Sexually Transmitted Infections And Aids In The Tropics:

Sexually Transmitted Infections and AIDS in the Tropics O. P. Arya, Charles Anthony Hart, 1998 Sexually Transmitted Infections STI are a major public health problem both in their own right and because of their link with HIV infection This has elevated their control to an absolute priority throughout the world In developing countries which account for approximately 75% of the easily curable STI as estimated by the WHO and where sexually transmitted HIV infection has reached epidemic proportions the need is most acute Here AIDS is claiming hundreds of thousands of lives and will continue to do so for the foreseeable future In addition because of inadequate resources the sequelae of STI e g infertility and some cancers contribute greatly to ill health in the tropics This book written by acknowledged experts working or with experience in tropical countries gives clear concise and up to date knowledge and understanding on all aspects of Sexually Transmitted Infections It should be useful for all those involved in the appropriate management and control of STI in various settings ranging from peripheral and rural and urban health care centres to large hospitals It will also be invaluable for students of tropical medicine medical microbiology and genito urinary medicine

Doerr, T.G. Ashworth, G. Seifert, 1995-09-15 The continuous and rapid improvement of tourism around the whole world and the increasing emigration

of peoples from the developing countries to the old continents have changed the classical image of tropical diseases which are now seen more frequently in temperate and highly developed countries. Consequently over 10 years after its first publication this second edition of the pathology of tropical diseases has been restructured and expanded to reflect the recent developments and changes in diagnostic techniques. A total of 27 chapters written by 29 reputed experts from 11 countries cover such new aspects as technological developments in diagnosing infectious diseases, autopsies in the tropics, renal diseases, geomedicine and genetic disorders. A concentrated and up to date review of the field.

Clinical Cases in Tropical Medicine E-Book Camilla Rothe, 2020-10-22 Using an easily accessible highly templated format Clinical Cases in Tropical Medicine 2nd Edition provides more than 100 realistic scenarios for tropical infectious diseases. Full color photographs and maps, a convenient question and answer presentation and succinct summary boxes help you identify and understand the tropical diseases you are likely to encounter. This up to date 2nd Edition is an excellent resource and study tool for infectious diseases fellows, doctors preparing for exams in tropical medicine, primary care doctors with patients who are global travelers and global health nurses and practitioners alike. Offers realistic scenarios for encountering patients in rural resource poor settings, presenting cases as unknowns just as in a real clinic or emergency situation. Covers newly emerging diseases such as Zika virus, severe fever with thrombocytopenia syndrome (SFTS) and knowlesi malaria. Features topics in migrant medicine of particular importance to clinicians in non tropical countries including louse borne relapsing fever, spinal brucellosis and hyperreactive malarial splenomegaly. Includes classic tropical diseases such as African trypanosomiasis, chagas, leprosy and yaws. Reflects the use of novel diagnostics used in resource poor settings as well as developing drug resistance in relevant cases. Provides a useful index and map that organize cases geographically for a targeted approach to study. Serves as a companion to Manson's Tropical Diseases with a reading list at the end of each case referring to the corresponding chapter in the larger text.

Nuclear Medicine in Tropical and Infectious Diseases Francisco José H.N. Braga, 2012-12-06 More than half of the world's population is at risk of the tropical diseases: malaria, leprosy, schistosomiasis, lymphatic filariasis, onchocerciasis, Chagas disease, African trypanosomiasis and leishmaniasis, and half a billion are infected with at least one of these diseases. J. H. F. Remme, World Health Organisation, 1993. If it is true that science is not limited by frontiers and all research institutions then belong to mankind, so it is natural for each institution to be responsible for the problems of those who live in the geographic area under its influence. There are no specific aspects concerning physical, chemical or philosophical concepts and facts, but specificity does exist concerning geology, sociology and pathology. It is the duty of each institution to study the particular aspects concerning its geographic region as missing links of the chain of universal knowledge may be found there. H. L. de Oliveira, former Rector of the University of São Paulo, 1967. Nuclear Medicine is cost effective especially in the developing countries.
