Sexuality Of Latinas:

Latina/o Sexualities Marysol Asencio, 2009-10-26 Latina/os are currently the largest minority population in the United States. They are also one of the fastest growing. Yet we have very limited research and understanding of their sexualities. Instead stereotypical images flourish even though scholars have challenged the validity and narrowness of these images and the lack of attention to the larger social context. Gathering the latest empirical work in the social and behavioral sciences, this reader offers us a critical lens through which to understand these images and the social context framing Latina/os and their sexualities. Situated at the juncture of Latina/o studies and sexualities studies, *Latina/o Sexualities* provides a single resource that addresses the current state of knowledge from a multidisciplinary perspective. Contributors synthesize and critique the literature and carve a separate space where issues of Latina/o sexualities can be explored given the limitations of prevalent research models. This work compels the current wave in sexuality studies to be more inclusive of ethnic minorities and sets an agenda that policy makers and researchers will find invaluable. *The Sexuality of Latinas* Norma Alarcón, Ana Castillo, Cherríe Moraga, 1993

Robert T. Francoeur, Patricia Koch, David Weis, 1999-08-01 Now available in a new paperback edition, this survey is different in both breadth and scope from all other reports on sexuality in the United States. It covers every topic imaginable from a multicultural point of view in order to reflect fully the complex society in which we live: the biological, psychological, social, and spiritual aspects of our sexual lives. **Latinas/os in the United States** Havidan Rodriguez, Rogelio Saenz, Cecilia Menjivar, 2007-11-21

As is befitting a book on Latinas/os at the start of the 21st century, the chapters in this volume reflect the contemporary panorama of Latinas/os in the United States. Today Latinas/os are the largest minority group. They accounted for 12.5% of the total U.S. population in the last decennial census. Recent estimates show the Hispanic population to be 41.3 million as of July 1, 2004, or 14% of the nation's total population. However, this estimate does not include the 3.9 million residents of Puerto Rico who are also U.S. citizens and would raise the total to 24.52 million. This

would make the U S population of Latinos the second largest Spanish origin population in the hemisphere after Mexico The growth of this population since 1980 has been dramatic Hispanics Latinos grew more than seven times faster than the population of the nation as a whole increasing by half whereas the white non Hispanic population increased by only 6% between 1980 and 1990 U S Bureau of the Census 1991 Table 1 U S Bureau of the Census 1993 p 2 In the 1990s the Hispanic population increased 58% Moreover between 2003 and 2004 one of every two people added to the nation's population was Hispanic Latino Consequently not only are Latinos a substantial part of the U S population but they account for half its population growth
