Handbook of Family Violence Alan S. Bellack, Michel Hersen, R.L. Morrison, Vincent B. Van Hasselt, 2013-06-29 In the last decade there has been heightened clinical and investigative activity in the area of family violence This of course is partly attributable to recent surveys showing a high incidence of family violence in the United States For example there are indications that nearly 30% of married women in this country are victims of physical abuse by spouses at some point in their marriage Further FBI statistics show that approximately 13% of all homicides are husband wife killings Moreover it has been projected that such figures are likely to increase over the next several years Consistent with these trends funding of family violence research by both federal and private agencies has increased Indeed federal agencies such as the National Institute of Mental Health and the National Institute of Law Enforcement and Criminal Justice have provided considerable support for work in this area In addition family violence particularly wife battering child abuse and sexual abuse of children has been the focus of media attention at the national level and has generated intensive interest in both lay and professional publications Moreover there have been several recent governmental hearings and investigations regarding the prevalence of these problems

contributor considers the relevant knowledge concerning pathogenic mechanisms and pathological characteristics of one or more family types and describes the different family therapy approaches used to treat them *Identifying and Treating Sex Offenders* Robert Geffner, 2004 *Identifying and Treating Sex Offenders Current Approaches Research and Techniques* brings you up to date on the latest significant issues and state of the art tools involved in the evaluation and treatment of adult sex offenders Experts in the field discuss controversial topics including diagnoses classification public notification and risk assessment to help psychologists therapists and social workers better understand and work with this specialized population This book also contains accurate information about sex offender statistics and research for policymakers to use in creating policies and legal statutes that successfully deter recidivism in known sex offenders **Rape** Joanna Bourke, 2009-06-30 Joanna Bourke takes the issue of rape out from the academic ghettos and distills the truth so often exploited to sell newspapers Neither prurient nor overly sympathetic she investigates rape from a historical standpoint examining the history of sexual aggression the idea of rape as a social construct and the often ignored idea of embodiment and analyzes the physical response of rapists as well as the often cited rape is about power theories Indebted to a growing body of sophisticated feminist analyses about rape victims Bourke here shifts the emphasis from the victims to the perpetrators in order to place rapists in their historical context An invaluable study this book delivers the hard truth that if we are to imagine a world free of unwanted sexual violence then we must consider the issue of rape from every angle **The Psychobiology of Consciousness** Richard Davidson, 2012-12-06 CONSCIOUSNESS AND THE BRAIN SELF REGULATION PARADOX The relationship of consciousness to biology has intrigued mankind throughout recorded history However little progress has been made not only in understanding these issues but also in raising fundamental questions central to the problem As Davidson and Davidson note in their introduction William James suggested almost a century ago in his *Principles of Psychology* that the brain was the organ of mind and behavior James went so far as to suggest that the remainder of the *Principles* was but a footnote to this central thesis This volume brings together diverse biobehavioral scientists who are addressing the various aspects of the mind|brain|body|behavior issue Although some of the authors have previously published together in other volumes by and large the particular combination of authors and topics selected by the editors makes this volume unique and timely Unlike the *Consciousness and Self Regulation* series Schwartz Shapiro 1976 1978 also published by Plenum this volume is devoted entirely to a psychobiological approach to consciousness Although readers will differ in their interest in specific chapters the well rounded investigator who is concerned with the psychobiology of consciousness will want to become intimately acquainted with all the views presented in this volume As noted by the individual contributors the topic of this volume stimulates fundamental questions which on the surface may appear trivial yet on further reflection turn out to have deep significance Disgrace Joanna Bourke, 2022-09-26 Looking across time and the globe a critical history of sexual violence what causes it and how we overcome it *Disgrace* is the first truly global history of sexual violence

The book explores how sexual violence varies widely across time and place from nineteenth century peasant women in Ireland who were abducted as a way of forcing marriage to date raped high school students in twentieth century America and from girls and women violated by Russian soldiers in 1945 to Dalit women raped by men of higher castes today It delves into the factors that facilitate violence including institutions ideologies and practices but also gives voice to survivors and activists drawing inspiration from their struggles Ultimately Joanna Bourke intends to forge a transnational feminism that will promote a more harmonious equal and rape and violence free world Sexual Behavior Merton Sandler, Gian Luigi Gessa, 1975

Masculinities in the Criminological Field Ingrid Lander, Signe Ravn, 2016-05-06 Over recent decades criminological research has changed from a gender blind discipline which equated crime with men and thus ignored questions about gender to an approach that studied gender by showing statistical differences between men and women and then finally to a more inclusive and elaborate gender theoretical approach to crime and crime control However despite this development research on gender and in particular research on gendered norms and

the construction and enactment of masculinities within the criminological field has been unable to keep up with developments in gender research Since 1990 only a few anthologies with a gender theoretical orientation focusing on masculinities within the criminological research field have been published Many of the theoretical developments in gender research still have difficulties in reaching into mainstream criminology partly because such developments are often published in feminist and or gender theoretical journals This volume both problematizes and renders visible conceptions and norms regarding male behaviour and masculinities and shows how these affect the criminological field through providing a theoretically sound and clear gender perspective to this field of research With sections based around the following three themes negotiations of masculinity in institutional settings vulnerable masculinities and risk taking and masculinities this volume will be of interest to scholars of criminology sociology social work and gender studies as well as policy makers and law enforcement professionals
