Mating Mind How The Sexual Choice Shaped The Evolution Of Human Nature:

The Mating Mind Geoffrey Miller, 2011-12-21 At once a pioneering study of evolution and an accessible and lively reading experience a book that offers the most convincing and radical explanation for how and why the human mind evolved Consciousness morality creativity language and art these are the traits that make us human Scientists have traditionally explained these qualities as merely a side effect of surplus brain size but Miller argues that they were sexual attractors not side effects He bases his argument on Darwin's theory of sexual selection which until now has played second fiddle to Darwin's theory of natural selection and draws on ideas and research from a wide range of fields including psychology economics history and pop culture Witty powerfully argued and continually thought provoking *The Mating Mind* is a landmark in our understanding of our own species

The Oxford Handbook of Evolutionary Family Psychology Catherine Salmon, Todd K. Shackelford, 2011-05-27 The Oxford Handbook of Evolutionary Family Psychology focuses on the psychology behind people's familial behavior an understanding of which can illuminate our understanding of modern ancient and animal families

The Routledge Companion to the Philosophies of Painting and Sculpture Noël Carroll, Jonathan Gilmore, 2023-06-30 Comprising 45 chapters written especially for this volume by an international team of leading experts *The Routledge Companion to the Philosophies of Painting and Sculpture* is the first handbook of its kind The editors have organized the chapters across eight broader sections Artforms History Questions of form style and address Art and science Comparisons among the arts Questions of value Philosophers of art Institutional questions Individual topics include art and cognitive science evolutionary origins of art art and perception pictorial realism artistic taste style issues of race and gender art and religion art and philosophy and the end of art The work of selected philosophers is also discussed including Diderot Hegel Ruskin Gombrich Goodman Wollheim and Danto With an introduction from the editors and comprehensively indexed *The Routledge Companion to the Philosophies of Painting and Sculpture* serves as a point of entry to the subject for a broad range of students as well as an up to date reference for scholars in the field

Decoding Love Andrew S. Trees, 2009 Fairy tales and romantic stories have shaped our thinking about relationships for centuries Researchers today are making fascinating and often shocking discoveries about how why and when we choose our partners

Not So Weird After All Rosemary L. Hopcroft, Martin Fieder, Susanne Huber, 2024-03-26 This is the first book to fully examine from an evolutionary point of view the association of social status and fertility in human societies before during and after the demographic transition In most nonhuman social species social status or relative rank in a social group is positively associated with the number of offspring with high status individuals typically having more offspring than low status individuals However humans appear to be different As societies have gotten richer fertility has dipped to

unprecedented lows with some developed societies now at or below replacement fertility Within rich societies women in higher income families often have fewer children than women in lower income families Evolutionary theory suggests that the relationship between social status and fertility is likely to be somewhat different for men and women so it is important to examine this relationship for men and women separately When this is done the positive association between individual social status and fertility is often clear in less developed pre transitional societies particularly for men Once the demographic transition begins it is elite families particularly the women of elite families who lead the way in fertility decline Post transition the evidence from a variety of developed societies in Europe North America and East Asia is that high status men particularly men with high personal income do have more children on average than lower status men The reverse is often true of women although there is evidence that this is changing in Nordic countries The implications of these observations for evolutionary theory are also discussed This book will be of interest to students and researchers in the social sciences with an interest in evolutionary sociology evolutionary anthropology evolutionary psychology demography and fertility

Cultural Transmission Ute Schönplüg,2008-11-10 Cultural Transmission covers psychological developmental social and methodological research on how cultural information is socially transmitted from one generation to the next within families Studying processes of cultural transmission may help analyze the continuity or change of cultures including those that have to cope with migration or the collapse of a political system An evolutionary perspective is elaborated in the first part of the book the second takes a cross cultural perspective by presenting international research on development and intergenerational relations in the family the third provides intra cultural analyses of mechanisms and methodological aspects of cultural transmission Made up of contributions by experts in the field this source book is intended for anyone with interests in cultural issues especially researchers and teachers in disciplines such as psychology social and behavioral sciences and education and for applied professionals in culture management and family counseling as well as professionals dealing with migrants

