## **Matter Of Personal Survival:**

**A Matter of Personal Survival** Michael Marsh, 1985      *I Am You* Daniel Kolak, 2007-11-03

Borders enclose and separate us. We assign to them tremendous significance. Along them we draw supposedly uncrossable boundaries within which we believe our individual identities begin and end, erecting the metaphysical dividing walls that enclose each one of us into numerically identical numerically distinct entities: persons. Do the borders between us—physical, psychological, neurological, causal, spatial, temporal, etc.—merit the metaphysical significance ordinarily accorded them? The central thesis of *I Am You* is that our borders do not signify boundaries between persons. We are all the same person. Variations on this heretical theme have been voiced periodically throughout the ages: the Upanishads, Averroes, Giordano Bruno, Josiah Royce, Schrödinger, Fred Hoyle, Freeman Dyson. In presenting his arguments, the author relies on detailed analyses of recent formal work on personal identity, especially that of Derek Parfit, Sydney Shoemaker, Robert Nozick, David Wiggins, Daniel C. Dennett, and Thomas Nagel, while incorporating the views of Descartes, Leibniz, Wittgenstein, Schopenhauer, Kant, Husserl, and Brouwer. His development of the implied moral theory is inspired by and draws on Rawls, Sidgwick, Kant, and again Parfit. The traditional commonsense view that we are each a separate person, numerically identical to ourselves over time, i.e., that personal identity is closed under known individuating and identifying borders, what the author calls Closed Individualism, is shown to be incoherent. The demonstration that personal identity is not closed but open points collectively in one of two new directions: either there are no continuously existing self-identical persons over time in the sense ordinarily understood, the sort of view developed by philosophers as diverse as Buddha, Hume, and most recently Derek Parfit, what the author calls Empty Individualism; or else you are everyone, i.e., personal identity is not closed under known individuating and identifying borders, what the author calls Open Individualism. In making his case, the author offers a new explanation both of consciousness and of self-consciousness, constructs a new theory of Self, explains psychopathologies, e.g., multiple personality disorder, schizophrenia, shows Open Individualism to be the best competing explanation of who we are, provides the metaphysical foundations for global ethics. The book is intended for philosophers and the philosophically inclined: physicists, mathematicians, psychiatrists, psychologists, linguists, computer scientists, economists, and communication theorists. It is accessible to graduate students and advanced undergraduates.

Personal Identity and Applied Ethics Andrea Sauchelli, 2017-11-10

Soul, self, substance, and person are just four of the terms often used to refer to the human individual. Cutting across metaphysics, ethics, and religion, the nature of personal identity is a fundamental and long-standing puzzle in philosophy. *Personal Identity and Applied Ethics* introduces and examines different conceptions of the self, our nature, and personal identity, and considers the implications of these for applied ethics. A key feature of the book is that it discusses a range of different approaches to personal identity: philosophical, religious, and cross-cultural, including perspectives from non-Western traditions. Within this comparative framework, Andrea Sauchelli examines the following topics: Early views of the soul in Plato, Christianity, and Descartes; The

Buddhist no self views and the self as a fiction Confucian ideas of our nature and the importance of self cultivation as constitutive of the self Locke's theory of personal identity as continuity of consciousness and memory and objections by Butler and Reid as well as contemporary critics The theory of animalism and arguments concerning embodied theories of personal identity Practical and narrative theories of personal identity and moral agency Personal identity and issues in applied ethics including abortion organ transplantation and the idea of life after death Implications of life extending technologies for personal identity Throughout the book Sauchelli also considers the views of important recent philosophers such as Sydney Shoemaker Bernard Williams Derek Parfit Marya Schechtman and Christine Korsgaard placing these in helpful historical context Chapter summaries a glossary of key terms and suggestions for further reading make this a refreshing approachable introduction to personal identity and applied ethics It is an ideal text for courses on personal identity that consider both western and non western approaches and that apply theories of personal identity to ethical problems It will also be of interest to those in related subjects such as religious studies and history of ideas

