passionate about watching for meteors in the night sky left a major impact on the field In addition to describing Olivier s career and describing his struggles with competitive colleagues in a hostile scientific climate the author provides biographies of some of the scores of women and men of all ages who aided Olivier in making shower observations from the Leonids and Perseids and others Half of these amateur volunteers were from 13 to 25 years of age Their work allowed Olivier and the AMS to contradict the fallacious belief in stationary and long enduring meteor showers bringing the theory of their origin into alignment with celestial mechanics Thanks to Olivier and his collaborators the study of meteors took a great leap forward in the twentieth century to earn a place as a worthy topic of study among professional astronomers
