Impacts of Military Spending on Economic Growth Reyes Ruiz, Gerardo, 2025-08-12 Military spending is continually debated in relation to its impact on economic growth Proponents argue that defense spending increases economic activity by creating jobs driving technological innovation and boosting demand in industries Critics cite excessive military spending diverts resources away from critical sectors like healthcare education and infrastructure potentially hindering long term economic development The actual impact often depends on a country's economic structure level of development and efficiency in allocating defense resources Understanding the relationship between military spending and economic growth is crucial for policymakers aiming to strike a balance between national security and sustainable economic progress Impacts of Military Spending on Economic Growth explores how regional economic growth is affected by military defense and security spending as well as the causes benefits and strategies associated with economic development It examines current issues challenges and variables for the creation of new economic models and theories to strengthen available knowledge and research This book covers topics such as human capital national security and econometric models and is a useful resource for business owners military members economists government professionals academicians researchers and political scientists

Strategic Safety Management in Construction and Engineering Patrick X. W. Zou, Riza Yosia Sunindijo, 2015-03-26 Although the construction and engineering sector makes important contributions to the economic social and environmental objectives of a nation it has a notorious reputation for being an unsafe industry in which to work Despite the fact that safety performance in the industry has improved injuries and fatalities still occur frequently To address this the industry needs to evolve further by integrating safety into all decision making processes Strategic Safety Management in Construction and Engineering takes a broad view of safety from a strategic decision making and management perspective with a particular focus on the need to balance and integrate science and art when implementing safety management The principles covered here include the economics of safety safety climate and culture skills for safety safety training and learning safety in design risk management building information modelling and safety research methods and the research practice nexus They are integrated into a strategic safety management framework which comprises strategy development implementation and evaluation Practical techniques are included to apply the principles in the context of the construction and engineering industry and projects Case studies are also provided to demonstrate the localised context and applications of the principles and techniques in practice

Work Behavior of the World's Poor Mohammed Sharif, 2018-02-06 This title was first published in 2003 The working poor of the world are observed to engage in long hours in hard jobs and to work more if wages are further reduced Mainstream economics brushes off this tendency to increase labour supply as wages fall as perverse because it does not fit the conventional wisdom and tries to explain it as a result of subsistence mentality limited aspiration or target income behaviour of the poor This however ignores the observed fact that the poor work long hard hours but most of the time fail to meet their minimum needs of subsistence and live impoverished lives in absolute poverty deficient of both food and physical rest This book postulates that the observed behaviour is the result of economic distress the working poor suffer and analyses it as a rational behaviour using the conventional utility maximization framework and derives both theoretical and empirical results consistent with the observation This book aims to correct a serious misconception persisting in the literature relating to the working poor labour supply behaviour that is almost universally observed It also goes onto

develop using the supply function a methodology to determine the standard of subsistence income and physical rest for the worker

Ciappei, Giacomo Mininni, 2025-03-25 This book aims to draft a viable path for establishing a business ethics model based on the wisdom traditions of nine of the world's great religions: Judaism, Christianity, Islam, Hinduism, Buddhism, Taoism, Confucianism, Zoroastrianism, and Animism. In light of the failure of many models based on various philosophies, we turn to the only cultural and anthropological realities that have proven to withstand the test of time and move the consciences of billions of people throughout history: religions. By exploring sacred texts and wisdom traditions, we investigate how religions contribute to the ongoing ethical debate in business environments with the aim of sparking academic and public interest in the potential of establishing a truly effective religion-based business ethics model.
