FX SWAP

A **foreign exchange swap** is a simultaneous purchase and sale, or vice versa, of identical amounts of one currency for another with two different value dates (normally **spot** to forward). The two parties agree a currency exchange on one day and simultaneously agree to unwind or reverse that deal on a date in the future. Effectively, each party is given the use of an amount of foreign currency for a specific time. Each party is taking a view on the relative movements of currencies and interest rates between those two dates, in comparison with their current relative prices. The price of a swap is quoted in forward points. The deal locks in the price of holding or taking delivery of an amount of foreign currency at a future date, or allows **arbitrage** between spot and forward rates.
