Longman Companion to the Formation of the European Empires, 1488-1920 Muriel E. Chamberlain, 2014-06-11 The European empires as they existed from the Age of Discovery until after the First World War shaped the modern world So great has been their political economic and cultural influence that to fully understand contemporary history and events it is essential to have an understanding of the imperial past This book is an impressive achievement It brings together in one comprehensive volume all the essential facts and figures relating to the process of empire building by the European powers It complements the Longman Companion to European Decolonisation in the Twentieth Century by the same author together they help to explain why different empires had different philosophies dissolved in different ways and left different legacies

Conspiracy U Scott A. Shay, 2021-10-05 In Conspiracy U Shay presents a case study of his alma mater Northwestern University in order to challenge the proliferation of anti Zionist conspiracy theories championed on college campuses by both the far right and far left Shay tackles the thorny question of how otherwise brilliant minds willingly come to embrace and espouse such patent falsehoods He explains why Zionism the movement for Jewish national self determination has become the focal point for both far right and far left conspiracy theories His keen analysis reveals why Jews serve as the canary in the coal mine Conspiracy U delivers an urgent wake up call for everyone who cares about the future of civil society and is concerned that universities today are failing at teaching students how to strive for truth but rather guiding students to blindly trust theories driven by ideology The book provides a roadmap for reform based on universal moral and intellectual standards and offers a way out of the culture wars that are ripping America apart **The Best Books for Academic**
