Jain,2019-03-13 Mao Tse tung has dominated the Chinese domestic scene for well over four decades now Ever since the 1935 Tsunyi Conference he has been successful in asserting his leadership over the Chinese Communist Party and the People s Liberation Army the two main loci of power within China However in the process Mao has had to face many a challenge to his authority At times it appeared as if the reins of control over the Party and the PLA were slipping out of his hands and that the country was relapsing into a period of warlordism or head ing towards army dictatorship or rule by a Party hierarchy not loyal to Mao and his dogma But Chairman Mao has somehow managed to retain his supremacy over the major components of the Chinese political system by deposing or liquidating all those who dared usurp his throne Mao s successors are unlikely to have either the charismatic personality or the stature of the great helmsman Therefore what follows after Mao is a matter of great significance and acute concern for both the Chinese people and the world at large **Journal of the United States Artillery** ,1952 Select List of Recent Publications East-West Center. volume seeks to highlight that American images of China are responsible for constructing certain truths and realities about that country and its people. It also introduces the understanding that these images have always been inextricable from the enactment and justification of US China policies in Washington and that those policies themselves are active in the production and reproduction of imagery and in the protection of American identity when seemingly threatened by that of China. Demonstrating how past American images of China are vital to understanding the nature and significance of those which circulate today, Turner addresses three key questions: What have been the dominant American images of China and the Chinese across the full lifespan of Sino-US relations? How have historical and contemporary American images of China and the Chinese enabled and justified US China policy? What role does US China policy play in the production and reproduction of American images of China? Exploring and evaluating a wide-ranging variety of sources including films and television programmes, newspaper and magazine articles, the records and journals of politicians and diplomats, and governmental documents including speeches and legal declarations, this work will be of great interest to students and scholars of US foreign policy, American politics, China studies, and international relations.
