McGuire,1971-01-01 **Books in Series** ,1985 Vols for 1980 issued in three parts Series Authors and Titles **Catalog of Copyright Entries, Third Series** Library of Congress. Copyright Office,1971 The record of each copyright registration listed in the Catalog includes a description of the work copyrighted and data relating to the copyright claim the name of the copyright claimant as given in the application for registration the copyright date the copyright registration number etc **The Course of Life: Adulthood and the aging process** ,1981

American Book Publishing Record ,1982 Reshaping the Psychoanalytic Domain Judith M. Hughes,1990-08-16 Tracing the line of succession from Sigmund Freud through Melanie Klein to Fairbairn and Winnicott Judith Hughes demonstrates the internal development of the British school of psychoanalysis and the coherence of its legacy Both lay reader and professional will find the book illuminating Remembering the Personal Past Bruce M. Ross,1992-01-02 In this resonant scholarly work Bruce Ross presents an encompassing theoretical framework and overview of autobiographical memory Drawing on a wide range of ideas from academic psychology the social sciences psychoanalysis and the humanistic disciplines the author presents a stimulating and original perspective on this increasingly important topic Ross description encompasses the full range of subjective responsiveness to personal memories both with and without awareness including real world social context and examples that can be compared with one s own experience critical assessment of psychoanalytic memory concepts with a clear distinction drawn between Freud s ideas and those of his later followers childhood memories dealt with from dual standpoints of initial origin and adult retrospection explanations of problems and dilemmas in philosophy and the human sciences that determine both what is to be counted as a memory experience and how memories can be validated and the phenomena of individual memories compared with characteristics of group determined memories and socially structured memories that persist across generations Cognizant of the rich intellectual history of the field the book also calls on the works of James Titchener Freud Piaget Baldwin Janet Bartlett Ellis Bergson Bloch Halbwachs and Merleau Ponty among others to broaden our current understanding of the experience of autobiographical memory Students and researchers from a number of disciplines concerned with the psychology of memory cognition and identity will find this volume both insightful and thought provoking **Library of Congress Catalogs** Library of Congress,1976

From Freud's Consulting Room Judith M. Hughes,1994 The science of mind has been plagued by intractable philosophical puzzles chief among them the distortions of memory and the relation between mind and body Sigmund Freud s clinical practice forced him to grapple with these problems and out of that struggle psychoanalysis emerged From Freud s Consulting Room charts the development of his ideas through his clinical work the successes and failures of his most

dramatic and significant case histories and the creation of a discipline recognizably distinct from its neighbors In Freud's encounters with hysterical patients the mind/body problem could not be set aside Through the cases of Anna O, Emmy von N, Elisabeth von R, Dora and Little Hans he rethought that problem as Hughes demonstrates in terms of psychosexuality When he tried to sort out the value of memories with Dora and Little Hans as well as with the Rat Man and the Wolf Man Freud reintroduced psychosexuality and elaborated the Oedipus complex Hughes also traces the evolution of Freud's conception of the analytic situation and of the centrality of transference again through the clinical material including the case of Freud himself who at one point figured as his own chief patient Moving from case to case Hughes has coaxed them into telling a coherent story Her book has the texture of intellectual history and the compelling quality of a fascinating tale It leads us to see the origins and development of psychoanalysis in a new way

Library of Congress Catalog Library of Congress,1970
A cumulative list of works represented by Library of Congress printed cards
Freud Evaluated - The Completed Arc M. Macmillan,1990-12-14 This volume is an historically based critical evaluation of Freud's personality theory In it the observations Freud made are described and the theoretical ideas he put forward for explaining them are set out The adequacy of Freud's explanations are judged against the logical and scientific standards of Freud's own time The historical perspective will give the reader a sound basis on which to make a judgement about psychoanalysis as a method of investigation and a theory of personality as well as a sense of what Freud was about from Freud's own standpoint Freud's endeavour is sited in the psychological and psychiatric context of the time a period not previously given the critical attention it warrants All of Freud's important assumptions and characteristic modes of thought are to be found in this formative period The placement also brings out more clearly the basis of a number of the unresolved problems of contemporary psychoanalytic theory such as the place of affect and the instinctual drives the role of the ego and the basis of treatment The core of the evaluation centres on Freud's basic method for gathering data free association a method which is not much written about and hardly ever criticised What is said about it is new and more substantial than the few criticisms that have been made Although a very critical work there is probably no other appraisal which allows Freud and his colleagues and followers to speak so directly for themselves
Current Catalog National Library of Medicine (U.S.),1967 Includes subject section name section and 1968 1970 technical reports
