Children's Creative Spelling Charles Read, 2018-06-04 In this study originally published in 1986 Professor Charles Read examines the ways in which pre school and primary children create spellings or misspellings as they appear to be He focuses on the hidden phonetic bases for some frequent patterns in young children s spelling both in and out of school Professor Read examines children s spelling in other languages Dutch French Spanish as well as in various dialects of English in order to see the influence of other sets of speech sounds and other standard spelling systems Overall the evidence suggests that children are very much affected by phonetic characteristics as they tend to spell alike certain classes of speech sound which are indeed phonetically similar In devising spellings children can be remarkably independent and inventive in an activity which for adults is anything but creative and Professor Read suggests ways in which educators can build upon this creativity