Creating Consilience Edward Slingerland, Mark Collard, 2012-01-19 Calls for a consilient or vertically integrated approach to the study of human mind and culture have for the most part been received by scholars in the humanities with either indifference or hostility One reason for this is that consilience has often been framed as bringing the study of humanistic issues into line with the study of non human phenomena rather than as something to which humanists and scientists contribute equally The other major reason that consilience has yet to catch on in the humanities is a dearth of compelling examples of the benefits of adopting a consilient approach Creating Consilience is the product of a workshop that brought together internationally renowned scholars from a variety of fields to address both of these issues It includes representative pieces from workshop speakers and participants that examine how adopting such a consilient stance informed by cognitive science and grounded in evolutionary theory would concretely impact specific topics in the humanities examining each topic in a manner that not only cuts across the humanities natural science divide but also across individual humanistic disciplines By taking seriously the fact that science humanities integration is a two way exchange this volume takes a new approach to bridging the cultures of science and the humanities The editors and contributors formulate how to develop a new shared framework of consilience beyond mere interdisciplinarity in a way that both sides can accept

Family Relationships Catherine A. Salmon, Todd K. Shackelford, 2008 Kinship ties the close relationships found within the

family have been a central focus of evolutionary biological analyses of social behavior ever since biologist William Hamilton extended the concept of Darwinian fitness to include an individual's actions benefiting not only his own offspring but also collateral kin. Evolutionary biologists consider organisms not only reproductive strategists but also nepotistic strategists. If a person's genes are just as likely to be reproduced in her sister as in her daughter, then we should expect the evolution of sororal investment in the same way as one expects maternal investment. This concept has revolutionized biologists' understanding of social interaction and developmental psychologists' understanding of the family. However, kinship ties have largely been ignored in other areas of psychology, particularly social psychology. *Family Relationships* brings together leading theorists and researchers from evolutionary psychology and related disciplines to illustrate the ways in which an evolutionary perspective can inform our study and understanding of family relationships. The contributors argue that family psychology is relationship specific: the relationship between mother and daughter is different from that between father and daughter or that between brother and sister or sister and sister. In other words, humans have evolved specialized mechanisms for processing information and motivating behavior that deal with the distinct demands of being a mate, father, mother, sibling, child, or grandparent. Such an evolutionary perspective on family dynamics provides a unique insight into human behavior. This volume will be an indispensable resource for psychologists, sociologists, and anthropologists, as well as scholars of family, marriage, and animal behavior.

The SAGE Handbook of Evolutionary Psychology Todd K. Shackelford, 2021-08-04

Evolutionary psychology is an important and rapidly expanding area in the life, social, and behavioral sciences, and this Handbook represents the most comprehensive and up-to-date reference text in the field today. Over three volumes, the Handbook provides a rich overview of the most important theoretical and empirical work in the field. Chapters cover a broad range of topics, including theoretical foundations, the integration of evolutionary psychology with other life, social, and behavioral sciences, as well as with the arts and the humanities, and the increasing power of evolutionary psychology to inform applied fields including medicine, psychiatry, law, and education. Each of the volumes has been carefully curated to have a strong thematic focus: covering the foundations of evolutionary psychology, the integration of evolutionary psychology with other disciplines, and the applications of evolutionary psychology. The SAGE Handbook of Evolutionary Psychology is an essential resource for researchers, graduate students, and advanced undergraduate students in all areas of psychology and in related disciplines across the life, social, and behavioral sciences.

Intersubjective Minds Jonathan Delafield Butt, Vasudevi Reddy, 2025-01-12

Intersubjective Minds brings together world leaders in developmental psychology, biology, neuroscience, music, education, philosophy, and psychiatry to consolidate the lifetime work of Professor Emeritus Colwyn Trevarthen FRSE. Spanning research from the 1960s to the present, Trevarthen's contributions to science have changed our understanding of infancy, neuroscience, education, and musicality. The chapters included in this book, from these diverse fields, describe current issues, principles, and perspectives for advanced theory and working practice on the role of intersubjectivity in early human

life its contribution to health education and learning and therefore its role in scientific understanding of the fundamentals of the human mind By bringing together world renowned scholars scientists medical and educational practitioners this book serves as a landmark for the field of intersubjectivity Beauty Unlimited Gregory Velazco Trianosky, Noél Carroll, 2012-12-03 A feminist aesthetics text which bridges aesthetic theory art and popular culture and acknowledges the evolving character of standards of beauty Teaching Philosophy Emphasizing the human body in all of its forms Beauty Unlimited expands the boundaries of what is meant by beauty both geographically and aesthetically Peg Zeglin Brand and an international group of contributors interrogate the body and the meaning of physical beauty in this multidisciplinary volume This striking and provocative book explores the history of bodily beautification the physicality of socially or culturally determined choices of beautification the interplay of gender race class age sexuality and ethnicity within and on the body and the aesthetic meaning of the concept of beauty in an increasingly globalized world
