## **Realists At Work Studio Interviews:**

**Realists at Work** John Arthur, 1983      **Wayne Thiebaud** Timothy Anglin Burgard, 2025-03-18 Explores Wayne Thiebaud's career as a self-described thief who appropriated and reinterpreted old and new European and American artworks. Although artist Wayne Thiebaud 1920-2021 earned acclaim for his poetic renderings of the prosaic particulars of American life, he openly admitted that it's hard for me to think of artists who weren't influential on me because I'm such a blatant thief. Wayne Thiebaud Art Comes from Art features the artist's virtuosic appropriations and reinterpretations of old and new European and American artworks spanning from Andrea Mantegna to Édouard Manet, Henri Matisse to Richard Diebenkorn, offering crucial insights into his creative process. Thiebaud's exploration of art artists and art history along with the practices of copying, appropriation, and reinterpretation allowed him not only to see through the eyes of other artists but also to commune with them through their work, expanding his own vision. This career-long engagement with the concept of appropriation illustrates his perception of art history as an encyclopedic bureau of standards, a rich repository and resource that offers working artists community with their predecessors and communion with their artworks. Published in association with the Fine Arts Museums of San Francisco. Exhibition dates: Legion of Honor, March 22-August 17, 2025      **American Realist Painting, 1945-1980** John Lawrence Ward, 1989      **Realism's Others** Eva Aldea, Geoffrey Baker, 2010-07-12 For at least a century, scholarship on realist narrative and occasional polemics against realist narrative have assumed that realism promotes the values of sameness against those of otherness and that it does so by use of a narrative mode that excludes certain epistemologies, ideologies, and ways of thinking. However, the truth is more complex than that, as the essays in this volume all demonstrate. *Realism's Others* examines the various strategies by which realist narratives create the idea of difference, whether that difference is registered in terms of class, ethnicity, epistemology, nationality, or gender. The authors in this collection examine in detail not just the fact of otherness in some canonical realist and canonical magical realist and postmodern novels but the actual means by which that otherness is established by the text. These essays suggest that neither realist narrative nor narratives positioned as anti-realist take otherness for granted; rather, the texts discussed here actively create difference, and this creation of difference often occasions severe difficulties for the novels' representational schema. How does one represent different types of knowledge, other aesthetic modes, or other spaces, for example, in texts whose epistemology has long been seen as secular and empirical, whose aesthetic mode has always been approached as pure descriptive mimesis, and whose settings are largely domestic? These essays all begin with a certain collision of nationalities, of classes, of representational matrices, of religions, and go on to chart the challenges that this collision presents to our ideas or stereotypes of realism or to the possibilities of writing against and beyond realism. This question motivates examination of key realist or social realist texts in some of these essays by Honoré de Balzac, George Eliot, Franz Grillparzer, Theodor Storm, Gottfried Keller, Theodor Fontane, Wilhelm Raabe, María Amparo Ruiz de Burton, Henry James, William Dean Howells, Charles

Chesnutt Theodore Dreiser H T Tsiang Alan Sillitoe and Richard Yates However it is no less central a question in certain non realist texts which engage realist aims to a surprising degree often to debate them openly some of these essays discuss in this light fantastic magical realist and postmodern works by Abram Tertz Paul Auster Alejo Carpentier Toni Morrison Gabriel Garc a M rquez Salman Rushdie and A S Byatt Realism becomes more than an aesthetic aim or narrative mode It becomes rather a value evoked and discussed by all of the works analyzed here in order to reveal its impact on fiction s treatment of ethnicity nationality ideology space gender and social class

The Order of Forms Anna Kornbluh, 2019-11-20 In literary studies today debates about the purpose of literary criticism and about the place of formalism within it continue to simmer across periods and approaches Anna Kornbluh contributes to and substantially shifts that conversation in *The Order of Forms* by offering an exciting new category political formalism which she articulates through the co emergence of aesthetic and mathematical formalisms in the nineteenth century Within this framework criticism can be understood as more affirmative and constructive articulating commitments to aesthetic expression and social collectivity Kornbluh offers a powerful argument that political formalism by valuing forms of sociability like the city and the state in and of themselves provides a better understanding of literary form and its political possibilities than approaches that view form as a constraint To make this argument she takes up the case of literary realism showing how novels by Dickens Bront Hardy and Carroll engage mathematical formalism as part of their political imagining Realism she shows is best understood as an exercise in social modeling more like formalist mathematics than social documentation By modeling society the realist novel focuses on what it considers the most elementary features of social

relations and generates unique political insights Proposing both this new theory of realism and the idea of political formalism this inspired eye opening book will have far reaching implications in literary studies
