**Qualitative Research in Counselling and Psychotherapy** John McLeod, 2001 A new book by John McLeod is always a treat and like good qualitative research takes the reader by surprise and shows him or her something new The revelation to me in this book is its focus on philosophy rather than psychology and on John's insistence that qualitative research is rooted in a mixture of phenomenology and hermeneutics Those of us engaged in qualitative research are challenged to underpin our work with a deeper awareness of relevant philosophy with Chapters 2, 3 and 4 offering a good starting point This book might not be seen then as being for the novice researcher who in any case would be best advised to start with one of John's earlier books *Doing Counselling Research* SAGE 1994 or *Practitioner Research in Counselling* SAGE 1999 However many parts of this book are essential reading for those beginning qualitative research The first half of Chapter 9 for example *How to Do Qualitative Research* is rich material as is Chapter 6 which explores grounded theory referred to by John as the 2<sup>nd</sup> market leader<sup>2</sup> in qualitative research Chapter 10 takes a critical stance on randomized controlled trials before arguing the case for using qualitative outcomes measures Qualitative interviews appear to be at present the most sensitive method for the evaluation of the harmful effects of therapy and also for recording its greatest successes The standardized self-report methods used in randomized trials appear both to inhibit criticism of therapists and reporting of deterioration and also give little scope for clients to describe the hugely positive transformational experiences that can sometimes take place in counselling This book deeply addresses what it means to do qualitative research into counselling and psychotherapy with plenty for the novice researcher and even more for those already deeply immersed in qualitative research William West *Counselling and Psychotherapy Research* Qualitative methods are particularly suited to answering the kinds of questions that counsellors and psychotherapists need to ask about their practice *Qualitative Research in Counselling and Psychotherapy* has therefore been written to help researchers find their way through the range of methodologies and techniques available to them Leading expert and bestselling author John McLeod takes the reader through each stage of the research process explaining techniques for gathering data writing up the study and evaluating the findings Each qualitative method is clearly described and critically assessed in terms of its own strengths and weaknesses Examples from actual research studies are given to show how the methods work in practice The need to show how and why counselling works has led to an explosion of research activity For all those involved in research whether as part of academic study or in practice this book will be essential reading As an introduction to qualitative methods this it is certain to be widely recommended on courses in counselling and counselling psychology and will also be of interest to those who provide counselling in other professional areas such as nursing and social work

Developmental Research Methods Scott A. Miller, 2007 Exploring every step in the research process this book covers issues in experimental design as well as procedural skills necessary to translate design into research and provides up to date discussion on topics such as

attachment and theory of mind

**Research Methods in Education** Louis Cohen, Lawrence Manion, Keith

Morrison, 2013-03-07 This rewritten expanded and updated 7th edition of the long running bestseller Research Methods in Education encompasses the whole range of methods currently employed by educational research at all stages. It offers plentiful and rich practical advice underpinned by clear theoretical foundations, research evidence and up to date references. Chapters new to this edition cover Causation, critical educational research, evaluation and the politics of research, including material on cross cultural research, mixed methods and participatory research. Choosing and planning a research project including material on sampling, research questions, literature reviews and ethical issues. Meta analysis, research syntheses and systematic reviews. Virtual worlds and internet research. Using and analysing visual media and data in educational research. Organizing and presenting qualitative data: content analysis, coding and computer analysis, themes, narratives, conversations and discourses, grounded theory. Understanding and choosing statistical tests: descriptive and inferential statistics, multi dimensional measurement and factor analysis. Research Methods in Education is essential reading for both the professional researcher and students of education at undergraduate and postgraduate level who need to understand how to plan, conduct, analyse and use research. The textbook is accompanied by a website [www.routledge.com/textbooks/cohen7e](http://www.routledge.com/textbooks/cohen7e).
