Shadow Of The Plantation:

Shadow of the Plantation Charles Spurgeon Johnson, 1996-01-01 A survey of African American life in the South after slavery was abolished and before the civil rights movement

Shadow of the Plantation Charles Johnson, 2018-04-24

Shadow of the Plantation focuses on descendants of slaves in one rural Southern community in the early part of this century. In the process Johnson reviews the troubled history of race relations in the United States. When reread half a century after it was first written *Shadow of the Plantation* is clearly revealed as a remarkably perceptive and fresh comment on race relations and the triumph of individuals over circumstances. Charles Johnson's book is significant for its use of multiple methodologies. The research took place in an ecological setting that was a dynamic element of the life of the community. The book is a multifaceted interpretive survey of the 612 black families that composed the rural community of Macon County, Alabama, in the late 1920s and early 1930s. Johnson describes and analyzes their families' economic situation, education, religious activities, recreational life, and health practices. *Shadow of the Plantation* manages to be both historically accurate and foresighted at the same time. It is as much a book about today as it is a discussion of yesterday. This volume is an important study that will be of value to sociologists, anthropologists, and black studies specialists.

In the Shadow of the Plantation Alvin O. Thompson, 2002 Examines the Caribbean experience from slavery through to the post-independence period. Divided into 4 broad thematic areas, the articles demonstrate the impact of colonialism and the plantation system on Caribbean life and highlight the efforts that Caribbean peoples have made to uplift themselves from the trammels of colonialism.

Reassessing the 1930s South Karen Cox, Sarah Gardner, 2018-05-18 Much of American popular culture depicts the 1930s South either as home to a population that was intellectually, morally, and physically stunted or as a romantic, sentimentalized haven untouched by the nation's financial troubles. Though these images stand as polar opposites, each casts the South as an exceptional region that stood separate from American norms. *Reassessing the 1930s South* brings

together historians art critics and literary scholars to provide a new social and cultural history of the Great Depression South that moves beyond common stereotypes of the region Essays by Steven Knepper Anthony J Stanonis and Bryan A Giemza delve into the literary culture of the 1930s South and the multiple ways authors such as Sterling Brown Tennessee Williams and E P O Donnell represented the region to outsiders Lisa Dorrell and Robert W Haynes explore connections between artists and the South in essays on New Deal murals and southern dramatists on Broadway Rejecting traditional views of southern resistance to modernization Douglas E Thompson and Ted Atkinson survey the cultural impacts of technological advancement and industrialization Emily Senefeld Scott L Matthews Rebecca Sharpless and Melissa Walker compare public representations of the South in the 1930s to the circumstances of everyday life Finally Ella Howard Nicholas Roland and Robert Hunt Ferguson examine the ways southern governments and activists shaped racial perceptions and realities in Georgia Texas and Tennessee Reassessing the 1930s South provides an interpretation that focuses on the region s embrace of technological innovation promotion of government sponsored programs of modernization rejection of the plantation legend of the late nineteenth century and experimentation with unionism and interracialism Taken collectively these essays provide a better understanding of the region s identity both real and perceived as well as how southerners grappled with modernity during a decade of uncertainty and economic hardship

Tuskegee's Truths Susan M. Reverby,2012-12-01

Between 1932 and 1972 approximately six hundred African American men in Alabama served as unwitting guinea pigs in what is now considered one of the worst examples of arrogance racism and duplicity in American medical research the Tuskegee syphilis study Told they were being treated for bad blood the nearly four hundred men with late stage syphilis and two hundred disease free men who served as controls were kept away from appropriate treatment and plied instead with placebos nursing visits and the promise of decent burials Despite the publication of more than a dozen reports in respected medical and public health journals the study continued for forty years until extensive media coverage finally brought the experiment to wider public knowledge and forced its end This edited volume gathers articles contemporary newspaper accounts selections from reports and letters reconsiderations of the study by many of its principal actors and works of fiction drama and poetry to tell the Tuskegee story as never before Together these pieces illuminate the ethical issues at play from a remarkable breadth of perspectives and offer an unparalleled look at how the study has been understood over time

Slavery and Its Aftermath

Peter I. Rose, Captivating Technology Ruha Benjamin,2019-06-07 The contributors to Captivating Technology examine how carceral technologies such as electronic ankle monitors and predictive policing algorithms are being deployed to classify and coerce specific populations and whether these innovations can be appropriated and reimagined for more liberatory ends

Leisure, Plantations, and the Making of a New South Julia Brock, Daniel Vivian, 2015-10-01 *Leisure Plantations and the Making of New South* investigates the social architectural and environmental history of sporting plantations in the South Carolina lowcountry and the Red Hills region of southeast Georgia and northern Florida. Although plantations figure prominently in histories of the post emancipation South, historians have paid little attention to the redevelopment of plantations for non agricultural use. By examining the two largest concentrations of sporting plantations on the south Atlantic coast, this collection explores questions about historical memory of slavery, race relations, material culture, and the environment during the first half of the twentieth century. **My Work Is That of Conservation** Mark D.

