Closs,1986 There is no question that native cultures in the New World exhibit many forms of mathematical development This Native American mathematics can best be described by considering the nature of the concepts found in a variety of individual New World cultures Unlike modern mathematics in which numbers and concepts are expressed in a universal mathematical notation the numbers and concepts found in native cultures occur and are expressed in many distinctive ways Native American Mathematics edited by Michael P Closs is the first book to focus on mathematical development indigenous to the New World Spanning time from the prehistoric to the present the thirteen essays in this volume attest to the variety of mathematical development present in the Americas The data are drawn from cultures as diverse as the Ojibway the Inuit Eskimo and the Nootka in the north the Chumash of Southern California the Aztec and the Maya in Mesoamerica and the Inca and Jibaro of South America Among the strengths of this collection are this diversity and the multidisciplinary approaches employed to extract different kinds of information The distinguished contributors include mathematicians linguists psychologists anthropologists and archaeologists Rigorous Mathematical Thinking James T. Kinard,Alex Kozulin,2008-06-02 This book demonstrates how rigorous mathematical thinking can be fostered through the development of students cognitive tools and operations This approach seems to be particularly effective with socially disadvantaged and culturally different students The authors argue that children s cognitive functions cannot be viewed as following a natural maturational path they should be actively constructed during the educational process The Rigorous Mathematical Thinking RMT model is based on two major theoretical approaches Vygotsky s theory of psychological tools and Feuerstein s concept of mediated learning experience The book starts with general cognitive tools that are essential for all types of problem solving and then moves to mathematically specific cognitive tools and methods for utilizing these tools for mathematical

conceptual formation The application of the RMT model in various urban classrooms demonstrates how mathematics education standards can be reached even by the students with a history of educational failure who were considered hopeless underachievers *Adults' Mathematical Thinking and Emotions* Jeff Evans,2002-01-04 The crisis around teaching and learning of mathematics and its use in everyday life and work relate to a number of issues These include The doubtful transferability of school maths to real life contexts the declining participation in A level and higher education maths courses the apparent exclusion of some groups such as women and the aversion of many people to maths This book addresses these issues by considering a number of key problems in maths education and numeracy differences among social groups especially those related to gender and social class the inseparability of cognition and emotion in mathematical activity the understanding of maths anxiety in traditional psychological psychoanalytical and feminist theories how adults numerate thinking and performance must be understood in context The author s findings have practical applications in education and training such as clarifying problems of the transfer of learning and of countering maths anxiety *Special and Gifted Education: Concepts, Methodologies, Tools, and Applications* Management Association, Information Resources,2016-04-25 Diverse learners with exceptional needs require a specialized curriculum that will help them to develop socially and intellectually in a way that traditional pedagogical practice is unable to fulfill As educational technologies and theoretical approaches to learning continue to advance so do the opportunities for exceptional children Special and Gifted Education Concepts Methodologies Tools and Applications is an exhaustive compilation of emerging research theoretical concepts and real world examples of the ways in which the education of special needs and exceptional children is evolving Emphasizing pedagogical innovation and new ways of looking at contemporary educational practice this multi volume reference work is ideal for inclusion in academic libraries for use by pre service and in service teachers graduate level students researchers and educational software designers and developers *Daily Math Practice for Fourth Grade (Week 8)* Jodene Smith,2014-01-01 This week of practice pages build fourth graders mathematical fluency Each problem is tied to a specific mathematical concept Daily practice through these quick activities will help your young mathematicians Great formative assessment tool
