The Last Fish Swimming Gohar A. Petrossian,2019-05-17 This book examines the global local and specific environmental factors that facilitate illegal

fishing and proposes effective ways to reduce the opportunities and incentives that threaten the existence of the world's fish. Humans are deeply dependent on fishing globally; fish comprise 15 percent of the protein intake for approximately 3 billion people, and 8 percent of the global population depends on the fishing industry as their livelihood. The global fishing industry is plagued by illegal fishing, however, and many highly commercial species such as cod, tuna, orange roughy, and swordfish are extremely vulnerable. Through criminological analysis, *The Last Fish Swimming* emphasizes the importance of looking at specific environmental factors that make illegal fishing possible. It examines such factors as proximity to known ports where illegally caught fish can be landed without inspection, i.e., ports of convenience, fisheries monitoring, control, and surveillance efforts, formal surveillance, and resource attractiveness in 53 countries that altogether represent 96 percent of the world's fish catch. The book calls upon the global community to address the illegal depletion of the world's fish stock and other similar threats to the world's food supply and natural environment in order to ensure the sustainability of the planet's fish and continuation of the legal fishing industry for generations to come.

Discards in the World's Marine Fisheries

Kieran Kelleher, Food and Agriculture Organization of the United Nations, 2005-01-01. This publication gives an updated review of the quantity of discards in the world's marine fisheries using information from a broad range of fisheries in all continents. A number of policy issues are discussed, including a no discards approach to fisheries management, the need for balance between bycatch reduction and bycatch utilisation initiatives, and concerns arising from incidental catches of marine mammals, birds, and reptiles. The report also highlights the need for more robust methods of estimating discards and the development of bycatch management plans. *Report of the FAO/FFA Regional Workshop to Promote the Full and Effective Implementation of Port State Measures to Combat Illegal, Unreported and Unregulated Fishing, Nadi, Fiji, 28 August-1 September 2006*. Food and Agriculture Organization of the United Nations, 2007-01-01. The aim of the workshop was to develop national capacity and promote regional co-ordination to strengthen and harmonise port State measures and meet the requirements of relevant FAO plans of action to combat illegal, unreported, and unregulated IUU fishing. Topics addressed include the role of the port State in combating IUU fishing and promoting long-term sustainability in fisheries, the FAO Model Scheme, international developments, issues relating to port State measures at the regional level, regional issues and priorities of the Pacific Islands Forum Fisheries Agency (FFA).

Sharks of the Open Ocean Merry D.

Camhi, Ellen K. Pikitch, Elizabeth A. Babcock, 2009-01-21. This important and exciting title represents the first authoritative volume focussed on pelagic open ocean sharks as a group. Virtually every pelagic shark expert in the world has contributed to this landmark publication, which includes the latest data and knowledge on pelagic shark biology, fisheries management, and conservation. Pelagic sharks face unprecedented levels of exploitation in all the world's oceans through both direct fisheries and bycatch, and effective management for these species is contingent upon solid science and data, which this book brings together for the first time. All those involved in shark biology will need to have a copy of this book.