Hersey, 2011-05-01 George Washington Carver ca. 1864-1943 is at once one of the most familiar and misunderstood figures in American history. In *My Work Is That of Conservation*, Mark D. Hersey reveals the life and work of this fascinating man who is widely and reductively known as the African American scientist who developed a wide variety of uses for the peanut. Carver had a truly prolific career dedicated to studying the ways in which people ought to interact with the natural world; yet much of his work has been largely forgotten. Hersey rectifies this by tracing the evolution of Carver's agricultural and environmental thought, starting with his childhood in Missouri and Kansas and his education at the Iowa Agricultural College. Carver's environmental vision came into focus when he moved to the Tuskegee Institute in Macon County, Alabama, where his sensibilities and training collided with the denuded agrosystems, deep poverty, and institutional racism of the Black Belt. It was there that Carver realized his most profound agricultural thinking as his efforts to improve the lot of the area's poorest farmers forced him to adjust his conception of scientific agriculture. Hersey shows that in the hands of pioneers like Carver, Progressive Era agronomy was actually considerably greener than is often thought today. *My Work Is That of Conservation* uses Carver's life story to explore aspects of southern environmental history and to place this important scientist within the early conservation movement.

Driven to the Field David A. Davis, 2023-02-21 *Driven to the Field* traces the culture of sharecropping, crucial to understanding life in the southern United States from Emancipation to the twenty-first century. By reading dozens of works of literature in their historical context, David A. Davis demonstrates how sharecropping emerged, endured for a century, and continues to resonate in American culture. Following the end of slavery, sharecropping initially served as an expedient solution to a practical problem, but it quickly developed into an entrenched power structure situated between slavery and freedom that exploited the labor of Blacks and poor whites to produce agricultural commodities. Sharecropping was the economic linchpin in the South's social structure, and the region's political system, race relations, and cultural practices were inextricably linked with this peculiar form of tenant farming from the end of the Civil War through the civil rights movement. *Driven to the Field* analyzes literary portrayals of this system to explain how it defined the culture of the South, revealing multiple genres of literature that depicted sharecropping, such as cotton romances, agricultural uplift novels, proletarian sharecropper fiction, and sharecropper autobiographies, important works of American literature that have

never before been evaluated and discussed in their proper context Americans from Africa Peter I. Rose, 2016-03-23

Americans from Africa seeks to convey varying perspectives on the Black Experience in the United States and its controversial history This volume *Slavery and Its Aftermath* deals with four major issues the extent of African influences on the lives of those enslaved and brought to America beginning with an essay on Africanisms in Everyday Life by Melville J Herskovits the impact of slavery on personality and social structure sometimes called The Elkins Debate similarities and differences in life for African Americans in the South and in the North and matters of community class and family including the full text of the Moynihan Report and several pointed critiques In addition to the commentaries by and on the works of Herskovits Elkins and Daniel Patrick Moynihan other contributors to Volume I include Kenneth B Clark Mina Caulfield Davis E Franklin Edwards Eugene Genovese Ulf Hannerz Charles S Johnson Leroi Jones and Charles Keil The second volume *Old Memories New Moods* contains essays on the roots of black protest the background and character of the Civil Rights Movement interpretations of the impact and significance of Black Power and varied views on changing self images of being African American *Lost Delta Found* John W Work, Lewis Wade Jones, Samuel C Adams, 2020-05-15 Blues Hall of Fame Inductee Named a Classic of Blues Literature by the Blues Foundation 2019 This remarkable book recovers three invaluable perspectives long thought to have been lost on the culture and music of the Mississippi Delta In 1941 and 42 African American scholars from Fisk University among them the noted composer and musicologist John W Work III sociologist Lewis Wade Jones and graduate student Samuel C Adams Jr joined folklorist Alan Lomax of the Library of Congress on research trips to Coahoma County Mississippi Their mission was to document adequately the cultural and social backgrounds for music in the community Among the fruits of the project were the earliest recordings by the legendary blues singer and guitarist Muddy Waters The hallmark of the study was to have been a joint publication of its findings by Fisk and the Library of Congress While this publication was never completed *Lost Delta Found* is composed of the writings interviews notes and musical transcriptions produced by Work Jones and Adams in the Coahoma County study Their work captures with compelling immediacy a place a people a way of life and a set of rich musical traditions as they existed in the 1940s Illustrated with photos and more than 160 musical transcriptions Psychology and Selfhood in the Segregated South Anne C. Rose, 2009-06-15 In the American South at the turn of the twentieth century the legal segregation of the races and psychological sciences focused on selfhood emerged simultaneously The two developments presented conflicting views of human nature American psychiatry and psychology were optimistic about personality growth guided by the new mental sciences Segregation in contrast placed racial traits said to be natural and fixed at the forefront of identity In a society built on racial differences raising questions about human potential as psychology did was unsettling As Anne Rose lays out with sophistication and nuance the introduction of psychological thinking into the Jim Crow South produced neither a clear victory for racial equality nor a single minded defense of traditional ways Instead professionals of both races treated the mind set of

segregation as a hazardous subject Psychology and Selfhood in the Segregated South examines the tensions stirred by mental science and restrained by southern custom Rose highlights the role of southern black intellectuals who embraced psychological theories as an instrument of reform their white counterparts who proved wary of examining the mind and northerners eager to change the South by means of science She argues that although psychology and psychiatry took root as academic disciplines all these practitioners were reluctant to turn the sciences of the mind to the subject of race relations
