Kourany, 2010-09-09 In this monograph Janet A Kourany argues for a philosophy of science more socially engaged and socially responsible than the philosophy of science we have now The central questions feminist scientists philosophers and historians have been raising about science during the last three decades form Kourany's point of departure and her response to these questions builds on their insights This way of approaching science differs from mainstream philosophy of science in two crucial respects it locates science within its wider societal context rather than treating science as if it existed in a social political and economic vacuum and it points the way to a more comprehensive understanding of scientific rationality one that integrates the ethical with the epistemic Kourany

other Whilst philosophy of physics pushed confidently ahead the philosophy of biology languished In the past decade however things have changed dramatically A number of energetic and thoughtful young philosophers have made real efforts to master the outlines and details of contemporary biology They have shown that many stimulating problems emerge when analytic skills are turned towards the life sciences particularly if one does not feel constrained to stay only with theoretical parts of biology but can range over to more medical parts of the spectrum At the same time biology itself has had one of the most fruitful yet turbulent periods in its whole history and more and more biologists have grown to see that many of the problems they face take them beyond the narrow confines of empirical science a broader perspective is needed
