The Cambridge History of War: Volume 4, War and the Modern World Roger Chickering, Dennis Showalter, Hans van de Ven, 2012-09-27 Volume IV of The Cambridge History of War offers a definitive new account of war in the most destructive period in human history Opening with the massive conflicts that erupted in the mid nineteenth century in the US Asia and Europe leading historians trace the global evolution of warfare through the age of mass the age of machine and the age of management They explore how industrialization and nationalism fostered vast armies whilst the emergence of mobile warfare and improved communications systems made possible the total warfare of the two World Wars With military conflict regionalized after 1945 they show how guerrilla and asymmetrical warfare highlighted the limits of the machine and mass as well as the importance of the media in winning hearts and minds This is a comprehensive guide to every facet of modern war from strategy and operations to its social cultural technological and political contexts and legacies **History of Europe from the Commencement of the French Revolution in 1789, to the Restoration of the Bourbons in 1815** Archibald Alison, 1847 History of Europe from the Commencement of the French Revolution in 1789, to the Restoration of the Bourbons in 1815 Sir Archibald Alison, 1842 **Publishers' Circular and Booksellers' Record of British and Foreign Literature** , 1895 History of Central Asia, The: 4-volume set Christoph Baumer, 2018-04-18 This set includes all four volumes of the critically acclaimed History of Central Asia series The epic plains and arid deserts of Central Asia have witnessed some of the greatest migrations as well as many of the most transformative developments in the history of civilization Christoph Baumer s ambitious four volume treatment of the region charts the 3000 year drama of Scythians and Sarmatians Soviets and transcontinental Silk Roads trade routes and the transmission of ideas across the steppes and the breathless and brutal conquests of Alexander the Great and Chinghiz Khan Masterfully interweaving the stories of individuals and peoples the author s engaging prose is richly augmented throughout by colour photographs taken on his own travels This set includes The Age of the Steppe Warriors Volume 1 The Age of the Silk Roads Volume 2 The Age of Islam and the Mongols Volume 3 and The Age of Decline and Revival Volume 4 **The Publishers' Circular and General Record of British and Foreign Literature** , 1889 **A History of the Laws of War: Volume 3** Alexander Gillespie, 2011-10-07 This unique work of reference traces the origins of the modern laws of warfare from the earliest times to the present day Relying on written records from as far back as 2400 BCE and using sources ranging from the Bible to Security Council Resolutions the author pieces together the history of a subject which is almost as old as civilisation itself The author shows that as long as humanity has been waging wars it has also been trying to find ways of legitimising different forms of combatants and ascribing rules to them protecting civilians who are either inadvertently or intentionally caught up between them and controlling the use of particular classes of weapons that may be used in times of conflict Thus it is that this work is divided into three substantial parts Volume 1 on the laws affecting combatants and captives Volume 2 on civilians and Volume 3 on the law of arms control

This third volume deals with the question of the control of weaponry from the Bronze Age to the Nuclear Age. In doing so it divides into two parts namely conventional weapons and Weapons of Mass Destruction. The examination of the history of arms control of conventional weapons begins with the control of weaponry so that one side could achieve a military advantage over another. This pattern which only began to change centuries after the advent of gunpowder was later supplemented by ideals to control types of conventional weapons because their impacts upon opposing combatants were inhumane. By the late twentieth century the concerns over inhumane conventional weapons were being supplemented by concerns over indiscriminate conventional weapons. The focus on indiscriminate weapons when applied on a mass scale is the core of the second part of the volume. Weapons of Mass Destruction are primarily weapons of the latter half of the twentieth century. Although both chemical and biological warfare have long historical lineages it was only after the Second World War that technological developments meant that these weapons could be applied to cause large scale damage to non combatants. This is unlike nuclear weapons which are a truly modern invention. Despite being the newest Weapon of Mass Destruction they are also the weapon of which most international attention has been applied although the frameworks by which they were contained in the last century appear inadequate to address the needs of current times. As a work of reference this set of three books is unrivalled and will be of immense benefit to scholars and practitioners researching and advising on the laws of warfare. It also tells a story which throws fascinating new light on the history of international law and on the history of warfare itself.

