Sexual Pathways Adapting To Dual Sexual Attraction:

Sexual Pathways Mark J. Williams, 1999-03-30 Sexual Pathways introduces the topic of bisexuality a subject largely misunderstood Persons who display dual sexual attraction experience some form of erotic fulfillment with both same sex and opposite sex partners They may or may not identify themselves as bisexual but during significant periods of their life span they act bisexually Studies of human sexuality world wide indicate the incidence of bisexuality ranges from high to low prevalence in all literate and many nonliterate societies To better understand the bisexual perspective the author presents interviews with 30 men and women Each describes his or her sexual pathway from birth to adulthood portraying the construction of a lifestyle that incorporates a bisexual perspective

The Course of Gay and Lesbian Lives Bertram J. Cohler, Robert M. Galatzer-Levy, 2000-08 The authors argue that there is little support for assuming that homosexuality has a biological basis Recognizing the many pathways that lead to same gender sexual orientation the authors conclude that the cause is much less important than understanding the meaning of being homosexual

Matlin,2004 Appropriate for students from a wide variety of backgrounds this comprehensive text captures women s own experiences through direct quotations and an emphasis on empirical research [Dual Attraction](#) Martin S. Weinberg,Colin J. Williams,Douglas W. Pryor,1995-06-01 For the past two generations extensive research has been conducted on the determinants of homosexuality But until now scant attention has been paid to what is perhaps the most mysterious and potentially illuminating variation of human sexual expression bisexuality Today as ignorance and fear of AIDS makes greater awareness of all forms of sexual behavior an urgent matter of private and public consequence leading sex researchers Martin Weinberg Colin Williams and Douglas Pryor provide us with the first major study of bisexuality Weinberg Williams and Pryor explore the riddle of dual attraction in their study of 800 residents of San Francisco Fieldwork intensive interviews and surveys provided a wealth of data about the nature of bisexual attraction the steps that lead people to become bisexual and how sexual preference can change over time They found that heterosexuals more often than homosexuals become bisexual that bisexual men and women differ markedly in their sexual behavior and romantic feelings that most bisexuals ultimately settle into long term relationships while continuing sexual activity outside those relationships and they also explain why transsexuals often become bisexual Moreover the authors discovered that as the AIDS crisis unfolded many bisexual men entered into monogamous relationships with women and bisexual women into more lesbian relationships Recent media accounts attest that a growing number of researchers and writers are narrowing the fundamental cause of sexual preference to a single factor biology But if as this study shows learning plays a significant part in helping people traverse the boundaries of gender if past and present intimate relationships influence their changing preferences and if bisexual activity is inseparable from a social environment which provides distinctive sexual opportunities then a mosaic of

factors far more complex than those previously considered must be entertained in explaining the fuller spectrum of sexual preferences Dual Attraction is one of the most significant contributions to our understanding of sexuality since the original Kinsey reports and Bell and Weinberg's 1978 international bestseller *Homosexualities* It is must reading for all those interested in the study of sexual behavior especially now since the onset of AIDS
