Recueil De Textes Relatifs A Lhistoire De Larchitecture Et A La Condition:

Disciplined Exuberance Linda Elaine Neagley, 2010-11-01 Recueil de textes relatifs à l'histoire de l'architecture et à la condition des architectes en France, au Moyen Age, XIe-XIIe siècles, 1929 *Carolingian and Romanesque Architecture, 800 to 1200* Kenneth John Conant, 1993-01-01 Professor Conant's detailed studies of Santiago de Compostela and of the abbey church at Cluny fit him for this account of building in the period of the round arch which preceded Gothic. In this volume he shows how at the instigation of the monasteries during the little renaissance of Charlemagne Roman methods of construction were revived and fused with local traditions to produce a distinctive Carolingian manner and how such monuments as the Palatine Chapel at Aachen already contained hints of the nobler and more mature Romanesque style which was to become international. Professor Conant extends his survey to cover the regions of medieval France Spain Portugal the Holy Land Italy Germany Northern Europe and Britain *French Gothic Architecture of the Twelfth and Thirteenth Centuries* Jean Bony, 2023-11-15 Gothic architecture is the most visible and striking product of medieval European civilization. Jean Bony whose reputation as a medievalist is worldwide presents its development as an adventure of the imagination allied with radical technical advances the result of a continuing quest for new ways of handling space and light as well as experimenting with the mechanics of stone construction. He shows how the new architecture came unexpectedly to be invented in the Paris region around 1140 and follows its history in the great cathedrals of northern France and dozens of other key buildings to the end of the thirteenth century when profound changes occurred in the whole fabric of medieval civilization. Rich illustrations including comprehensive maps enhance the text and themselves constitute an exceptionally valuable documentation. Despite its evident scholarly intention this book is not meant for specialists alone but is conceived as a progressive infiltration into the complexities of history at work revealing its unpredictable vitality to the uninitiated curious mind **Text** Arthur Kingsley Porter, 1923 **Romanesque Sculpture of the Pilgrimage Roads** Arthur Kingsley Porter, 1923 The Two Cities Malcolm Barber, 2004-08-02 First published to wide critical acclaim in 1992 *The Two Cities* has become an essential text for students of medieval history. For the second edition the author has thoroughly revised each chapter bringing the material up to date and taking the historiography of the past decade into account. *The Two Cities* covers a colourful period from the schism between the eastern and western churches to the death of Dante. It encompasses key topics such as the Crusades the expansionist force of the Normans major developments in the way kings emperors and Popes exercised their powers a great flourishing of art and architecture the foundation of the very first universities. Running through it all is the defining characteristic of the high Middle Ages the delicate relationship between the spiritual and secular worlds the two cities of the title. This survey provides all the facts and background information that students need and is defined into straightforward thematic chapters. It makes extensive use of primary sources and makes new trends in research accessible to students. Its fresh approach gives students the most rounded lively and integrated view of the high Middle Ages.
