Negations Essays In Critical Theory:

Negations Herbert Marcuse, 1968 Herbert Marcuse's *Negations* is both a radical critique of capitalist modernity and a model of materialist dialectical thinking. In a series of essays originally written in the period stretching from the 1930s to the 1960s, Marcuse takes up the presupposed categories that have and continue to ground thought and action in our administered society: liberalism, industrialism, individualism, hedonism, aggression. This book is both a testament to a great thinker and a still vital strand of thought in the comprehension and critique of the modern organized world. It is essential reading for younger scholars and a radical reminder for those steeped in the tradition of a critical theory of society. With a brilliance of conception combined with an insistence on the material conditions of thought and action, this book speaks both to the particular contents engaged and to the fundamental grounds of any critique of organized modernity. Negations Herbert Marcuse, 1968 **Negations** Herbert Marcuse, 1968 Negation, Critical Theory, and Postmodern Textuality D. Fischlin, 2013-06-29 *Negation Critical Theory and Postmodern Textuality* features 14 new essays by leading specialists in critical theory, comparative literature, philosophy, and English literature. The essays, which present wide-ranging historical considerations of negation in light of recent developments in poststructuralism and postmodernism, range over many of the significant texts in which negation figures prominently. The book includes a wide-ranging introductory chapter that examines how attention to negation, the inescapable nescience that is posited in any and every linguistic expression, enhances the hermeneutic possibilities present in language. In addition, the four sections of the book bring together major critical interventions on, among others, negative meaning, unrecognizability, elenctic negation, apocalypse, nihilism, negation and gender, and denegation. All the essays involve close attention to key texts by major authors, including William Shakespeare, Henry James, Federico García Lorca, Samuel Beckett, Thomas Bernhard, Walt Whitman, E. M. Forster, Mary Shelley, Margaret Atwood, Roland Barthes, Douglas Barbour, Paul de Man, bp Nichol, Jacques Derrida, and Dogen Kigen. The volume opens up new areas in critical theory, comparative literature, and the philosophy of language and defines a major new area of inquiry in relation to notions of postmodern textuality. Critical theorists, students of comparative literature, English literature, and the history of ideas, and those interested in the hermeneutic implications of postmodernism will find this volume of substantial interest. Its extensive bibliographical apparatus and index make the collection a valuable reference tool for upper-level undergraduate and graduate students as well as for those seeking a variety of interpretive approaches to the problem of negation in literature. *The Essential Marcuse* Herbert Marcuse, 2007-03-01 *The Essential Marcuse* provides an overview of Herbert Marcuse's political and philosophical writing over four decades, with excerpts from his major books as well as essays from various academic journals. The most influential radical philosopher of the 1960s, Marcuse's writings are noteworthy for their uncompromising opposition to both capitalism and communism. His words are as relevant to today's society as they were at the time they were written. Negations. Essays in Critical Theory. With Transl. from the German by

J.J. Shapiro ,1968 Critical Theory Peter Uwe Hohendahl,Jaimey Fisher,2001-06-01 The retirement of the distinguished philosopher Jürgen Habermas from his chair at the University of Frankfurt signalled an important caesura in the history of Critical Theory the transition from the Habermasian project to different forms of inquiry in the work of the next generation This change over happens at a time when it has become clear that Habermas's systematic exploration of communicative rationality has reached the point where both its achievements and its limitations had become evident The essays collected in this volume address the problems connected with this transition partly by returning to the insights of the first generation Adorno and Benjamin partly by focusing on questions raised by Habermas's work Whatever the difference in the authors' positions this collection gains its unity through their common interest in the significance and value of Critical Theory today and in its future as a philosophical project Critical Social Theory Tim Dant,2004-01-15 Critical theory has left an indelible mark on postwar social thought But what are the relations between critical theory and the cultural turn How did critical theory inform later French critical theorists such as Lefebvre Barthes and Baudrillard This accomplished and accessible book Demonstrates the origins of critical theory in the Marxian analysis of the capitalist mode of production and Freudian psychoanalysis Clearly explains the main achievements of critical theory Elucidates how critical theory defines culture as a system that constrains and alienates the individual Explores the potential for social change and personal emancipation in the critical heritage The author locates the importance of myth and reason the significance of sexuality the place of work the difference between art and entertainment the nature of everyday life and the relationship between knowledge and action The result is a lucid and informative text which will appeal to all students interested in the critical traditions of social thought

as Ernst Bloch Theodor Adorno and Jurgen Habermas as well as many of the seminal texts and empirical investigations of critical theory
