*It Should Never Happen Again* Mike Lauder,2016-05-06 In *It Should Never Happen Again* Dr Mike Lauder questions the value of public inquiries Every day we hear about another inquiry being set up or why the last one failed to deliver the hoped for outcomes A great deal of time and taxpayers money is spent on inquiries and even more on implementing their recommendations but the author suggests that those conducting inquiries might be considered by their own test criminally negligent in the way they do so and that it is no surprise that they do not lead to the learning they should The focus of Mike Lauder s research is the gaps between what is known what knowledge is used by practitioners and those who judge them He contends that the difference between the judicial perspective and that of practitioners who are judged by the inquiry process creates barriers that impede others from learning Crucially inquiry outcomes do not assist the leadership of organisations to improve risk governance *It Should Never Happen Again* is based on research into high profile public inquiries and presidential commissions in the UK the USA Continental Europe and elsewhere Embracing issues ranging from terrorist attacks to pollution fire and air disasters criminal cases banking and bribery scandals and the state of public services Mike Lauder contrasts the judicial perspective of those who inquire the academic perspective of those who know and the practical perspective of those who are required to act and offers new models for understanding risk and its governance

It marks the culmination of two decades of research in South Africa, a context that has obvious application in a wider international climate given current globalization and migration trends. Including a range of theoretical, methodological and empirical considerations, the volume sheds light upon qualitative research methods and their application in the intercultural context. This book will be a valuable resource for health professionals, medical educators and language practitioners as well as students and scholars of discourse analysis and the medical humanities. Smart Health Choices Les Irwig, 2008. Every day we make decisions about our health, some big and some small. What we eat, how we live and even where we live can affect our health. **Sexual Predators** Robert A. Prentky, Howard E. Barbaree, Eric S. Janus, 2015-06-26. Convicted sex offenders released from custody at the end of their criminal sentences pose a risk for re-offense. In many US states, Sexually Violent Predator (SVP) laws have been enacted that allow for the post-prison preventive detention of high risk sex offenders. SVP laws require the courts to make dispositions that protect the public from harm while at the same time respecting the civil rights of the offender. This book describes these SVP laws, their constitutionality and aspects of their operation. Courts hear expert risk testimony based heavily on the results of actuarial risk assessment. Problems associated with this testimony include the lack of a theory of recidivism, risk bias due to human decision making and the insularity of scholarship and practice along developmental lines. The authors propose changes in legal standards as well as a unified developmental model that treats sexual violence as an evolving condition with roots traceable to childhood and paths that extend into adolescence and adulthood.