Personal Identity Ellen Frankel Paul, Fred Dycus Miller, Jeffrey Paul, 2005 What is a person What makes me the same person today that I was yesterday or will be tomorrow Philosophers have long pondered these questions In Plato's Symposium Socrates observed that all of us are constantly undergoing change we experience physical changes to our bodies as well as changes in our manners customs opinions desires pleasures pains and fears Aristotle theorized that there must be some underlying substratum that remains the same even as we undergo these changes John Locke rejected Aristotle's view and reformulated the problem of personal identity in his own way is a person a physical organism that persists through time or is a person identified by the persistence of psychological states by memory These essays written by prominent philosophers and legal and economic theorists offer valuable insights into the nature of personal identity and its implications for morality and public policy

**Death and the Afterlife** Samuel Scheffler,2013-09-09 Suppose you knew that though you yourself would live your life to its natural end the earth and all its inhabitants would be destroyed thirty days after your death To what extent would you remain committed to your current projects and plans Would scientists still search for a cure for cancer Would couples still want children In *Death and the Afterlife* philosopher Samuel Scheffler poses this thought experiment in order to show that the continued life of the human race after our deaths the afterlife of the title matters to us to an astonishing and previously neglected degree Indeed Scheffler shows that in certain important respects the future existence of people who are as yet unborn matters more to us than our own continued existence and the continued existence of those we love Without the expectation that humanity has a future many of the things that now matter to us would cease to do so By contrast the prospect of our own deaths does little to undermine our confidence in the value of our activities Despite the terror we may feel when contemplating our deaths the prospect of humanity's imminent extinction would pose a far greater threat to our ability to lead lives of wholehearted engagement Scheffler further demonstrates that although we are not unreasonable to fear death personal immortality like the imminent extinction of humanity would also undermine our confidence in the values we hold dear His arresting conclusion is that in order for us to lead value laden lives what is necessary is that we ourselves should die and that others should live *Death and the Afterlife* concludes with commentary by four distinguished philosophers Harry Frankfurt Niko Kolodny Seana Shiffrin and Susan Wolf who discuss Scheffler's ideas with insight and imagination Scheffler adds a final reply

The Rise and Fall of Soul and Self Raymond Martin, John Barresi, 2006 This book traces the development of theories of the self and personal identity from the ancient Greeks to the present day From Plato and Aristotle to Freud and Foucault Raymond Martin and John Barresi explore the works of a wide range of thinkers and reveal the larger intellectual trends controversies and ideas that have revolutionized the way we think about ourselves The authors open with ancient Greece where the ideas of Plato Aristotle and the materialistic atomists laid the groundwork for future theories They then discuss the ideas of the church fathers and medieval and Renaissance philosophers including St Paul Philo Augustine Aquinas and Montaigne In their coverage of the emergence of a new mechanistic conception of nature in the seventeenth century Martin and Barresi note a shift away from religious and purely philosophical notions of self and personal identity to more scientific and social conceptions a trend that has continued to the present day They explore modern philosophy and psychology including the origins of different traditions within each discipline and explain both the theoretical relevance of feminism and gender and ethnic studies and also the ways that Derrida and other recent thinkers have challenged the very idea that a unified self or personal identity even exists Martin and Barresi cover a number of issues broached by philosophers and psychologists such as the existence of a fixed and unchanging self and whether the concept of the soul has a use outside of religious contexts They address the question of whether notions of the soul and the self are still viable in today s world Together they reveal the fascinating ways in which great thinkers have grappled with these and other questions and the astounding impact their ideas have had on the development of self understanding in the west **Christ and Freud (RLE: Freud)** Arthur Guirdham, 2013-10-08 Originally published in 1959 this book is primarily concerned with the question of

psychiatric factors in religion and conversely with that of religious factors in psychiatry It rejects the Freudian theory that religion is a form of obsessional neurosis Though this latter hypothesis may explain many of the phenomena of religious observance it cannot explain the reality of religious experience Dr Guirdham believes that orthodox Christianity is a perversion of the psychologically irrefutable teaching of Christ and that its conception of God as a supreme being endowed with supreme power its teaching on the resurrection and its contamination with a sense of guilt are especially conducive to psychiatric disorder He shows how theology may actually be inimical to religious experience and how faith differs from belief and is a response of the whole man The book explains also the psychological origins of clericalism and demonstrates the role played by the latter in stifling religious experience
