**Red Dwarf: Discovering the TV Series** Tom Salinsky, 2024-11-30 Explores the unique journey of the long running British sitcom detailing its creation cast changes and enduring legacy through critical analysis and behind the scenes insights Red Dwarf is virtually unique among British sitcoms It began in 1988 and was still releasing new episodes in 2020 making it one of the longest running sitcoms of all time but the core cast has remained largely unchanged And its science fiction flavor contrasts strongly with the drawing rooms and sofas which were the norm when it launched and the fast cut mockumentary style which is popular today And yet this is a show which nobody wanted to make and which only barely made it to our screens at all In this work Tom Salinsky will look at exactly how it came to be who was considered for the cast but didn't make it how it was radically reinvented for the third sixth seventh ninth and tenth seasons how it survived the breakup of its key creative partnership the loss of the original spaceship models BBC strikes the departure of a major cast member and the seemingly self defeating rules which the writers imposed on themselves But this isn't just a behind the scenes account It's also a detailed critical analysis examining why the best episodes succeed and why the less impressive episodes struggle while also finding time to ask just how a hologram made of light can smell burning camphor wood why a creature evolved from a cat is familiar with Wilma Flintstone or just how long Lister and Kochanski were dating for How can all this possibly be contained in one book It can't Volume I will cover the first six series and Volume II will conclude the story of Red Dwarf on television as well as looking at the novels comic strips computer games and more

**Activity in Red-Dwarf Stars** P.B. Byrne, M. Rodono, 2013-11-11 IAU Colloquium No 71 had its immediate origins in a small gathering of people interested in the optical and UV study of flare stars which took place during the 1979 Montreal General Assembly We recognized that a fundamental change was taking place in the study of these objects Space borne instruments especially IUE and Einstein and a new generation of ground based equipment were having a profound effect on the range of investigations it was possible to make To extract maximum benefit from these new possibilities it would be necessary as never before to have good communication with colleagues in other disciplines for instance with atomic and solar physicists Similarly studies of phenomena associated with the outer atmospheres of the late type stars could now hope to give significant insights into certain aspects of solar activity So in view of the wide range of backgrounds of those participating the meeting had an unusually high proportion of invited reviews while most of the contributed papers were presented as posters It is gratifying that in the short time since the meeting a good deal of correspondence has been received from participants remarking on the success of this format Once the decision had been taken in principle to hold the meeting a very considerable amount of work fell on the two organizing committees viz the Scientific and Local Organizing Committees The Scientific Organizing Committee was chaired by D J Mullan and consisted of A D

**Different Times** David Stubbs, 2023-07-27 They don't make comedy like they used to From the slapstick comedy of Charlie Chaplin and Stan Laurel the surrealism of Spike Milligan and Monty Python and the golden age of political incorrectness helmed by Benny Hill to the alternative scene that burst forth following the punk movement the hedonistic joy of Absolutely Fabulous the lacerating scorn of Jimmy Carr Ricky Gervais and Jo Brand and the meteoric rise of socially conscious stand up today comedy can be many things and it is a cultural phenomenon has come to define Britain like few others In Different Times David Stubbs charts the superstars that were in on the gags the unsung heroes hiding in the wings and the people who ended up being the butt of the joke Comedians and their work speak to and of their time drawing upon and moulding Britons relationship with their national history reflecting us as a people and simply providing raucous laughs for millions of people around the world Different Times is a joyous witty and insightful paean to British comedy [Reprints - National Radio Astronomy Observatory, Green Bank, W. Va](#) National Radio Astronomy Observatory (U.S.), 1971 Consists of reprints from various publications [Last Train to Hilversum](#) Charlie Connelly, 2019-01-24 Despite the all pervading influence of television ninety per cent of people in Britain still listen to the radio clocking up over a billion hours of listening between us every week It's a background to all our lives we wake up to our clock radios we have the radio on in the kitchen as we make the tea it's on at our workplaces and in our cars From Listen With Mother to the illicit thrill of tuning into pirate stations like Radio Caroline from receiving a musical education from John Peel or having our imagination unlocked by Douglas Adams The Hitchhiker's Guide to the Galaxy from school free summers played out against a soundtrack of Radio One and Test Match Special to more grown up soundtracks of the Today programme on Radio 4 and the solemn rhythmic intonation of the shipping forecast in many ways our lives can be measured in kilohertz Yet radio is changing because the way we listen to the radio is changing Last year the number of digital listeners at home exceeded the number of analogue listeners for the first time meaning the pop and crackle and the age of stumbling upon something by chance is coming to an end There will soon be no dial to turn no in between spaces on the waveband for washes of static mysterious beeps and faint distant voices The mystery will be gone we'll always know exactly what it is we're listening to whether it's via scrolling LCD on our digital radios the box at the bottom of our TV screen or because we've gone in search of a particular streaming station And so as the world of analogue listening fades Charlie Connelly takes stock of the history of radio and its place in our lives as one of the very few genuinely shared national experiences He explores its geniuses crackpots and charlatans who got us to where we are today and remembers its voices personalities and programmes that helped to form who we are as individuals

and as a nation He visits the key radio locations from history and looks at its vital role over the past century on both national and local levels Part nostalgic eulogy part social history part travelogue Last Train To Hilversum is Connelly's love letter to radio exploring our relationship with the medium from its earliest days to the present in an attempt to recreate and revisit the world he entered on his childhood evenings on the dial as he set out on the radio journey of a lifetime      **Nuclear**
