Aflatoxins Lukman Abdulra`uf, 2022-02-09 Aflatoxins are a group of highly toxic and carcinogenic substances that occur naturally and can be found in food substances Aflatoxins are secondary metabolites of certain strains of fungi *Aspergillus flavus* and *Aspergillus parasiticus* as well as the less common *Aspergillus nomius* Aflatoxins B1 B2 G1 and G2 are the most important members which can be categorized into two groups according to chemical structure As a result of the adverse health effects of mycotoxins their levels have been strictly regulated especially in food and feed samples Therefore their accurate identification and determination remain a herculean task due to their presence in the complex food matrix The great public concern and the strict legislation incited the development of sensitive analytical methods that are discussed in this book

Diatom Ecology Nora I. Maidana, Magdalena Licursi, Eduardo Morales, 2024-10-08 This book offers a comprehensive unique and up to date exploration of diatom ecology spanning from fundamental molecular aspects to the intricate dynamics of metacommunities In recent years there has been a considerable increase in the amount of research devoted to diatom ecology with a wide spectrum of approaches This large amount of information published in many different journals and books makes it very difficult to keep up to date both for the trained researcher and for students Eduardo A Morales d May 2023 had the original idea to assemble chapters on various subjects within diatom ecology The questions he posed to potential contributors framed the current book consisting of 12 chapters Are diatoms suitable tools for ecological restoration What would be the features that make them reliable in this context What makes diatoms ecologically successful

In an ecological sense why is there such variability in diatom reproductive strategies and why are they worth considering What do new approaches in ecological synthesis provide to diatom ecology biogeography and metacommunities Are all diatoms widely spread and each species uniquely characterized by its own unaltered phenotype Can we really make any ecological consideration without knowing with a high degree of certainty the identity of taxa Are urban ecosystems important repositories of biodiversity What are the benefits and the progress in diatom ecology made by the diatom guild perspective Why how and when are soil diatoms used in bioindication and what are the benefits of such an approach Are diatoms bona fide indicators of climate change Are diatom communities in temporary rivers important for these lotic ecosystems as they are subjected to the effects of climate change Do diatoms in peatlands behave differently from their terrestrial and aquatic rivers lakes others counterparts Audience The book is intended primarily for professionals in the fields of diatom research algal research phycology organismal population and community ecology limnology microbiology organismal biology paleoecology and paleolimnology The book will also serve as a reference for graduate students seeking guidance on terminology techniques and current methods in diatom research

Environmental Compliance and Sustainability Daniel Rogers,2019-11-04 This book provides a critical understanding of the challenges that exist in protecting the local and global environment through compliance efforts using existing environmental regulations The best compliance measures with the most useful regulations from over 50 countries are surveyed and are combined with science based quantitative analysis of geology hydrogeology and the chemistry of contaminants from anthropogenic sources The results are presented as a model that establishes a means by which protection of the environment can be greatly improved This is accomplished through a deeper understanding of our natural world and how anthropogenic activities and their management affect our planet Features The first book that examines the successes of environmental regulation worldwide and highlights the areas that need improvement Presents a tested and verified scientific model for enhanced environmental protection with scalability from local parcels to global levels Describes and integrates the importance of understanding the geologic and hydrogeologic environment of urban and developed areas Explains the importance of understanding the different types of pollution and their behavior in the environment Identifies the need for consistency in banning chemicals that are harmful in not just one country but throughout the world
