Religious Studies and Rabbinics Elizabeth Alexander, Beth Berkowitz, 2017-09-08 Religious Studies and Rabbinics have overlapping yet distinct interests subject matter and methods Religious Studies is committed to the study of religion writ large It develops theories and methods intended to apply across religious traditions Rabbinics by contrast is dedicated to a defined set of texts produced by the rabbinic movement of late antiquity Religious Studies and Rabbinics represents the first sustained effort to create a conversation between these two academic fields In one trajectory of argument the book shows what is gained when each field sees how the other engages the same questions When did the concept of religion arise How should a scholar s normative commitments interact with their scholarship The book argues that if scholars from Religious Studies and Rabbinics do not realize they are addressing the same problems they will not benefit from each other s solutions A second line of argument brings research methods theoretical claims and data associated with one field into contact with those of the other When Religious Studies categories such as ritual or the sacred are applied to data from Rabbinics and conversely when text reading strategies distinctive to Rabbinics are employed for texts from other traditions both Religious Studies and Rabbinics enlarge their scope The chapters range across such themes as ritual failure rabbinic conceptions of scripture ethics food time and everyday life problems of definition and normativity in the study of religion J Z Smith s writings and the preaching of the African American Christian evangelical social justice activist John Perkins With chapters written by world class theorists of Religious Studies and prominent text scholars of Rabbinics the book provides a unique opportunity to expand the conceptual reach and scholarly audience of both Religious Studies and Jewish Studies

The companion website hosts a wealth of further resources to enhance the learning experience.

Dance As Religious Studies Douglas G. Adams, Diane Apostolos-Cappadona, 2001-04-05 Dance as religious studies reveals resources for the art of liturgical dance in terms of both performance and scholarly interpretation. This collection of methodological essays has been arranged to suggest the wide spectrum and the underlying unity of these diverse and varied approaches to understanding dance as religious studies. Part I concentrates on the relationship between liturgical dance and the scriptural traditions of Judaism and Christianity. Part II indicates the feminist possibilities for liturgical and modern dance. Part III presents a spectrum of the contemporary theory and practice of liturgical dance. The book concludes with a bibliographic survey of sources and resources available to both liturgical dancers and students of dance as religious studies.

The Religious Studies Skills Book Eugene V. Gallagher, Joanne Maguire, 2018-12-13 Studying religion in college or university. This book shows you how to perform well on your course tests and examinations, write successful papers and participate meaningfully in class discussions. You'll learn new skills and also enhance existing ones which you can put into practice with in-text exercises and assignments. Written by two award-winning instructors, this book identifies the close reading of texts, material culture and religious actions as the fundamental skill for the study of religion at undergraduate level. It shows how critical analytical thinking about religious actions and ideas is founded on careful, patient yet creative reading of religious stories, rituals, objects and spaces. The book leads you through the description, analysis and interpretation of examples from multiple historical periods, cultures and religious traditions, including primary source material such as Matthew 6:9-13, the Lord's Prayer, the Gohonzon scroll of the Japanese new religion Soka Gakkai and the pilgrimage to Mecca (hajj). It provides you with typical assignments you will encounter in your studies, showing you how you might approach tasks such as reflective, interpretive or summary essays. Further resources found on the book's website include bibliographies and links to useful podcasts.

OCR Religious Studies A Level Year 2 Michael Wilkinson, Michael Wilcockson, 2017-11-06 Exam Board OCR Level A level Subject Religious Studies First Teaching September 2016 First Exam June 2018 An OCR endorsed textbook. Help students to build their subject knowledge and understanding with guidance and assessment preparation from a team of

subject specialists brought to you by the leading Religious Studies publisher and OCR's Publishing Partner Develops students understanding of Philosophy of religion and Religion and ethics through accessible explanations of key theories and terms Enables you to teach Developments in Christian thought confidently with comprehensive coverage of the key theological arguments Supports assessment preparation with sample questions and revision advice written by subject specialists Encourages students to reflect on their learning and develop their own ideas Helps to extend learning and enhance responses with suggested ideas and additional reading Content covered Philosophy of religion Religion and ethics Developments in Christian thought Scepticism, Relativism, and Religious Knowledge Michael G Harvey, 2014-09-25 Scepticism Relativism and Religious Knowledge shows where responses to scepticism and relativism by Karl Barth and Reformed epistemology have led to impasses and reconstructs their insights in a robust response that does not depend on making excessive claims about our epistemic capacities This response is based on a nuanced conception of the relationship between trust doubt faith and reason and a Kierkegaardian perspective on religious knowledge that stresses the role of the will and the intellectual and theological virtues This book will appeal to those with an interest in the deep and often difficult questions of religion and philosophy particularly regarding matters of truth doubt and belief **In Search of Origins** Garry Trompf, 2005-01-01 Religion is an integral part of our life The answer to the question what is religion is subjective Since the word religion and its cognates are common coinage across the literate world most of us will have a fair appreciation of the term's connotations Considering students and scholars alike are lacking an introductory textbook on the origins of religion in modern Western theory and archaeological practice this work is designed to fill the lacuna Historians of ideas and social science are often not clear as to how any given theory of religion might pertain to the known archaeological record while exponents of prehistoric religion have worked with surprisingly narrow definitions of religious life Many will locate the kernel of the matter in practice or in an active spirituality Today the pressures of the global village have forced many of us to take off our blinkers and do some cross cultural homework Religious Studies has emerged as an academic discipline or intellectual pursuit with one of its functions being to facilitate mutual understanding between traditions and to ensure that the varieties of religious belief and experience are fairly appraised The series of which this book is a part will be historically rather than theologically oriented This book will cover such a vast area for investigation and it is designed to help students find their own way through the forest pick the trees which interest them and learn how to scrutinise them in depth Religious Studies is a multi disciplinary activity and one is encouraged to turn over as many stones as possible to look at religions from as many different angles as possible the psychological anthropological sociological geographical ecological political economic and the like with some awareness of current theological debates as well This book gives scope to the comparative method and all the great religions are treated side by side with points of comparison and contrast drawn This book begins with the large question of the origins and prehistory of religion including the bearing anthropological study has on this question

before giving space to the larger traditions themselves The comparative method is applied not only between such enormous aggregates of phenomena as let us say Buddhism and Islam but between these and small scale tribal traditions as well The book highlights that some religions will be difficult to separate from cultures because they amount to a total way of life An attempt is made to try to interpret religion both as culture and as a distinctive set of forces in interaction with culture or perhaps even against prevailing cultural forms This book has been designed to help students find for themselves possible answers to existential or theological questions but only as a side effect to historical and phenomenological study and as the author says provide no such answers on a platter
