Laumann, Stephen Ellingson, Jenna Mahay, Anthony Paik, 2005-11-21 We think of the city as a place where anything goes Take the sensational fantasies and lurid antics of single women on Sex in the City or young men on Queer as Folk and you might imagine the city as some kind of sexual playground a place where you can have any kind of sex you want with whomever you like anytime or anywhere you choose But in *The Sexual Organization of the City* Edward Laumann and company argue that this idea is a myth Drawing on extensive surveys and interviews with Chicago adults they show that the city is to the contrary a place where sexual choices and options are constrained From Wicker Park and Boys Town to the South Side and Pilsen they observe that sexual behavior and partnering are significantly limited by such factors as which neighborhood you live in your ethnicity what your sexual preference might be or the circle of friends to which you belong In other words the social and institutional networks that city dwellers occupy potentially limit their sexual options by making different types of sexual activities relationships or meeting places less accessible To explain this idea of sex in the city the editors of this work develop a theory of sexual marketplaces the places where people look for sexual partners They then use this theory to consider a variety of questions about sexuality Why do sexual partnerships rarely cross racial and ethnic lines even in neighborhoods where relatively few same ethnicity partners are available Why do gay men and lesbians have few public meeting spots in some neighborhoods but a wide variety in others Why are African Americans less likely to marry than whites Does having a lot of friends make you less likely to get a sexually transmitted disease And why do public health campaigns promoting safe sex seem to change the behaviors of some but not others Considering vital questions such as these and shedding new light on the city of Chicago this work will profoundly recast our ideas about human sexual behavior Adult-Gerontology Practice Guidelines Jill C. Aisen,2013-03-09 This well written text thoroughly addresses two quality of life issues in patients with a variety of neurological disorders sexual and reproductive function The de vasta stating effects of a variety of neurological diseases are well known to both the lay and medical communities and are treated in numerous texts However as we continue to experience therapeutic breakthroughs in the tielofs of neurology and rehabilitation medicine physicians and patients must become more aware of the issues discussed in this text It is particularly important as emphasized throughout the chapters that the physician or therapist initiate conversations with the patients concerning both the possibility of parenting a child as well as the ability of the patient to enhance his her sexual functioning Commonly in the patient who is otherwise perfectly normal there is a reluctance to discuss these topics and couples often feel embarrassed to initiate a conversation with their physi cians This reluctance to initiate a discussion is even more apparent in patients with a variety of neurological disorders in which there are overriding fears concerning both function and survival as well as deep concerns about their own attractiveness and their sexual and repro ductive ability Sex Without Consent Shireen J Jejeebhoy,Iqbal Shah,Shyam Thapa,2013-07-04 The pressing need to break the silence on non consensual sex among young people an issue shrouded by denial underreporting and stigma is self evident Despite the growing body of research regarding young people s sexual behaviours the study of coercive sexual experiences has generally been overlooked by both researchers and national programmes Available evidence has been scattered and unrepresentative and despite this evidence non consensual sex among young people is perceived to be a rare occurrence This volume dispels any such misconception It presents a disturbing picture of non consensual sex among girls as well as boys and among married as well as unmarried young women in a variety of settings This volume documents moreover the expanse of non consensual experiences that young people face from unwanted touch to forced penetrative sex and gang rape Although the focus is on young females the volume also sheds light on the experience of young males as both victims and perpetrators This pioneering volume highlights key factors placing young people at risk whilst outlining the significant distinctive health and social implications they face Sex Without Consent also documents the unsupportive and sometimes abusive or negligent roles of families teachers health care providers and law enforcement agents outlines promising efforts intended to prevent non consensual sex or support survivors and argues for profound changes in norms and values that tolerate or encourage non consensual sex The editors

based at the Population Council New Delhi the World Health Organization Geneva and Family Health International Virginia argue compellingly for a radical review and reform of existing programmes designed to prevent this kind of abuse and to support young survivors of sexual trauma in the developing world Addressing the magnitude determinants and consequences of sex without consent this volume provides evidence based directions for programming **Invisible No More** Pedro Noguera,Aída Hurtado,Edward Fergus,2013-06-17 This groundbreaking interdisciplinary volume addresses the dearth of scholarship and information about Latino men and boys to further our understanding of the unique challenges and obstacles that they confront during this historical moment
