Nemesis Divina:

Linnaeus Lisbet Koerner, 2001-04-16 Drawing on letters poems notebooks and secret diaries Lisbet Koerner tells the moving story of one of the most famous naturalists who ever lived the Swedish born botanist and systematizer Carl Linnaeus The first scholarly biography of this great Enlightenment scientist in almost one hundred years Linnaeus also recounts for the first time Linnaeus grand and bizarre economic projects to teach tea saffron and rice to grow on the Arctic tundra and to domesticate buffaloes guinea pigs and elks as Swedish farm animals Linnaeus hoped to reproduce the economy of empire and colony within the borders of his family home by growing cash crops in Northern Europe Koerner shows us the often surprising ways he embarked on this project Her narrative goes against the grain of Linnaean scholarship old and new by analyzing not how modern Linnaeus was but how he understood science in his time At the same time his attempts to organize a state economy according to principles of science prefigured an idea that has become one of the defining features of modernity Meticulously researched and based on archival data Linnaeus will be of compelling interest to historians of the Enlightenment historians of economics and historians of science But this engaging often funny and sometimes tragic portrait of a great man will be valued by general readers as well **Emanuel Swedenborg, Secret Agent on Earth and in**

Heaven Marsha Keith Schuchard, 2011-10-28 Drawing on unpublished diplomatic and Masonic archives this study reveals the career of Emanuel Swedenborg as a secret intelligence agent for Louis XV and the pro French pro Jacobite party of Hats in Sweden Utilizing Kabbalistic meditation techniques he sought political intelligence on earth and in heaven **The Man Who Organized Nature** Gunnar Broberg, 2025-05-20 A vivid portrait of the life and work of Carl Linnaeus Carl Linnaeus 1707 1778 known as the father of modern biological taxonomy formalized and popularized the system of binomial nomenclature used to classify plants and animals Linnaeus himself classified thousands of species the simple and immediately recognizable abbreviation L is used to mark classifications originally made by Linnaeus This biography by the leading authority on Linnaeus offers a vivid portrait of Linnaeus s life and work Drawing on a wide range of previously unpublished sources including diaries and personal correspondence as well as new research it presents revealing and original accounts of his family life the political context in which he pursued his work and his eccentric views on sexuality The Man Who Organized Nature describes Linnaeus s childhood in a landscape of striking natural beauty and how this influenced his later work Linnaeus s Lutheran pastor father knowledgeable about plants and an enthusiastic gardener helped foster an early interest in botany The book examines the political connections that helped Linnaeus secure patronage for his work and untangles his ideas about sexuality These were not as often assumed an attempt to naturalize gender categories but more likely reflected the laissez faire attitudes of the era Linnaeus like many other brilliant scientists could be moody and egotistical the book describes his human failings as well as his medical and scientific achievements Written in an engaging and accessible style The Man Who Organized Nature provides new and fascinating insights into the life of one of history s

most consequential and enigmatic scientists **The Oxford Handbook of Music and World Christianities** Suzel Ana Reily, Jonathan M. Dueck, 2016-03-16 The Oxford Handbook of Music and World Christianities investigates music's role in everyday practice and social history across the diversity of Christian religions and practices around the globe. The volume explores Christian communities in the Americas, Europe, Africa, Asia, and Australia as sites of transmission, transformation, and creation of deeply diverse musical traditions. The book's contributors, while mostly rooted in ethnomusicology, examine Christianities and their musics in methodologically diverse ways, engaging with musical sound and structure, musical and social history, and ethnography of music and musical performance. These broad materials explore five themes: music and missions; music and religious utopias and other oppositional religious communities; music and conflict; music and transnational flows; and music and everyday life. The volume as a whole then approaches Christian groups and their musics as diverse and powerful windows into the way in which music, religious ideas, capital, and power circulate and change between places, now and historically. It also tries to take account of the religious self-understandings of these groups, presenting Christian musical practice and exchange as encompassing and negotiating deeply felt and deeply rooted moral and cultural values. Given that the centerpiece of the volume is Christian religious musical practice, the volume reveals the active role music plays in maintaining and changing religious moral and cultural values in a long history of intercultural and transnational encounters.

The Emergence of Impartiality Kathryn Murphy, Anita Traninger, 2013-10-24 This volume exposes the contested history of a virtue so central to modern disciplines and public discourse that it can seem universal. The essays gathered here, however, demonstrate the emergence of impartiality. From the early seventeenth century, the new epithet *impartial* appears prominently in a wide range of publications. Contributors trace impartiality in various fields, from news publications and polemical pamphlets to moral philosophy and historical dictionaries, from poetry and drama to natural history in a broad European context and against the backdrop of religious and civil conflicts. Cumulatively, the volume suggests that the emergence of impartiality is implicated in the period's epochal shifts in epistemology and science, religious and political discourse, print culture, and scholarship. Contributors include Jörg Jochen Berns, Tamara Demeter, Derek Dunne, Anne Eusterschulte, Christine Gerrard, Rainer Godel, N. J. S. Hardy, Rhodri Lewis, Hanns Peter Neumann, Joad Raymond, Bernd Roling, Bastian Ronge, Richard Scholar, Nathaniel Stogdill, Anita Traninger, and Anja Zimmermann **Jewish Thought and**
