Wiener,2014-08-12 Justice conflict and wellbeing are large topics that occupy researchers from a variety of disciplines as well as laypeople and policy makers The three concepts are closely connected conflict often though not always impairs wellbeing whereas justice often though not

always enhances it perceived injustice is a common source of conflict at multiple levels and calls for justice are a common response to conflict In addition each construct has subtypes such as distributive and procedural justice individual and group conflict and physical and psychological wellbeing Although there are established traditions of research on the topics in multiple disciplines there is little cross fertilization across disciplines This volume brings together researchers from social clinical and educational psychology law and political science The unifying theme is how injustice and conflict pose threats to wellbeing at the micro individual and macro groups and societies levels Multi and interdisciplinary research are at the vanguard of science in the twenty first century and the present work applies multi and interdisciplinary perspectives to the important real world topics of justice conflict and wellbeing

**Psychology and the Other** David Goodman,Mark Freeman,2015

The figure of the Other is an important though underutilized vehicle for exploring and reconceptualizing classic psychological and philosophical issues from identity and purpose to human frailty and suffering Moreover it can be used to reorient inquiry toward aspects of the human condition that are often regarded as secondary or peripheral for instance our responsibility to others and to the environment A broad spectrum of disciplines including psychology philosophy theology and religious studies speak about the challenges we face in encountering the Other vis vis our receptivity openness and capacity to entertain the stranger in our midst Through constructive critical exchange Psychology and the Other engages such perspectives on the Other from various subdisciplines within psychology and related disciplines The volume uses the language of the Other as a vehicle for rethinking aspects of psychological processes especially within the therapeutic context As a group the contributors demonstrate that the language of the Other may be more fitting than the egocentric language frequently employed in psychology They also embrace the challenge to create new theories and practices that are more

ethically attuned to the dynamic realities of psychological functioning The book is organized into three sections The first deals with foundational philosophical concerns and provides an introduction to the project of thinking Otherwise The second section brings these fundamental philosophical concerns to bear on the therapeutic situation especially in the realm of relational psychoanalysis The final section of the book addresses concrete psychological situations in which the Other figures prominently and where the power of thinking Otherwise is most visibly demonstrated Hope in Health Alan
