Gendering Modern Japanese History Barbara Molony, Kathleen Uno, 2020-05-11 In the past quarter century gender has emerged as a lively area of inquiry for historians and other scholars and gender analysis has suggested important revisions of the master narratives of national histories the dominant often celebratory tales of the successes of a nation and its leaders Although modern Japanese history has not yet been restructured by a foregrounding of gender historians of Japan have begun to embrace gender as an analytic category The sixteen chapters in this volume treat men as well as women theories of sexuality as well as gender prescriptions and same sex as well as heterosexual relations in the period from 1868 to the present All of them take the position that history is gendered that is historians invariably perhaps unconsciously construct a gendered notion of past events people and ideas Together these essays construct a history informed by the idea that gender matters because it was part of the experience of people and because it often has been a central feature in the construction of modern ideologies discourses and institutions Separately each chapter examines how

Japanese have engendered their ideas institutions and society

Entitlement and the Affectional Bond Melvin J. Lerner, Gerold Mikula, 2013-06-29 If the truth were told this volume and its direct antecedents must rank among the most ambitious if not simply pretentious endeavors imaginable at least in the social sciences The titles of the volume and the chapters promising to integrate the experiences of the sense of justice and the affectional bonding of people in close relations seem straightforward and reasonable enough What they fail to convey however is the simple bald fact that we in the human social sciences have no firm grasp on either of these two fundamental experiences what we sometimes call love and justice To begin with even as scientists committed to understanding based upon systematic propositions linking publicly observable concepts we have no clear consensus concerning the nature of the affectional bonds linking people in close relationships love intimacy caring mutual responsiveness or the sense of justice fairness deserving and in our efforts to understand entitlement And we are continually handicapped stand these complex moving experiences by the persistent tendency to reduce them to manifestations of nothing but familiar psychological or even biological processes secondary rewards selfish genes So why then this volume Although there are many answers to the question probably the most germane is that the basic issues are so important and intriguing that the recent past has seen rather dramatic parallel growth in social scientists interest in these two areas justice and close relationships
