

NCLEX-PN Review Questions - Chapter 08

[Overview](#)[Incorrect](#)[Correct](#)

Question 2 of 10

A nurse who is caring for a mentally ill client establishes a supportive and honest relationship with the client and maintains client confidentiality. This is an example of which principle of mental health care?

Encourage situational withdrawal.

The development of mutual trust between mental health care providers and clients is important for successful management of mental illness. The development of trust between clients and caregivers involves three concepts: caring, empathy, and advocacy. Exploration of behaviors and emotions, not avoidance, is a principle of mental health care. Encouragement of responsibility, not dependence, is a principle of mental health care. Encouragement of effective adaptation, not withdrawal, is a principle of mental health care.

Encourage dependence.

The development of mutual trust between mental health care providers and clients is important for successful management of mental illness. The development of trust between clients and caregivers involves three concepts: caring, empathy, and advocacy. Exploration of behaviors and emotions, not avoidance, is a principle of mental health care. Encouragement of responsibility, not dependence, is a principle of mental health care. Encouragement of effective adaptation, not withdrawal, is a principle of mental health care.

Develop mutual trust.

The development of mutual trust between mental health care providers and clients is important for successful management of mental illness. The development of trust between clients and caregivers involves three concepts: caring, empathy, and advocacy. Exploration of behaviors and emotions, not