A History of the Laws of War: Volume 1 Alexander Gillespie, 2011-09-06. This unique new work of reference traces the origins of the modern laws of warfare from the earliest times to the present day. Relying on written records from as far back as 2400 BCE and using sources ranging from the Bible to Security Council Resolutions the author pieces together the history of a subject which is almost as old as civilisation itself. The author shows that as long as humanity has been waging wars it has also been trying to find ways of legitimising different forms of combatants and regulating the treatment of captives. This first book on warfare deals with the broad question of whether the patterns of dealing with combatants and captives have changed over the last 5 000 years and if so how. In terms of context the first part of the book is about combatants and those who can lawfully take part in combat. In many regards this part of the first volume is a series of less than ideal pathways. This is because in an ideal world there would be no combatants because there would be no fighting. Yet as a species we do not live in such a place or even anywhere near it either historically or in contemporary times. This being so a second best alternative has been to attempt to control the size of military forces and therefore the bloodshed. This is also not the case by which humanity has worked over the previous centuries. Rather the clear assumption for thousands of years has been that authorities are allowed to build the size of their armed forces as large as they wish. The restraints that have been applied are in terms of the quality and methods by which combatants are taken. The considerations pertain to questions of biology such as age and sex geographical considerations such as nationality and the multiple nuances of informal or formal

combatants These questions have also overlapped with ones of compulsion and whether citizens within a country can be compelled to fight without their consent Accordingly for the previous 3 000 years the question has not been whether there should be a limit on the number of soldiers but rather who is or is not a lawful combatant It has rarely been a question of numbers It has been and remains one of type The second part of this book is about people typically combatants captured in battle It is about what happens to their status as prisoners about the possibilities of torture assistance if they are wounded and what happens to their remains should they be killed and their bodies fall into enemy hands The theme that ties all of these considerations together is that all of the acts befall those who are to one degree or another captives of their enemies As such they are no longer masters of their own fate As a work of reference this first volume as part of a set of three is unrivalled and will be of immense benefit to scholars and practitioners researching and advising on the laws of warfare It also tells a story which throws fascinating new light on the history of international law and on the history of warfare itself

*A History of the Laws of War: Volume 2* Alexander Gillespie, 2011-10-07 This unique new work of reference traces the origins of the modern laws of warfare from the earliest times to the present day Relying on written records from as far back as 2400 BCE and using sources ranging from the Bible to Security Council Resolutions the author pieces together the history of a subject which is almost as old as civilisation itself The author shows that as long as humanity has been waging wars it has also been trying to find ways of legitimising different forms of combatants and ascribing rules to them protecting civilians who are either inadvertently or intentionally caught up between them and controlling the use of particular classes of weapons that may be used in times of conflict Thus it is that this work is divided into three substantial parts Volume 1 on the laws affecting combatants and captives Volume 2 on civilians and Volume 3 on the law of arms control This second book on civilians examines four different topics The first topic deals with the targetting of civilians in times of war This discussion is one which has been largely governed by the developments of technologies which have allowed projectiles to be discharged over ever greater areas and attempts to prevent their indiscriminate utilisation have struggled to keep pace The second topic concerns the destruction of the natural environment with particular regard to the utilisation of starvation as a method of warfare and unlike the first topic this one has rarely changed over thousands of years although contemporary practices are beginning to represent a clear break from tradition The third topic is concerned with the long standing problems of civilians under the occupation of opposing military forces where the practices of genocide collective punishments and or reprisals and rape have occurred The final topic in this volume is about the theft or destruction of the property of the enemy in terms of either pillage or the intentional devastation of the cultural property of the opposition As a work of reference this set of three books is unrivalled and will be of immense benefit to scholars and practitioners researching and advising on the laws of warfare It also tells a story which throws fascinating new light on the history of international law and on the history of warfare itself

with extremes that ranged from arid deserts to tropical jungles to formidable mountains and almost always on inadequate rations Yet the East African campaign has languished in undeserved obscurity over the years with many people only vaguely aware of its course of events Indeed Humphrey Bogart s famous film The African Queen inspired by an episode of the campaign often provides its only lasting image The Forgotten Front is the first full scale history of this neglected campaign Ross Anderson details both the fighting and the strategic and political background to the war and the differing viewpoints of the principal protagonists
