Barton Cunningham, 2001-05-30 Emerged from the Lewinian tradition of research into organizational behavior motivation and change here is a conceptual but practical way for HR professionals and others in today's organizations to understand better more quickly and reliably what the underlying human problems in their organizations are Cunningham proceeds from the conviction that the key to solving organizational problems is in the hands of people and that when people talk about the problems they experience they are reflecting their values and beliefs The way to get people to do that is through a style of inquiry called indirect questioning the Echo approach This approach which managers and executives in all types of organizations will find helpful and extensively useful is the subject of Cunningham's examination The Echo approach is designed to bring to the surface and measure the values and beliefs held by a group of people and the organizations they comprise Cunningham illustrates how this approach works how to design interviews surveys and observations that actually echo people's values and beliefs the obvious ones and those they keep hidden Readable well illustrated with cases and examples this book will help executives at all levels understand better what people in these organizations are actually thinking and saying In doing so it will help organizations become more productive and be more desirable places to work
