Byzantine Military Manual: The Sylloge Tacticorum Georgios Chatzelis,Jonathan Harris,2017-07-14 The Sylloge Tacticorum is a mid Byzantine example of the literary genre of military manuals or Taktika which stretches back to antiquity It was one of a number produced during the tenth century CE a period when the Byzantine empire enjoyed a large measure of success in its wars against its traditional enemy the Arabs Compiled to record and preserve military strategies know how and tactics the manual discusses a wide variety of matters battle formations raids sieges ambushes surprise attacks the treatment of prisoners of war and defectors distribution of booty punishment of military offences how to mount effective espionage and how to send and receive envoys There is even advice on the personal qualities required by generals on how to neutralize enemy horses and on how to protect the troops against poisoned food The work culminates in an account of the stratagems employed by great Greek and Roman military commanders of the past While like so much of Byzantine literature the Sylloge often simply reproduces material found in earlier texts it also preserves a great deal of information about the military tactics being developed by the Byzantine army during the tenth century It is the first Byzantine source to record the reappearance of a specialized heavy cavalry the kataphraktoi and of a specialized infantry the menavlatoi used to repel the attacks of the opposing heavy cavalry There is also a great deal of information on new infantry and cavalry formations and on the new tactics that required them This is the first complete translation of the Sylloge into English It is accompanied by a glossary of the specialised Greek military vocabulary used in the work and by footnotes which explain obscure references and identify the author s classical and Byzantine sources An introduction places the work in its historical and literary context and considers some of the questions that have remained unanswered over the centuries such as its authorship and the date of its composition *Byzantium and the Early Islamic Conquests* Walter E. Kaegi,1995-03-30 This is a study of how and why the Byzantine Empire lost many of its most valuable provinces to Islamic Arab conquerors in the seventh century provinces which included Syria Palestine Mesopotamia and Armenia It investigates conditions on the eve of those conquests mistakes in

Byzantine policy toward the Arabs the course of the military campaigns and the problem of local official and civilian collaboration with the Muslims It also seeks to explain how after terrible losses the Byzantine government achieved some intellectual rationalisation of its disasters and began the complex process of transforming and adapting its fiscal and military institutions and political controls in order to prevent further disintegration City Walls in Late Antiquity Emanuele Intagliata, Simon J. Barker, Christopher Courault, 2020-06-30 The construction of urban defences was one of the hallmarks of the late Roman and late antique periods 300 600 AD throughout the western and eastern empire City walls were the most significant construction projects of their time and they redefined the urban landscape Their appearance and monumental scale as well as the cost of labour and material are easily comparable to projects from the High Empire however urban circuits provided late antique towns with a new means of self representation While their final appearance and construction techniques varied greatly the cost involved and the dramatic impact that such projects had on the urban topography of late antique cities mark city walls as one of the most important urban initiatives of the period To date research on city walls in the two halves of the empire has highlighted chronological and regional variations enabling scholars to rethink how and why urban circuits were built and functioned in Late Antiquity Although these developments have made a significant contribution to the understanding of late antique city walls studies are often concerned with one single monument small group of monuments or a particular region and the issues raised do not usually lead to a broader perspective creating an artificial divide between east and west It is this broader understanding that this book seeks to provide The volume and its contributions arise from a conference held at the British School at Rome and the Swedish Institute of Classical Studies in Rome on June 20 21 2018 It includes articles from world leading experts in late antique history and archaeology and is based around important themes that emerged at the conference such as construction spolia use late antique architecture culture and urbanism empire wide changes in Late Antiquity and the perception of this practice by local inhabitants *The Eurasian Way of War* David A. Graff, 2016-03-10 This book is a comparative study of military practice in Sui Tang China and the Byzantine Empire between approximately 600 and 700 CE It covers all aspects of the military art from weapons and battlefield tactics to logistics campaign organization military institutions and the grand strategy of empire Whilst not neglecting the many differences between the Chinese and Byzantines this book highlights the striking similarities in their organizational structures tactical deployments and above all their extremely cautious approach to warfare It shows that contrary to the conventional wisdom positing a straightforward Western way of war and an Oriental approach characterized by evasion and trickery the specifics of Byzantine military practice in the seventh century differed very little from what was known in Tang China It argues that these similarities cannot be explained by diffusion or shared cultural influences which were limited but instead by the need to deal with common problems and confront common enemies in particular the nomadic peoples of the Eurasian steppes Overall this book provides compelling evidence that pragmatic needs may have more

