of as placeless are revealed to be rooted in specific sites and spaces Technical revolutions the advent of print time keeping and photography emerge as inventions that transformed the world s order without homogenizing it Political revolutions in France England Germany and the United States are notable for their debates on the nature of political institutions and national identity Gathering insight from geographers historians and historians of science Geography and Revolution is an invitation to take the where as seriously as the who and the when in examining the nature shape and location of revolutions [Negotiated Revolutions](#) George Lawson,2017-03-02 Straightforward histories of post revolution States have all too often failed to provide sufficient context to rescue revolution

both as concept and practice from the misplaced triumphalism of the contemporary world In *Negotiated Revolutions* George Lawson marks a definitive departure in the study of radical political and socio economic change presenting a unique comparative analysis of three transformations from authoritarian rule to market democracy Through the lens of international sociology the book critically considers the large scale processes of social and political revolution bringing three apparently distinct transformations from seemingly disparate authoritarian regimes and geographies under a common rubric With unique and novel conceptual analysis the book accurately locates both the potential and actuality of radical change in contemporary world affairs processes usually mistakenly subsumed under the general framework of transitology *Trust, Politics and Revolution* Francesca Granelli, 2019-12-04 Tracing the relationships and networks of trust in Western European revolutionary situations from the Ancient Greeks to the French Revolution and beyond Francesca Granelli here shows the essential role of trust in both revolution and government arguing that without trust both governments and revolutionary movements are liable to fail The first study to combine the importance of trust and the significance of revolution this book offers a new lens through which to interpret revolution in an essential work book for all scholars of political science and historians of revolution
