Zipperstein, 2006 The author of *The Dybbuk* Shloyme Zanol Rappoport known as An sky 1863 1920 was a figure of immense versatility and also ambiguity in Russian and Jewish intellectual literary and political spheres Drawing together leading historians ethnographers literary scholars and others this far ranging multi disciplinary examination of An sky is the fullest ever produced **A Guide to American Defenders of Land, Sea & Sky** Patricia A. Bonner, 1996 **i in the sky** Alison Scammell, 2023-04-28 i in the sky is a collection of essays by over 40 experts including leading writers Charles Handy and Don Tapscott giving their personal vision of the future of information Information here is given its widest meaning and includes such subjects as the Internet electronic commerce cybernetics robotics artificial intelligence and even computers as fashion accessories Information as a phenomenon pervades all areas of life and its evolution has consequences for everyone Many of the papers have central themes such as the future of computer intelligence library and information services interactive Internet marketing and networked learning in higher education One paper links the technology enabling remote and online communication to the deconstruction of the corporation and the rise of flexible working Professor Kevin Warwick writes about cybernetics and artificial intelligence and describes an experiment involving a surgically implanted computer chip in his arm Other papers deal with scholarly communication smart houses and intelligent appliances Two of the chapters are written as fiction one by contemporary fantasy writer Lise Leroux who paints a menacing vision of human error in a tale of virtual reality **How We See the Sky** Thomas Hockey, 2024-05-31 Gazing up at the heavens from our backyards or a nearby field most of us see an undifferentiated mess of stars if that is we can see anything at all through the glow of light pollution Today s casual observer knows far less about the sky than did our ancestors who depended on the sun and the moon to tell them the time and on the stars to guide them through the seas Nowadays we don t need the sky which is good because we ve made it far less accessible hiding it behind the skyscrapers and the excessive artificial light of our cities How We See the Sky gives us back our knowledge of the sky offering a fascinating overview of what can be seen there without the aid of a telescope Thomas Hockey begins by scanning the horizon explaining how the visible universe rotates through this horizon as night turns to day and season to season Subsequent chapters explore the sun s and moon s respective motions through the celestial globe as well as the appearance of solstices eclipses and planets and how these are accounted for in different kinds of calendars In every chapter Hockey introduces the common vocabulary of today s astronomers uses examples past and present to explain them and provides conceptual tools to help newcomers understand the topics he discusses Packed with illustrations and enlivened by historical anecdotes and literary references How We See the Sky reacquaints us with the wonders to be found in our own backyards **Dreams of Earth and Sky** Freeman Dyson, 2015-04-21 In this sequel to *The Scientist as Rebel* 2006 Freeman Dyson whom *The Times* of London calls one of the world s most original minds celebrates

openness to unconventional ideas and the spirit of joyful dreaming in which he believes that science should be pursued Throughout these essays which range from the creation of the Royal Society in the seventeenth century to the scientific inquiries of the Romantic generation to recent books by Daniel Kahneman and Malcolm Gladwell he seeks to break down the barriers that separate science from other sources of human wisdom Dyson discusses twentieth century giants of physics such as Richard Feynman J Robert Oppenheimer Paul Dirac and Steven Weinberg many of whom he knew personally as well as Winston Churchill s pursuit of nuclear weapons for Britain and Wernher von Braun s pursuit of rockets for space travel And he takes a provocative often politically incorrect approach to some of today s most controversial scientific issues global warming the current calculations of which he thinks are probably wrong the future of biotechnology which he expects to dominate our lives in the next half century as the tools to design new living creatures become available to everyone and the flood of information in the digital age Dyson offers fresh perspectives on the history the philosophy and the practice of scientific inquiry and even on the blunders the wild guesses and wrong theories that are also part of our struggle to understand the wonders of the natural world

The Mathematics of the Sky Charles J. Burton,1920

How High the Sky? Thomas Gangale,2018-11-26 In How High the Sky jurist Thomas Gangale explores the oldest and most important controversy in space law how far up does national airspace go and where does the international environment of outer space begin Even though nations did not object to the first satellites flying over their sovereign territory after more than six decades there is still no international agreement on how low the right of space object overflight extends nor are there agreed legal definitions of space object and space activity Dr Gangale brings his background as an aerospace engineer to bear in exploding long held beliefs of the legal community and he offers a draft international convention to settle the oldest and most intractable problems in space law

We Are Not Able to Live in the Sky Mara Kardas-Nelson,2024-06-11 Shortlisted for the J Anthony Lukas Prize A deeply reported work of journalism that explores the promises and perils of microfinance told through the eyes of international lenders and women borrowers in West Africa In the mid 1970s Muhammad Yunus an American trained Bangladeshi economist met a poor female stool maker who needed money to expand her business In an act widely known as the beginning of microfinance Yunus lent 27 to forty two women hoping small credit would help the women pull themselves out of poverty Soon Yunus s Grameen Bank was born and the idea of giving very small high interest loans to poor people took off In 2006 Yunus and the Grameen Bank won the Nobel Peace Prize for efforts to create economic and social development from below But there s a problem with this story There are mounting concerns that these small loans are as likely to bury poor people in debt as they are to pull them from poverty with borrowers from India to Kenya facing consequences such as jail time and forced land sales Reportedly hundreds have even committed suicide What happened Did microfinance take a wrong turn or was it flawed from the beginning Mara Kardas

Nelson's *We Are Not Able to Live in the Sky* is about unintended consequences, blind optimism, and the decades-long ramifications of seemingly small policy choices. The book is rooted in the stories of women borrowers in Sierra Leone, West Africa. Their narratives, woven through a deep history of modern international development, are set against the rise of Yunus's vision that tiny loans would put poverty in museums. Kardas Nelson asks: What is missed with a single financially focused solution to global inequity that ignores the real drivers of poverty? Who stands to benefit, and more important, who gets left behind?