influence than deep cultural imperatives in determining a society's way of war **The Romans** Edward J. Watts, 2025-10-07 An acclaimed scholar tells the full breathtaking history of Rome from its emergence in the Iron Age to the capture of Constantinople in the thirteenth century When we think of ancient Romans today many picture the toga clad figures of Cicero and Caesar presiding over a republic and then an empire before seeing their world collapse at the hands of barbarians in the fifth century AD The Romans does away with this narrow vision by offering the first comprehensive account of ancient Rome over the course of two millennia Prize winning historian Edward J Watts recounts the full sweep of Rome's epic past the Punic Wars the fall of the republic the coming of Christianity Alaric's sack of Rome the rise of Islam the Battle of Manzikert and the onslaught of the Crusaders who would bring about the empire's end Watts shows that the source of Rome's enduring strength was the diverse range of people who all called themselves Romans This is the Rome of Augustus Marcus Aurelius and Constantine but also Charlemagne Justinian and Manuel Comnenus and countless other men and women who together made it the most resilient state the world has ever seen An expansive eye opening portrait The Romans is the definitive history of Rome and its citizens Philosophers of War Daniel Coetzee, Lee W. Eysturid, 2013-10-21 This user friendly reference systematically covers the entire intellectual history of strategy and war in all cultures and all times Each culture has had its Machiavelli its Sun Tzu its own Mohammed like or Napoleonic figure This encyclopedia ranges across the world to provide entries on every significant military and strategic thinker in human history as well as a number of military cultures covering Chinese Western Indian Islamic and other cultures Each entry supplies a brief biography a synopsis of the writer's theories their success or failure and their impact on other thinkers and military practitioners The unique coverage allows readers to cross cultural barriers and gain access to sources in languages as diverse as Arabic and German and to note key similarities and contrasts The relative importance and contribution of each individual to intellectual progress is noted as is the greater significance of specific schools of thought and debates Rome's Armies to the Death of Augustus Tony McArthur, 2024-09-30 National armies as we know them today are a comparatively recent development It has been assumed that the Romans had an army similar to the national institutions of advanced almost exclusively European powers at the end of the nineteenth century But the assumption was wrong as is the belief that changes seen in the armies can be explained because the Romans reformed their armies Up to the death of Augustus the Romans had no permanent military forces Roman armies were raised for particular campaigns and disbanded at their conclusion Repeated campaigns were conducted in places like northern Italy and Spain but the armies were always disbanded These armies were not seen by Romans as part of a national institution as modern armies are they were simply a part of the life of a Roman citizen like religion or elections These armies were more like a militia than a national army There is little evidence even of systematic training and what changes can be detected can be better explained by contingent adaptation to circumstances rather than reform The emperor Augustus is commonly seen as the originator of the imperial armies but it was an unintended outcome of a long life **A**

History of Byzantium Timothy E. Gregory, 2011-08-26 This revised and expanded edition of the widely praised *A History of Byzantium* covers the time of Constantine the Great in AD 306 to the fall of Constantinople in 1453. Expands treatment of the middle and later Byzantine periods incorporating new archaeological evidence. Includes additional maps and photographs and a newly annotated updated bibliography. Incorporates a new section on web resources for Byzantium studies. Demonstrates that Byzantium was important in its own right but also served as a bridge between East and West and ancient and modern society. Situates Byzantium in its broader historical context with a new comparative timeline and textboxes.

War in Eleventh-Century Byzantium Georgios Theotokis, Marek Meško, 2020-10-27 *War in Eleventh Century Byzantium* presents new insights and critical approaches to warfare between the Byzantine Empire and its neighbours during the eleventh century. Modern historians have identified the eleventh century as a landmark era in Byzantine history. This was a period of invasions, political tumult, financial crisis and social disruption but it was also a time of cultural and intellectual innovation and achievement. Despite this the subject of warfare during this period remains underexplored. Addressing an important gap in the historiography of Byzantium the volume argues that the eleventh century was a period of important geopolitical change when the Byzantine Empire was attacked on all sides and its frontiers were breached. This book is valuable reading for scholars and students interested in Byzantium history and military history.

