Revolution In World Politics:

The Revolution in World Politics Morton A. Kaplan, 1962 *Revolution and World Politics* Fred Halliday, 1999-08-23

The relation of revolutions to international relations is central to modern history. Revolutions have as much as war or nationalism shaped the development of world politics. Equally, revolutions have been in cause, ideology and consequence international events. By putting the international politics of revolution centre stage, Fred Halliday's book makes a major contribution to the understanding of both revolution and world politics. *Revolution and International Politics* Peter Calvert, 1996. Presenting an analysis of the role of revolution in international politics, this edition takes account of developments since the first edition was published in 1984, such as the dramatic changes in Eastern Europe and the Soviet Union between 1989 and 1991, and the re-evaluation by a number of scholars of the French Revolution. This is followed by various revisionist studies of revolution itself. The book incorporates recent work in the field which calls for some significant changes of emphasis in order to understand the nature of international politics today. International relations as a discipline has moved away from state-centred theory; the new emphasis is on globalization, interdependence and the importance of non-state actors. **Political Islam, World Politics and Europe** Bassam Tibi, 2014-07-11. The new and updated edition of *Political Islam, World Politics and Europe* focusses on the shift within political Islam in light of 9/11 and the events of the Arab Spring, from a jihadist struggle to institutional Islamism. Refuting what has often been referred to by commentators as the moderation of Islamism, the second edition of this book introduces the concept of institutional Islamism, a process which Tibi argues was accelerated in the aftermath of the Arab Spring. Both jihadist and institutional Islamism pursue the same goal of an Islamist state but disagree fundamentally on the strategy for achieving it. Whilst jihadism is committed to the idea of a violent Islamic world revolution, institutional Islamism embraces political institutions as a means to an end. Turning to the events of the Arab Spring in Tunisia, Libya and Egypt, this book attempts to determine whether an abandonment of violence is enough to underpin a shift to genuine democracy. Analysing the fall of Morsi in particular, Tibi questions what lessons can be learnt from his presidency and argues that this event will not change the overall trend of development from jihadism to institutional Islamism. A timely addition to existing literature, this book will be of interest to students and scholars studying Middle Eastern and European Politics, Political Islam and International Relations. World Politics Jeffrey Haynes, Peter Hough, Shahin Malik, Lloyd Pettiford, 2013-09-13. From the war on terror to the global financial crisis, traditional concepts of world politics are being challenged on a daily basis. In these uncertain times, the study of international relations and the forces that shape them have never been more important. Written specifically for students who are approaching this subject for the first time, *World Politics* is the most accessible, coherent and up-to-date account of the field available. It covers the historical backdrop to today's political situations, the complex interactions of states and non-state actors, the role of political economy, human security in all its forms and the ways in which culture, religion and identity influence events. *World Politics*

takes a new approach that challenges traditional interpretations and will equip students with the knowledge and the confidence needed to tackle the big issues

Revolution and International Politics Peter Calvert, 2016-10-06 This book aims to present an analysis of the role of revolution in international politics Concerning itself with the time frame from the French Revolution up to the fall of the Iron Curtain this book covers the study of revolution itself the importance of globalisation interdependence and non state actors and the change in the nature of international politics theory

The Revolution in World Politics Morton A. Kaplan, 1962

Revolution and World Order David Armstrong, 1993-06-10 In this important study David Armstrong examines the impact of revolutionary states on the international system These states have always posed major problems for the achievement of world order revolution is often accompanied by international as well as civil conflict while revolutionary doctrines have proven to be highly disruptive of the existing structure of international politics Dr Armstrong asks whether revolutionary states are socialized into adopting acceptable patterns of international behaviour or whether it is international society that is forced to change when these new states appear He looks in detail at the French American and Russian revolutions and at several post 1945 revolutionary states he also examines the relationship between revolutionary states and the principal ordering devices of international society international law diplomacy and the balance of power His book is a major contribution to international relations and an important development and application of the international society concept

Ideologies in World Politics Klaus-Gerd Giesen, 2020-09-02 Political ideologies shape the behaviour of states international institutions terrorist groups political elites non governmental organisations and other international actors The book analyses how the most important of them affect today s world politics and contribute to build a new and complex world order

Rethinking World Politics Philip G. Cerny, 2010-03-24 Rethinking World Politics is a major intervention into a central debate in international relations how has globalization transformed world politics Most work on world politics still presumes the following in domestic affairs individual states function as essentially unified entities and in international affairs stable nation states interact with each other In this scholarship the state lies at the center it is what politics is all about However Philip Cerny contends that recent experience suggests another process at work transnational neopluralism In the old version of pluralist theory the state is less a cohesive and unified entity than a varyingly stable amalgam of competing and cross cutting interest groups that surround and populate it Cerny explains that contemporary world politics is subject to similar pressures from a wide variety of sub and supra national actors many of which are organized transnationally rather than nationally In recent years the ability of transnational governance bodies NGOs and transnational firms to shape world politics has steadily grown Importantly the rapidly growing transnational linkages among groups and the emergence of increasingly influential even powerful cross border interest and value groups is new These processes are not replacing nation states but they are forging new transnational webs of power States he argues are themselves increasingly trapped in these webs After mapping out the dynamics behind contemporary world politics Cerny

closes by prognosticating where this might all lead Sweeping in its scope Rethinking World Politics is a landmark work of international relations theory that upends much of our received wisdom about how world politics works and offers us new ways to think about the forces shaping the contemporary world
