evidence to guide practice **International Handbook of Love** Claude-Hélène Mayer, Elisabeth Vanderheiden, 2021-05-04
This handbook is the winner of the William B Gudykunst Award for Outstanding Book in 2023 given by the International
Academy of Intercultural Research This handbook includes state of the art research on love in classical modern and
postmodern perspectives It expands on previous literature and explores topics around love from new cultural intercultural
and transcultural approaches and across disciplines It provides insights into various love concepts like romantic love agape
and eros in their cultural embeddedness and their changes and developments in specific cultural contexts It also includes
discussions on postmodern aspects with regard to love and love relationships such as digitalisation globalisation and the
fourth industrial revolution The handbook covers a vast range of topics in relation to love aging health special needs sexual
preferences spiritual practice subcultures family and other relationships and so on The chapters look at love not only in
terms of the universal concept and in private intimate relationships but apply a broad concept of love which can also for
example be referred to in postmodern workplaces This volume is of interest to a wide readership including researchers
practitioners and students of the social sciences humanities and behavioural sciences In the 1970s through the 90s I was told
that globalization was homogenizing cultures into a worldwide monoculture This volume as risky and profound as the many
adventures of love across our multiplying cultures are proves otherwise The authors revolutionary and courageous work will
challenge our sensibilities and expand the boundaries of what we understand what love is But that s what love does It
communicates what is offers what can be and pleads for what must be I know you ll enjoy this wonderful book as much as I
do Jeffrey Ady Associate Professor retired Public Administration Program University of Hawaii at Manoa Founding Fellow
International Academy for Intercultural Research The International Handbook of Love is far more than a traditional
compendium It is a breath taking attempt to synthesize our anthropological and sociological knowledge on love It illuminates
topics as diverse as Chinese love one night stands teen romance or love of leaders and many more This is a definitive
reference in the field of love studies Eva Illouz author of The End of Love A sociology of Negative relationships Oxford
University Press This is not a volume to be read in a single sitting though I almost did due to a protracted hospital stay nor is
it romantic or inspirational reading though in some cases I had hoped for more narrative examples and case studies Rather it
is a highly diverse scholarly effort a massive resource collection of research papers on love in a variety of contexts personal
and professional settings and cultures The work is well referenced providing a large number of resources for deeper
exploration We owe our thanks to the authors and editors of this handbook for work well done though that word in the title
should not lead readers to suspect that enlightening as it is this book is a vade mecum or practical tour guide that provides

ready solutions to the vicissitudes and challenges of our love lives Reviewed by Dr George F Simons on amazon com Please see Claude H l ne Mayer s interview related to the handbook in LeanHealth Talks published by Bernadette Bruckner <https://www.youtube.com/watch?v=VNXA9sWuWo> Please see Claude H l ne Mayer s interview related to the handbook published In Iran News Daily <https://newspaper.irandaily.ir/nid/6941/pid/6/type/0>

Clinical Perspectives on Elderly Sexuality Jennifer L. Hillman,2013-03-14 Throughout my clinical training and practice I have been surprised by the number of times that sexual issues have emerged as an unexpectedly central feature in my work with older adults I can vividly remember my own internal reaction on hearing one of my elderly female patients tell me that she was date raped a few years after the death of her elderly husband when she was 68 years old I can see in my mind s eye the blood splattered on the floor of an inpatient unit from an elderly man who smashed his arm through a window furious that his antidepressant medication made it impossible to climax through masturbation On a much less dramatic but equally important note I think about the elderly amputee who told me softly about his fears of resuming sexual activity with his wife of 25 years I also think about the elderly woman whose inability to take herself shopping to find fashionable comfortable clothes to fit over her hunched shoulders and large breasts helped precipitate a serious depression In sum I learned early on that elderly sexuality is not just about how many times a week someone makes love It is my hope that sharing these experiences and introducing the related theories research and interventions will assist other clinicians in dealing with these often challenging and clinically demanding situations Without my patients this text would not have been possible

Sexuality and Aging Jennifer Hillman, 2012-03-27 Despite continuing ageist beliefs that sexuality is a privilege designed only for the young and physically healthy research continues to indicate that the majority of older adults maintain interest in sexuality and may engage in fulfilling sexual behavior well into their last decade of life Unfortunately many professionals remain unaware of general knowledge of elderly sexuality including the expected and normal physiological changes that can occur within the context of both male and female aging The presence of chronic illness and other medical problems certainly can influence the expression of an aging adult's sexuality and emergent research suggests that there are effective ways to cope with menopause heart disease arthritis incontinence diabetes sleep disorders breast cancer prostate cancer and erectile dysfunction ED among others Dramatic changes have taken place within the last decade alone in terms of non surgical treatment for incontinence and ED with forms of sex therapy biofeedback and PDE 5 inhibitors Regrettably many aging adults and their care providers remain unaware of their increased risk factors for STDs including HIV infection via lack of

knowledge changes in the vaginal lining and typical declines in immune function Estimates suggest that by the year 2020 more than half of all individuals living with HIV will be over the age of 50 Although some high quality professional books are available for clinicians they tend to be disjointed research bibliographies edited volumes on a narrowly focused aspect of elderly sexuality or texts that are more than 10 years old With the extent of new information available regarding sexuality and aging an up to date empirically based text is necessary