War and Masculinity in Roman and Medieval Culture Jaakko Juhani Peltonen, Elina Pyy, Jussi Rantala, 2025-08-07 The chapters in this volume highlight the complexity and diversity of approaches to how ancient and medieval cultures understood martial masculinity and the significance warfare had on masculine values during the premodern era. They also point to how these ideals were manifested in numerous environments covering topics from multiple points of view and using a variety of sources and methods. In the ancient and medieval periods manliness was often understood as the ability to demonstrate bravery in war and eagerness to use violence in different situations. While certain marginal groups such as philosophers and Christians promoted more peaceful ideals of masculinity war and masculinity were tightly connected to the cultures and societies of antiquity and the Middle Ages. Indeed in Roman and later medieval culture warfare played an essential role in constructing ideals of proper manliness and masculinity. This constructed masculinity manifested itself not only in written culture but also in everyday life both visually and bodily. *War and Masculinity in Roman and Medieval Culture* is intended for those interested in ancient Roman and medieval culture particularly researchers and students of gender and masculinity in Classical Antiquity and the Middle Ages.

The Genesis of the Turks Osman Karatay, 2022-01-25 This book suggests a new theory on the origins and Urheimat of the Turks within the context of Central Eurasia and more properly the South Urals by exploring the relations of the Turkic language with the Altaic Uralic and Indo-European languages and by referring to historical genetic and archaeological sources. The book shows that the elements that started the making of the Turkic ethno-linguistic entity were also shared by the regions where the later Hungarians would emerge and that the consolidation of their identity seems to be

related to the emergence and rise of the Sintashta culture It argues that the fertile lands and suitable climatic conditions together with the coming of agriculture likely at the end of the 3rd millennium BC allowed them to increase their population

Representing Beasts in Early Medieval England and Scandinavia Michael D. J. Bintley,Thomas J. T. Williams,2015 Essays on the depiction of animals birds and insects in early medieval material culture from texts to carvings to the landscape itself For people in the early Middle Ages the earth air water and ether teemed with other beings Some of these were sentient creatures that swam flew slithered or stalked through the same environments inhabited by their human contemporaries Others were objects that a modern beholder would be unlikely to think of as living things but could yet be considered to possess a vitality that rendered them potent Still others were things half glimpsed on a dark night or seen only in the mind s eye strange beasts that haunted dreams and visions or inhabited exotic lands beyond the compass of everyday knowledge This book discusses the various ways in which the early English and Scandinavians thought about and represented these other inhabitants of their world and considers the multi faceted nature of the relationship between people and beasts Drawing on the evidence of material culture art language literature place names and landscapes the studies presented here reveal a world where the boundaries between humans animals monsters and objects were blurred and often permeable and where to represent the bestial could be to hold a mirror to the self Michael D J Bintley is Senior Lecturer in Medieval Literature at Canterbury Christ Church University Thomas J T Williams is a doctoral researcher at UCL s Institute of Archaeology Contributors No l Adams John Baker Michael D J Bintley Sue Brunning L szl S ndor Chardonnens Della Hooke Eric Lacey Richard North Marijane Osborn Victoria Symons Thomas J Williams Visions of Community in the Post-Roman World Clemens Gantner,2016-03-03 This volume looks at visions of community in a comparative perspective from Late Antiquity to the dawning of the age of crusades It addresses the question of why and how distinctive new political cultures developed after the disintegration of the Roman World and to what degree their differences had already emerged in the first post Roman centuries The Latin West Orthodox Byzantium and its Slavic periphery and the Islamic world each retained different parts of the Graeco Roman heritage while introducing new elements For instance ethnicity became a legitimizing element of rulership in the West remained a structural element of the imperial periphery in Byzantium and contributed to the inner dynamic of Islamic states without becoming a resource of political integration Similarly the political role of religion also differed between the emerging post Roman worlds It is surprising that little systematic research has been done in these

fields so far The 32 contributions to the volume explore this new line of research and look at different aspects of the process with leading western Medievalists Byzantinists and Islamicists covering a wide range of pertinent topics At a closer look some of the apparent differences between the West and the Islamic world seem less distinctive and the inner variety of all post Roman societies becomes more marked At the same time new variations in the discourse of community and the practice of power emerge Anybody interested in the development of the post Roman Mediterranean but also in the relationship between the Islamic World and the West will gain new insights from these studies on the political role of ethnicity and religion in the post Roman Mediterranean
