Homework Books and a free Teacher s Resource *International Perspectives on Gender and Mathematics Education* Olof Steinthorsdottir,Helen J. Forgasz,Joanne Rossi Becker,Kyeonghwa Lee,2010-06-01 Why a book on gender issues in mathematics in the 21st century Several factors have influenced the undertaking of this project by the editors First an international volume focusing on gender and mathematics has not appeared since publication of papers emerging from the 1996 International Congress on Mathematical Education Keitel 1998 Surely it was time for an updated look at this critical area of mathematics education Second we have had lively discussion and working groups on gender issues at conferences of the International Group for the Psychology of Mathematics Education PME for the past four years sessions at which stimulating and ground breaking research has been discussed by participants from many different countries Some publication seemed essential to share this new knowledge emerging from a wider variety of countries and from different cultural perspectives Third some western countries such as Australia and the USA have experienced in recent years a focus on the boy problem with an underlying assumption that issues of females and mathematics have been solved and are no longer worthy of interest Thus it seemed timely to look more closely at the issue of gender and mathematics internationally When the idea for this volume first emerged invitations were issued to those regularly attending the working and discussion groups at PME Potential authors were charged to focus on gender issues in mathematics and were given wide scope to hone

in on the issues that were central to their own research efforts or were in receipt or in need of close attention in their own national or regional contexts *Routledge Library Editions: Education Mini-Set B: Curriculum Theory 15 vol set*

Various,2021-12-02 Mini set B Curriculum Theory re issues 15 volumes originally published between 1973 and 1993 and covers curriculum theory changes in curricula and the politics and sociology of the school curriculum

**Curriculum Practice** Martyn Hammersley,Andy Hargreaves,2012 When first published this book was one of the first collections of empirical research in the area of the knowledge transmitted in schools and the responses of students to it It includes studies of the histories of particular school subjects and of how the knowledge they embody is presented in the classroom Attention is also given to the effects of gender stereotypes among teachers and pupils both on pupils selection of courses to study and on their reactions to particular subjects in the classroom The other major topic in this collection is the way external examinations shape the nature of the school curriculum and how it is taught There are studies of how pupils and teachers adapt to the exam system and of how that system and its role in the accountability of schools have changed in recent years The articles collected here throw into relief important aspects of what is taught in schools and they do this on the basis of a solid foundation of empirical research
