Reis, Series Editor, 2004-03-06 The expert guide to the differentiation of curriculum and instruction for the gifted and talented Drawing many comparisons and contrasts between gifted and general education best practices the articles in this volume highlight the many benefits of

flexible instruction and curriculum discuss impediments to the successful adoption of differentiation in classrooms and school districts and show how educators can overcome these obstacles collaboratively Key features include Overview and thought provoking commentary by Carol Ann Tomlinson a national leader in differentiation strategies A view of differentiation through multiple lenses and the actual and potential benefits gifted and general education derive from its implementation Eleven influential articles from leading researchers and educators in the field of differentiation Within this valuable reference guide readers will also find specific models general curriculum guidelines specific instructional strategies and other tools and methods that will help them monitor learner needs and adapt curriculum accordingly The ERGE Series The National Association for Gifted Children series Essential Readings in Gifted Education is a 12 volume collection of seminal articles from Gifted Child Quarterly Put the knowledge and power of more than 25 years of research on giftedness and talent into your hands with the leading theories studies and findings the experts in the field have to offer *African American Psychology* Faye Z. Belgrave, Kevin Wendell Allison, Camilla W. Nonterah, 2025-08-18 *African American Psychology* From Africa to America provides a comprehensive and integrated introduction to the field The Fifth Edition presents recent advances and developments in African American psychology including new coverage of systematic and institutional racism Black empowerment COVID 19 s impact on Black communities and increased attention to heterogeneity within the Black community **Rethinking Gifted Education** James H. Borland, 2003-01-01 Gifted education is in a period of transition unlike any it has experienced in this generation Thinkers within the field and without are questioning the practice of gifted education the theoretical foundations on which this practice rests and even the value and legitimacy of the concept of giftedness This fresh and provocative volume contains essays by leading thinkers on gifted education and by writers outside the field who have examined it critically Each author examines reconsiders and challenges the assumptions and beliefs underlying the theory and practice of gifted education providing a roadmap to guide both current considerations of and future planning for gifted education programs **Expanding Definitions of Giftedness** Guadalupe Valdes, 2014-04-04 This book is about bilingual young people who have been selected by their families to carry out the hard work of interpreting and translating to mediate communication between themselves and the outside world between minority and majority communities It examines the experiences of these young interpreters and the skills they develop in order to fulfill this role The authors purpose in this volume is to contribute to extending current definitions of gifted and talented by proposing and offering evidence that the young people who are selected to serve as family interpreters perform at remarkably high levels of accomplishment when compared with others of their age experience and environment and should thus clearly be included in the 1993 U S federal definition of giftedness They maintain that not only are these capabilities currently overlooked by existing assessment procedures but also that there is little understanding of the ways in which the unique talents of young interpreters might be nurtured and developed in academic settings A strong case is made that in order for such students to

be identified as gifted on the basis of their bilingual abilities the field of gifted and talented education must embrace the concept that bilingualism is a strength The field must also make developing bilingualism a focus of programs designed to meet the needs of the increasingly multilingual student population in the United States The research this book reports part of a larger five year study of giftedness through linguistic and cultural lenses funded by OERI through the National Research Center on the Gifted and Talented was conducted by researchers whose background is very much outside the field of gifted education Rather their focus is on language working within the traditions of qualitative sociolinguistics Thus this book offers a unique approach to the exploration of giftedness It asks researchers and practitioners ordinarily accustomed to working with quantitative data to examine and make sense of detailed and rich analyses of students linguistic performance and argues that it is only by understanding the challenges of such bilingual interactions that the field of gifted and talented education can expand and reframe its vision of giftedness

Retaining African Americans in Higher Education Lee Jones, 2023-07-21 Retention of African Americans on campus is a burning issue for the black community and a moral and financial one for predominantly white institutions of higher education This book offers fresh insights and new strategies developed by fifteen scholars concerned by the new climate in which affirmative action is being challenged and eliminated This is the first book devoted specifically to retention of African Americans in higher education and is unique in addressing the distinct but inter related concerns of all three affected constituencies students faculty and administrators Each is considered in a separate section The student section shifts attention from to paraphrase McNairy fixing the student to focussing on higher education s need to examine and where appropriate revise policies curriculum support services and campus climate Responding to the new agenda shaped by the opponents of affirmative action but rejecting the defensive x percent solutions espoused by its proponents this book puts forward new solutions that will provoke debate Section II begins with a survey of the literature on African American administrators and presents a Delphi study of twelve administrators to provide an understanding of pathways and barriers to success The contributors then consider the importance of developing community support and creating alliances the role of mentoring and the setting of clear expectations between the individual and the institution Starting with the recognition that African Americans represent less than five percent of full time faculty the chapters in the final section examine the effects of the dismantling of affirmative action the consequences of faculty salaries trailing more lucrative non academic employment the declining enrollment of students of color the politics of promotion and tenure and issues of identity and culture The book concludes by stressing the roles that parents faculty and administrators must play to empower African American students to take responsibility for their own academic performance This is a compelling controversial and constructive contribution to an issue of national importance
